The effects of neuroleptics :

- Nocturnal restlessness: waking up to walk
- Summit of torture, of horror
- Nocturnal urine
- Very frequent urine
- Difficulty walking
- Huge weight loss
- Loss of resistance to heat, torture, awakenings due to heat*loss of resistance to cold, fatigue, pain and kidney problems probably caused by this due to neuroleptics
- Loss of any sense of rest and well-being
- Not feeling anything as an emotion: ability to memorize, libido, appetite, thirst, imagination, intelligence, energy, vitality, reflection, sensation, motivation, desire, desire, joy, sadness.
- Destruction, torture, horror
- Cut off sleep
- Sleep becomes interrupted, poor quality and shorter
- Destruction, torture, horror
- Restless legs syndrome: impatience
- Nightmares
- Torments
- A feeling of a dark world due to neuroleptics
- Mental torture, physical torture, destruction, horror
- Cut the appetite
- Anorexia or bulimia
- Anorexia when everything is cut off
- Bulimia when we lose all pleasure, we eat
- Cut libido
- Cut off all hormones
- Mental and physical torture
- Disturbance of the neurohormonal system
- Tongue and jaw deformity (facial dyskinesia), torture
- Time passes slowly and heavily, torture
- Very painful tearing of the eyes, cracked lips
- Cut out all meals (sleep, restless legs, mental torture, the slowness of time, nightmares, torment)
- Slowing down in walking and movements, torture
- Cut or block dopamine, serotonin, melatonin, adrenaline, torture
- Disturbance of the neurohormonal system

- They claim to "cure" non-existent and unreal illnesses but in truth they cause real illnesses and physical and mental destruction and an unnatural, unnormal, unhealthy state of health.

- The definition of illness is a state in which a person feels some pain and is in an unusual state in relation to their body: this is what neuroleptics do.
  Unlike what they call “disease” which is non-existent and unreal and is a habitual and healthy and normal and natural state in which the person finds himself.

  The small problems or unreal problems that these people pretend to cure with real problems and real, huge, horrible and destructive problems and torture
  Anorexia, due to a loss of appetite
  Depression or the little unhappiness caused by great torments and a dark world
  Mental instability due to a total and destructive disruption of the neuro-hormonal system and the mind of the person
  Ideas??? suicidal??? unreal or non-existent” by a dark world and physical and mental torment and torture???
  QUESTION???
- Small unreal problems at the social level due to a total loss of motivation, desire and energy and real capacity for integration
  NONSENSE, ANYTHING
- Small problems at the non-existent and unreal emotional level due to a real physical and total disruption of the neurohormonal system and its destruction (which is the source and driving force of emotions)
- “Unreal and non-existent disease caused by destruction of the brain
- Pretending that “denying illness is one more symptom” of “unreal, non-existent illness” through “care” that is destructive, torture, true and real illness
- Pseudo-scientific theories which are
- ANYTHING
- NONSENSE
- AGAINST THE HUMAN PERSON
- LIES OF DOCTORS AND LABS
- RISPERDAL is a hyper destructive molecule

- ABILIFY is a gentler and more moderate molecule. Lie. It is almost as destructive at 95% and not 50% of the side effects.
- When the medication doesn't work, change to another like ABILIFY (or other)
- LIE, since they have the same effect and are all destructive
- “side effects” LIES, since its primary effect is to destroy the person and their neuro-hormonal system
- The most "secondary" effect is akathisia = motor impatience = legs without rest, is part of the primary effect which is the destruction of the nervous system which causes these impatience in the legs, the same for facial dyskinesia, deformation of the tongue and jaw (due to the drying out of hormones) the same for tearing and
- - “The patient” is in denial of the “disease” LIE
  Already demonstrated since “the disease” is unreal and non-existent while, on the other hand, the problems caused by neuroleptics are real , true , destructive , horrible .
- “Mental ill” or “mental illness” LIES. Already demonstrated since the person is in a healthy, natural, livable initial state, without physical pain, or non-existent and unreal problems or "small problems", since is in a destructive, painful, tormented, dark state, madness, nightmares, torture
- “The person does not eat” LIE, already demonstrated the person had “small or even non-existent and unreal appetite problems.
  Then the person has
  1) No pleasure therefore no pleasure in drinking or eating NON SENSE
     ANYTHING
     DESTRUCTION
     ??? QUESTION???
  2) The person has difficulty eating with neuroleptics REAL ANOREXIA. ditto???
  3) Anorexia or bulimia
     Anorexia + bulimia
     Healthy initial state
     State to unhealthy extremes with neuroleptics Idem

  4) State of physical and mental torture, dark and tormented state which obviously gives neither the appetite nor the desire to eat

- The primary effect of neuroleptics is to cut off all emotion, sensation, pleasure, desire, motivation, which is already horrible torture and destruction.
- And for this, neuroleptics “block” or cut off all hormones such as dopamine, serotonin… Idem
- So, they will cut off sleep hormones (or melatonin) Idem (torture, destruction) which has the effect of cutting off sleep and disrupting and diminishing it. HUGE TORTURE. HORRIBLE.
- By the same method, they cut off rest to the legs and body. “Side effects” linked to the first effect ditto
  HUGE
- Deformity of the nervous system, leading to jaw dyskinesia
- This “side” effect is directly linked to the primary effect
- “Hormone blocking and cutting
- Loss of libido
- By the same method, we can say that they dry out the body
- Loss of the sensation of thirst. Horrible and destructive.
- By the same method, it causes very painful tearing of the eyes.
- By the same method, it causes chapped lips
- Same “secondary” effect directly linked to the effect of the first

  These Neuroleptics or “medications” help you rest = LIE demonstrated: 1) loss of sleep
  2) restless legs
  3) loss of pleasure
  4) loss of sensation
  5) mental torture
  6) physical torture

- “Side effect” = LIE. These are the primary effects
  The primary effect is to cut off all emotion and sensation, which is already torture and destruction 1)
  This effect causes another destructive effect which causes another destructive effect and so on. 2)
  These effects are directly and totally and completely part of the very first effect (cutting off emotions and sensations)3)
  Rap: “side” effect = FALSE
- If not quite simply, it is because the desired effect is destruction, torture, horror, terror on the person = the true primary effect 4)
- There is no need to talk about side effects 5)

- Already cutting off all emotion and sensation is destruction, torture, horror 6) 1+5=6
- “Rest” = Lie. FAKE

- The “care will return the person to a normal life = Lie. FAKE
- Already demonstrated since neuroleptics will make the person lose their vitality, their energy, their capacity for reflection and memory, motivation, desire.
    - The person is not well (before treatment) = Lie. FAKE
        1) The person had relative or unreal or non-existent “small problems” which were exaggerated.
           It is natural to feel happy about something positive and sad about something negative, which is a healthy and natural state.
           Neuroleptics aim to make the person “lobotomized”, totally stupid, who feels nothing, which is really REAL ABSOLUTE EVIL REAL EVIL + torture + destruction. So we can say that “I was doing well before the Neuroleptics (or at least on this point.
        2) The person had “certain problems” concerning their life which are external, relative, real (es: personal, work, studies, immigration, etc.) for which it is totally normal and natural to feel a need to resolve these problems. These relative and “small” external problems are the “not going well 1) “or small” 2 internal problems. This is a healthy, natural and normal state.
        3) With Neuroleptics, the person is really and truly not doing well internally and externally because of the real and real health problems caused by the NEUROLEPTICS (torture, suffering, destruction, loss of sensation)
        4) 3) The problems “exaggerated by “doctors” are theoretical, unreal, relative and non-existent and small”.
           Note: theoretical: In the pseudo-scientific ideology of psychiatry which is total nonsense and complete rubbish.
- The minimal problems caused by doctors by their NEUROLEPTICS are real, true, total, absolute, "huge", "big", destructive, horrible, corporeal, celebrable, neuro-hormonal, real "health problems

5) I WAS WELL before NEUROLEPTICS
6) To put it more simply and easily “With NEUROLEPTICS”, it’s worse”

- “The person had dark or suicidal thoughts” (before NEUROLEPTICS) Lie. FAKE. BIG LIE. Real Lie.

1) As already said, before the "care " the person had relative, "small", unreal or non-existent "problems" for which it is normal and natural and healthy to experience positive or negative emotions and sensations in the face of them.

- But before NEUROLEPTIC, the person is in total evil, a dark world, a world of nightmares, a violent void
- Forced injection of NEUROLEPTIC is worse than murder.
- It is the height of barbarism, horror, criminality and gratuitous violence.

2) The “ideas” exaggerated by doctors (before “care”) are therefore unreal, non-existent, false, exaggerated, relative, “small.

- Example: in the healthy and natural state of the person, it is completely normal, natural to experience emotions or sensations either positive or negative and therefore to interact we can have ideas and thoughts relating to the sensation. If we are sad, it does not mean that we are suicidal. It is completely healthy, natural and normal to be sad.
- Their theories and ideologies are TOTAL NONSENSE and TRUE ANYTHING.

Let's add to this, the nonsense and the nonsense of "disease" of their pseudo-scientific theories and ideologies ex 1: we can say "oh, shit" that does not mean that we want fecal matter.
Ex 2: children can have fun saying “go away…” this does not mean that he expects such and such from him.
Ideas are ideas
Thoughts are thoughts
Words are words
Desires are desires
Thoughts are real thoughts
Actions are actions
Intentions of ideas intention of actions
Real thoughts real thoughts

- When the effect of NEUROLEPTIC is the emotional and sensational void, the destruction, the torture, the nightmarish

and dark world of NEUROLEPTIC. Can we deduce the obvious?? QUESTION? EXCLAMATION!! HORROR

2) Faced with the questionnaire worthy of guestapo/after a long wait at the CPOA + a dismal atmosphere in the hospital), the nurse will focus on this famous question: “do you have any ideas…. ???

The person will answer “A”

1) What the person said "A" is not a "yes" nor "I have ideas...", he expressed Tel according to a healthy and natural and normal state without knowing that this service will react in this inhuman way
2) FIRST OF ALL, “A” is not “s**** ideas”, that of appearance and letter and what the person said the 1st time A1, and the 2nd time A2

- “A1” or “A23 in the form and in the letter is not “s** ideas” that of 1 and 2

  2) As already said, there is the questionnaire, the wait, the atmosphere, the relentlessness of the nurse on this question which has no reason to be.
- The person in his natural and normal state interacts with such a situation and could express such in the face of such a situation.
- As already said, there are simple ideas in the air, simple words in the air, which are neither serious nor real.
- What the person felt or thought or expressed or said; A does not mean “s** ideas”

  “A” in the background does not mean “s*** ideas”

  3) “A”; “A1” or “A2” does not mean “s** ideas, neither in substance nor in form, neither literally nor in meaning.

  4) NONSENSE

  ANYTHING

  Theories

  Almost Nazi ideology
- The person has “an illness and “symptoms” = Lies FALSE

  1) These are false theories of complete nonsense, total nonsense. There is no illness. Ex: “He is wearing a blue jacket”: Illness
  2) “he is thin”: Illness
  3) “He’s fat”: Illness
  4) “He is shy”: Illness
  5) “He talks a lot”: Illness
  6) “He wears a red jacket”: Illness
  7) “He wears a cap” Illness

8) “There is a 50 cent coin under his shoe”: Illness
9) " There is nothing ". Disease
10) “He met a gentleman, said hello to him, then ate a cake, then played ball” Illness… etc.
11) The greatest ANYTHING. NON-SENSE

This is not medicine!!!

And, with that, they make everything like theories, with “symptoms”, “diseases” and they give destructive, dark and torturous “medicines”.

NON-SENSE

ANYTHING

It's not medicine

3) The symptoms mentioned are contradictory and make no sense and are ANYTHING. Ex: “s**t ideas”, “delusional ideas”, “communication problems”, “think softly”, “slow down”, “eyes down”
4) 3) (by nature contradictory, that there are symptoms: interior and exterior, bodily and mental linked to the person and contextual)

(In short, the contradictory nature of the symptoms is a small parenthesis to support the nonsense and nonsense of their pseudo-scientific theories)

“S*** ideas” or “symptom = Anything.” NONSENSE

“S*** ideas”, non-existent, there is no

“Delusions” “symptoms” “disease” = NON-SENSE, ANYTHING

- It is nonsense to say that ideas are “delusional” and “symptoms of illness”
- What are delusions
- What right do they have to judge a person's ideas?
- NONSENSE, ANYTHING
- “The particularities or differences are “symptoms, illness” = CRIME MORAL RACISM BARBARISM HORROR NONSENSE
- ANYTHING Pseudo-scientific theory
- It's not medicine
- These peculiarities or "communication problems" are unreal, non-existent, small and relative and external problems and in relation to others that are no problem for the person

- Calling them “symptom” or “disease” is *jahl* ignorance (mentality of dark times), moral crime and racism and barbarity towards the person.
- “The person does not look like others or “the person does not conform socially”: “Illness” = CRIME=RACISM=BARBARIUS .
- NEUROLEPTICS, on the other hand, cause real, bodily, physical and even mental problems.
- “Communication problems” pose no problem for the person
- Note: NEUROLEPTICS cause the person to lose their ability to interact, and even their real abilities to communicate and adapt.
- “The slowdown” they talk about is unreal, non-existent or it's just “the person doesn't look like other people and doesn't conform” in their criminal and imaginary, ignorant and racist and barbaric vision.
- The person had all his vitality, his energy, his motivation, his sensations before the NEUROLEPTICS
- It was after the NEUROLEPTICS that the person walked slowly and was really slowing down in his movements. The person was in pain and had difficulty and physical suffering to do anything with NEURLEPTICS. The person was stupefied, lobotomized, legumised by NEUROLEPTICS.
- “Slowing down” (before NEUROLEPTICS) = LIES. BARBARISM = FALSE

“Communication problem” Illness = RACIST IDEAS
BARBARIAN IDEAS
CRIMES
FALSE LIE

“Particularities”, or “Differences” Illness = same
The more we stop the “medication”, the better we get
So “the person is not doing well” / before the NEUROLEPTIC + FALSE LIE
“the person has an illness”
The same person FALSE LIE
If the person has problems after NEUROLEPTIUES or after stopping them, it is because of the “illness” = FALSE LIE

The height of cynicism, nonsense and nonsense: A trainee “doctor” Dr. Myriam ZARZOUR said “It’s her illness” (speaking of restless legs syndrome) which is the unhealthy effect of neuroleptics the most obvious and apparent. NO LOGIC CYNISM NONSENSE-SENSE, ANYTHING

After NEUROLEPTICS, there are:

A real and beneficial improvement which is directly linked to the beneficial cessation of NEUROLEPTICs.

Some unhealthy effects at the start of stopping due to the harsh, persistent and violent destructive effect of NEUROLEPTICS and the difficult and violent withdrawal due to the disruption of the nervous system by NEUROLEPTICS.

The effects remain long after stopping NEUROLEPTICS

Some of the damage and destructive effects that remain. Permanent, irreversible effect desired by these barbaric criminals who want to destroy and torture and cause suffering and therefore who want it definitive, permanent and irreversible.

Torture, suffering, turning, destruction with RISPERDAL or with a maximum and infernal dose: maximum impatience, nocturnal impatience, very violent emptiness. 100%

With ABILIFY and dose reduced. It is less violent but the effect of NEUROLEPTICS remains complete and total: impatience, sleep, weak and broken, emptiness remains total: torture 80% around April 2019

A month and a half after stopping: the person feels a little better: end of impatience, less torture and torment, better sleep and better libido (“small”) (“less” (but not completely blocked) torture 50 %

The more we stop taking NEUROLEPTICS, the better we get

3 and a half months after stopping: return of sensations, better sleep, and better libido, more “liveable”, much less torture and emptiness and torment, much better torture at 25% towards the end of August 2019. The person will very much better, since then but everything is diminished “(sensations, libido, sleep) with an empty cunt certainly less violent and torments, torture, suffering, dark world, less violent.

When taking NEUROLEPTICS, the effect and the horrible sensation are so violent, harsh and persistent that we already think of permanent and irreversible destruction.

CRIMINALS

The irreversible effect exists (nuance)

Even if the torture, the torments, the nightmare world are much less violent, the motor impatience goes away, the maximum effect as well as the full effect goes away)

There is :

- Sensations, sleep, rest which are diminished
- There remains a destruction of 25% which is irreversible
- There is still some torture, torment, dark world and nightmare 5%
- The more we stop taking NEUROLEPTIC, the better we get = EVIDENCE

  Everything I say is obvious and should be obvious. But these criminals have succeeded in imposing their cynicism, their lies and their false theories, and their false medicines.

  These criminals tire me out by demonstrating evidence in the world where they have succeeded in imposing their corruption and barbarity: (people are stupid and cynical)

  1) There is no illness
  2) 2) it is NONSENSE. BULLSHIT

Pseudo-scientific and false theories. It's not medicine. Formula repeated many times.

Reminder of the obvious3) the "problems" these criminals talk about are unreal, non-existent, relative, "small", pose no problem to the person, false exaggerated by these criminals, lies, nonsense, anything

3) The problems caused by NEUROLEPTICS are real, real, present a real problem for the person, HUGE, HORRIBLE, destructive, torture
4) Very repeated formula AN OBVIOUS
5) 5) NEUROLEPTICS are torture: nocturnal impatience, cutting off sleep and weakening it and interrupting it, horrible and violent emotional and sensational void, torment, mental torture, world seems nightmarish
6) NEUROLEPTICS are destruction: torture, the same effects which are cited in 5), loss of pleasure and desire and sensation and emotion and motivation, the irreversible effect, the denial of rights, cynicism u system, targeting the person

for "peculiarities" which are beautiful and which they consider as "disease", destruction and torture when we have done nothing wrong, manipulation and lies and disinformation and fraudulent methods used by these criminals (in hospital psychiatry Dr CHAMI and even in free psychiatry Dr Maria MARTINEZ

The more we stop taking NEUROLEPTICS, the better we get

Note: ABILIFY 5 mg causes impatience , which proves that even the very small dose of NEUROLEPTIC has serious and destructive effects

ABILIFY is softer and partially blocks = LIES. FAKE

NEUROLEPTICS stop gradually, perhaps a lie and FALSE and without reason.

This concerns other products, e.g.: anti-depressants

- NEUROLEPTICS are so destructive that they must be stopped as soon as possible
- We can stop them suddenly 1) with experience 2) advice from a great psychiatrist 3) It is known that we can stop them suddenly.

If there are adverse effects or withdrawal, I think they will be inevitable and will be worse if we stop later, we take more for the "gradual" stop.

I recommend stopping suddenly

Lies that allow them to make money

“A” means “s*** ideas” = FALSE LIE

“looking “sad” or “poor” means “s*** ideas” = FALSE LIE

“don’t eat” means “s*** ideas” = FALSE LIE

As already said, what they call "he doesn't eat" or what the person meant by "I don't eat" are in reality relative, small, unreal, non-existent false and exaggerated "problems".

- The person said “B”
- “B” means neither “s** ideas” nor “anorexia”
- “B” means a relatively and insignificantly not very ideal eating rhythm
- Ex: 1 meal per day (but this meal is nutritious)
- Ex1: eat a lot of biscuits and cakes
- Ex3: eat “small” dishes or real” dishes.
- On the other hand, NEUROLEPTICS have caused real anorexia, loss of desire and pleasure in eating, loss of appetite and its destruction.
- And likewise the loss of the desire and the pleasure of drinking, of the feeling of thirst
- Which is very dangerous and deadly
- * “sadness” or “depression”, “it’s “sick ideas**3
- False lie crazy exaggeration
- Exaggerationbarbaric
- Corrupt Exaggeration
- False Exaggeration

As already said, sadness is part of a natural, healthy and normal state (which is an obvious fact that these cynical corrupt criminals deny)

On the other hand, the NL are absolute evil, absolute darkness, destruction, torture….

The word “depression” or “depressed” is a “new and invented and theoretical and pseudo-scientific and “soft” term; Otherwise, in the other case, it means relative "problems", unreal, small, non-existent, not serious, not dangerous, "soft" barbarically exaggerated and corrupted, "psychological"

On the other hand, the NL are total and absolute destruction and suffering and torment and evil.

Note: Let's look at this hypocritical contradiction: they claim to "help" and exaggerate "depression", but they are cynical and minimize the torture and destructive effect of neuroleptics.

“they are “helping” = FALSE. LIE

“more” (problem” relative, unreal, small by destruction, torture, real and total torment

“the sick “suffer” from the “disease” = FALSE. LIE

1) There is no such thing as “disease”. These are corrupt and false theories that make no sense.
2) In the initial state, the “pluses” are relative, unreal, non-existent and insignificant and “small”
3) With the NL, there are physical, real, health problems, destruction, torture, physical and mental, dark and nightmarish
4) The hypocritical contradiction: they exaggerate the “smallest” and minimize torture and destruction
   - “they stabilize” FALSE LIE
     -They destroy and destabilize the neuro-hormonal system and the person

* “madness” mentally ill or crazy = FALSE LIE

It is the NL that makes you crazy and sick and destroys the neuro-hormonal system

- NL destroys the body and the brain and puts the person in a state that is unnatural and painful, which corresponds to a real illness
- On the other hand, the person without the NL is in a healthy, livable, natural state without this torture, and these torments and these unhealthy effects caused by the NL.
- “such” or “such” is reason for hospitalization without consent” = CRIME
  1) First of all, by what right do they put the person without their consent?
     They do not have the right !!
     They should not interfere or question. It is an injustice and a crime and barbarity.
     Everyone has rights
  2) “such and such” is the reason for hospitalization without consent
     This is nonsense
     Bullshit
     From the LIE
  3) This “such” and “such” is already FALSE and LIE
  4) All theories and “disease” are false
  5) Conclusions:

They base themselves on something false (3) that they misunderstood about the person, and on their false pseudo-scientific, false theories which make no sense 4) and that they put a link of NO -SENSE and ANYTHING 2) and already what right do they allow themselves:

a) To intern and hospitalize the person without consent
b) To give him “medication” by force
c) These drugs are a poison, a torture, a destruction, a horror, a crime.

NO ONE has the right to do this to others.

These criminals abuse the prerogatives that the law allows them without “justice” or the State doing anything.

Complicity of the State and “justice”.

The lying, cynical and corrupt approach of ruined psychiatrists:

- If we talk about such a criminal effect of these corrupt people, they will use as a card: “But he was not doing well (talk about before the “care” and the NL = FALSE, LIE

1) already, what right do they have to do this? a) hospitalization without consent

- B) force to take the NL
- C) the NL torture and horrify and terrorize and destroy

2)What is the connection? What is the link ?

ANYTHING
NONSENSE
CYNICISM

3) “The person was not well”
FALSE, LIE
a) As already said, the person was in a natural, healthy, healthy state, insignificant compared to that of NL, unreal and non-existent
b) With NL, the person is in the torture, destruction, turmoil, nightmarish and dark atmosphere of the NL effect
c) To make it simpler

C1 “I was doing well before the NL”

C2 “ maybe I had “little” problems or I was “a little” not well. But with the NL, I'm really and truly not well and extremely not well. It's incomparable compared to before the NL

C 3 for simpler: it's worse with the NL

In an incomparable way;

NL= torture, destruction, atmosphere of nightmare and suffering and torment.

C4 “perhaps I had “small” problems, but these are not what the “doctors” who understand nothing about my story and who do not know my life talk about

C5) these “doctors” are in a non-constructive and destructive irrational illogic: “it’s not okay, I’m destroying and changing for the worse” without forgetting that:

Note 1: They did this by force, without consent and imposed it on the person

Note 2 “it’s not okay” FALSE. LIE. ANYTHING. NONSENSE

Already demonstrated and explained

-they did not understand (c)

- problems relating to destruction c1, c2, c3)

The two major cynical illogical approaches of “doctors” in lying and cynical argumentation

Approach 1: the one already mentioned at the beginning of the paragraph. If we talk about their damage, they use the “he wasn’t doing well before” card.

Approach 2: “the illogical, irrational, deconstructive and destructive approach. “It’s not okay, I’m destroying and changing for the worse.”

First of all, what’s the “he’s not doing well before”???

1) Already they impose on me their hospitalization, their "care", their "medications", their lies and their cynicism concerning their false and pseudo-scientific

ideology, their lies and cynicism concerning the "disease", their lies and their cynicism concerning me. concerned person

2) What is the report, ANYTHING. NONSENSE
3) No, I'm fine and I don't need their "care" and their poison torture destruction that they call medicine
4) At the beginning, it was relative “problems”, unreal, non-existent, small, I was in a healthy, natural state
5) With the NL, it's absolute evil, torture, destruction, a dark and nightmarish atmosphere. This is where I am really and truly not doing well.
6) They didn’t understand what “I’m not well” means. They didn't understand anything about my story and don't know my life.
7) And at all levels, psychological, mental, appetite, communication, vitality, no s*** ideas, no “illness”
8) Their theories are false, lying, pseudo-scientific, NONSENSE, ANYTHING, CRIME

- I had to repeat information that is obvious to me and that I don't have to make as much effort to demonstrate, prove and even repeat several times.
- It is so much the cynicism, the lies, the irrationality of their theories, the violence of their rape on the human person, their pseudo-scientific theories which impose themselves, their lying cynical argument which wins and imposes itself, their negation rights and the human person, their barbaric racism, their barbaric lies, their barbaric rape are so harsh, persistent, violent, tenacious and impose themselves in a world corrupted in their image and ignorant in their image, cynical and mendacious in their image. image and to a State and a system and “justice” complicit in their crime.
- According to them, a person who has “an illness is a person who needs “medication” the most. But we notice that they judged “sick” reacted more poorly to this poison “medicine” than other people classified as “sick” or not. Despite the fact that this person is young and healthy, and even that his body has a better capacity for recovery and regeneration against the NL poison.
  This person therefore lives worse than others and adapts worse than others.

We can deduce that the NL does not suit him. So this person doesn't need NL.
Note: we change treatment = LIE. FAKE. FRAUD
Because they all have the same effect. And even ABILIFY considered as a “partial blocker” or more “soft” is already very destructive and the person does not adapt to BILIFY and even less to RISPERDAL. The person reacts badly
The correctors = Lies, FALSE, FRAUD. It's like "changing" treatment, it's like the cynical and corrupt expression of these criminals
These correctors will cause other “undesirable” or “side” unhealthy effects.
They will call on other proofreaders and so on. Corrupt industry that makes money through their unhealthy poisons.
Correctors have no effectiveness e.g. that of stools
First of all, by what right? We shouldn't even take the first poison and then talk about "correctors"
The NL does not suit him. He doesn't need NL.
This person is not “sick”
The diagnosis is wrong.
Their theories are already false, ANYWAY. NONSENSE, and that there is no "disease" and that NL is torture and destruction for any person.
NL are neither “sedatives”, nor “sleeping pills”, nor “antidepressants”, nor “medications”
People, out of ignorance + a lie from these criminals, call these “medicines” sedatives. It's wrong. They disturb, destroy and make the person suffer and bring the person into a gloomy and horrible and nightmarish atmosphere.
This poison prevents sleep.
They are not “sedatives”, they disrupt and destroy the neuro-hormonal system.
These are not “sedatives”, they are simply torture, horror, destruction.
The words “torture”, “horror”, “nightmare”, destruction are very, very, very weak to describe the effect of the NL
The words “criminals” corrupt, “barbarians” are very very weak to qualify these corrupt criminal barbarians.
It is beyond all torture, destruction, murder, horror, nightmare, barbarity, crime, racism, corruption.
When you compare it to torture, the NL is much worse
1) The torture lasts for a while, while the NL lasts for a while

2) Worse still, NL are permanent and irreversible.
3) NL screws up and disrupts the entire metabolism of the human being, which torture does not do.
4) NL brings out a horrible and gloomy and nightmarish atmosphere, which torture does not
   Same thing regarding the fact that the NL are beyond all destruction, it does not stop at destruction but goes so far as to make the person suffer in an atrocious way and torture in an atrocious way and he living a real nightmare. And it's even beyond that and it's small words compared to what the NL does.

   The person does not have the conscience to consent or not to hospitalization = FALSE. LIE. NONSENSE. ANYTHING

1) The person is conscious to decide whether to be hospitalized.
   There is no “Illness”; it's wrong ; these are false pseudo-scientific theories which have neither tail nor head
2) Hospitalization without consent occurs in total denial of human rights.
   No one has the right to forcibly intern another or to make them take medication or to give them destructive neuroleptics which are torture and horror and nightmare.
3) This hospitalization is against the interests of the person; the NL are destructive, torture and horror; This destroys all legitimacy of psychiatry and hospitalizations without consent.
   Already it is done against the freedom of the person and his will.
4) It is with NL that the person loses all will, ability to act, to think, to decide and to have independence and management of their life.
   It is with NL that the person is “mentally unconscious”

On the other hand, without the NL, the person is in a healthy, natural and normal state.

5) Against the wishes of the parents “against the law”

“the person is dangerous to themselves or others” = FALSE, LIES, NONSENSE, ANYTHING.

1) This is FALSE, without the NL the person is in a healthy, natural and normal state. The person is even harmless, introverted, kind, shy, concerned about his health. It's complete nonsense to call it dangerous.
2) It is with NL that the neuro-hormonal system is disrupted and disrupted and the person is destabilized.
3) On top of that, the NL destroys and tortures and horrifies the person
4) Already, everyone has the right to a fair trial. No one has the right to forcibly intern, to forcibly give medicines, harmful and destructive substances and torture under the pretext “that the person is dangerous”
   Note: most people in psychiatry are far from being "dangerous" and even that is not a reason
   “They don’t do anything and when they decide on hospitalization without consent, they ring the bell” = FALSE

   1) It's done in an arbitrary way. It's an intern LYNA CHAMI who decides this even though she only spoke for a few minutes. Then, the other service will follow the same decision then which is only discussed with me for a few minutes. Is the judge of liberty not checking anything, he is only following the “medical” decision
   2) There is no “disease”, they are pseudo-scientific theories that make no sense and nonsense.
   3) There is no such thing as “disease”. And this, according to the expertise of great psychiatrists who took the time to properly diagnose the person in a caring and responsible manner.
   4) There is no “disease” reasoning by the harm of drugs on the person
   5) There is no "illness" reasoning by the definition of illness = unnatural state in which the person is and which is painful and/or which is an anomaly or dysfunction in the body of the person which corresponds to the effect of NL
      Without the NL, we are in a healthy state, in good health, in good shape, without disease so there is no “disease”
   6) There is no “disease.” It is the NL that causes the person to lose their ability to act, to think, to decide, to lose consciousness and will...

“denying the disease is the symptom” = FALSE, MSG, VIOLENCE, BARBARISM, NONSENSE 2) 3) 4) 5) from the previous chapter

“judge of freedoms” = LIES, nonsense, formality
This judge of freedoms follows the “medical” decision in 90% of cases
RQ: it seems that the hospital deliberately caused the summons letter to arrive late at my mother's home
Conclusions:

1) The list of NL effects is endless and even indestrictible
2) It was morally and mentally tiring to try to break down the so many lies and false arguments of these cynical criminals. They have lots of disgusting tricks up their sleeves
3) The problems that the “doctors” claim to “cure” (from under the NL when there was none) were caused by them with the NL. Ex: before the NL, I ate really well more or less.
   With the NL, I'm really difficult to eat
   Before the NL, I'm more or less well
   With the NL, I'm really not doing well
   And this in an incomparable way; we do not compare “more relative”, small, unreal, non-existent compared to total destruction, torture, horror and torment.
4) To make it simpler:

- Before the NL I was eating and I was fine
- It's with the NL that I wasn't eating and I'm not doing well

“concentration disorder as a symptom” = FALSE

1) I was in a healthy state where I had all my ability to concentrate
2) On the other hand, with the NL, I lost all ability to concentrate
3) It was just talk in the air, but I didn't have the ability to concentrate and study.
4) It was relative, insignificant, unreal, “small” whereas with the NL it was total destruction…
5) “the law protects people” = FALSE
6) “judge of freedoms” LIE, formality
   Same arguments cited in paragraph p 44, 45, arbitrary, falsity of their theories, formality of the judge of freedoms

7) These criminals feel protected by the law and “justice” and think they have good lawyers. And the victims do not have confidence in "justice" and feel that it is inadmissible and that these criminals/hospital+"doctors"+labs are protected

III RECORD OF FACTS

In their report, they say that I went “spontaneously” accompanied by a “friend”
It's wrong
I didn't go spontaneously, it was this other person or "friend" who took me and even dragged me without really asking my opinion and without informing me. He didn't propose to me. He abused weakness, vulnerability, precariousness. He did not inform me what psychiatric hospitals were about, he insisted, he harassed, he lied, he insisted with me on false and senseless and stupid things in which he persisted and which I

knew to be false, senseless and stupid, authoritarian unpredictability of the person) indelicacy...pride..
RQ: I didn't know that such things existed in our world and in our time (that you could forcibly intern a person without consent, force a person to take "medication", that there were such horrible substances, destructive and torture like the NL, that one could intern a person arbitrarily and on a whim after talking for a few minutes, say that the person has "an "illness" arbitrarily on a whim while talking for a few minutes. minutes (1 or 2 minutes even) by pseudo-scientific false senseless theories ANYTHING, NONSENSE, and that there is this whole world of “disease”, “symptom”, “delusion”, “schizophrenia », “bipolar”...”psychosis”, “psychotic” “denial of the illness is another symptom” = ANYTHING
NONSENSE
CRIME
Exact account of the episode with this “friend”

- This person was a friend of my parents, he was 49 years old and I was 22 years old at the time of the incident. This person was just presented as a trustworthy person, which she took advantage of.
- This person came to talk to me about a “medical file” procedure concerning immigration and told me, insisting in a stupid and stubborn way, that a psychologist can make me a “medical file”. Which is false in addition to having no sense and being nonsense. This person tells me that his uncle got the papers like that.
- RQ: common point between corrupt criminals and this “friend” person is having false and erroneous information and ideas , which make no sense and which are nonsense, then considering them as true, being stubborn and “ impose, either by force, abuse or surprise .
- I tell him that we give a residence permit when we have a health problem for which there is a lack of care in their country of origin, he tells me “medical file!! medical file ! by being stubborn. I tell him to send me the details of this procedure by email (I know that what he says is false and makes no sense) he stubbornly replies “I won't send it to you”. I tell him that I have a student residence permit and

that I cannot do a procedure like that, he persists and tells me “medical file!” medical file ! My uncle got his papers like that. His uncle probably had his papers for something for which there was a lack of treatment in Tunisia) In short, I was not at all convinced or agreed with what he told me and I knew that it was false, stupid, nonsense and anything.

- This person harasses me, insists and insists that I see a psychologist: “See a psychologist, see a psychologist”.
- One day, we visited a journalist, an old friend of my father. Then, after returning home, this journalist telephoned this “friend” and said to him behind my back , without asking my opinion or proposing to me , nor knowing my situation or my real needs “he is doing badly, he needs a psychologist ".

  The “friend” replies “I don’t know a psychologist in Paris”. It is the journalist's wife who intervenes: "there is the Saint Anne hospital in the 14th" and that it offers quality care, (which may have been the case for her but, not at all all for me). The “friend” replies: it doesn’t concern me, it’s the parents’ business, I’m not responsible” which he will contradict the same day or the next day)

  RQ: the replies are approximately and in meaning)

  On 02/11/2019 he was with me. He said to me: “you see a psychologist”

  I answer him: “yes”

  He answers me: you are taking medication”

  I tell him: “I took it, but the medicine was strong and bothered me.”

  He answers me: “Wouldn’t you like to see another psychologist? »

  I answer: “Okay” (of course, due to pressure)

  He answers me: “we’re going to Sainte Anne, it’s a psychiatric hospital. Let's go, if it doesn't suit you, get out."

  I respond: “Okay” (of course, I gave in to his pressure and harassment

  Note:

1) This person first lied by telling me that in a psychiatric hospital, I am free to come and go whenever I want.
2) In this dialogue, it is obvious that I gave in to his pressure, to the harassment
3) This person imposed, forced, obliged me to do something of which I was not convinced and for which I told him that I knew it was false and which for me did not make sense and was nothing. no matter what.
   This person stubbornly imposes their opinion on others
4) This person took advantage of the fact that I didn't know how hospitals worked. I didn't think such horrors could exist (forced hospitalization, forced medication, unhealthy NL)
5) There is abuse of the person (abuse of vulnerable and precarious people)
6) This person actually took me and dragged me to Saint-Anne without asking my real opinion and without my real consent
7) This person was aware of my difficulties in terms of communication and social relationships
8) This person was aware of the vulnerability and precariousness and fragility of the person (I was not able to say “no” to him).
9) Conclusions: I did not go “spontaneously” accompanied by a “friend”. But, this person took me, dragged to Saint Anne by the abuse, the harassment, the real advantage he had over the person, lack of real and true consent, the false and erroneous information...

Names :

“friend”: Slah HNID

Journalist: Arnaud Viviand

Rq: This “friend” or former friend of the family is no longer friends with the family. He is no longer friends with my parents after the fact.

Anecdote: S.Hnid is the type of person when I tell him “I’m tired, I can’t do the descent” he tells me:

I’m not going to make you happy for you, we’re going to do the descent” It’s a little example of the character that S.HNID had

Anecdote 2: S.Hnid, as already said with ARANAUD AND HIS WIFE? THERE IS A TYPE OF BEHAVIOR AND THEM TELL THEM SO AND SUCH. When I am alone with him, he becomes authoritarian and proud and contradicts what he said with Arnaud and his wife. Same thing when he is with my parents, he has such and such behavior and such and such speech whereas when he is with me, he is such and such. S.Hnid in addition to being arrogant, stubborn and proud, he is a hypocrite and a coward.

Anecdote 3: Arnaud Viviand didn't tell me to my face: "see a psychologist", but he said that behind my back when he called S.Hnid. His wife did too. When I was with them, they said nothing, while behind me, they interfered in the lives of others and took out their address books “and recounted their experiences. Mr and Mrs Viviand, too, are cowards and hypocrites.

Neither Hnid nor Mr and Mrs Viviant had the right to take me to the psychiatric emergency room

By what right ?

- We talked about the fact that I didn't go "spontaneously" to the psychiatric emergency room, but that S.Hnid dragged me, even though I didn't really want to and didn't feel any need to go there.
- The “fuzzy” request referred to in their report is this medical file” that S.Hnid was talking about. Another truth: it was not me who formulated it. It was S.Hnid who made it to the CPOA on my behalf without my wanting it. I neither had the idea nor asked to bring it up nor mentioned it either directly or indirectly. S.Hnid did it from start to finish.

Another truth: why do they say “fuzzy request?” » It is because Lyna Chami, who is of great incompetence and great irresponsibility and great cynicism, did not even seek from me or from S.Hnid to ask to

explain this “fuzzy request ". She was content to direct her Gestapo questionnaire towards the questions they wanted for their false and pseudo-scientific theories which make no sense.

Conclusions: already when it comes to recounting the facts, they don't even take into account realities and truths. They are content to botch what they consider to be the “subject of their theories” and which they consider to be “commodity”

Another Great Truth : they go so far as to invent things that I have never said. In their report, they put “hallucinations” and/or hearing voices!!!

They go so far as to invent things that never happened and that I never said.

-We talked about facts that were judged in a sloppy manner and which are erroneous in their reporting. They hospitalize in an unpredictable, irresponsible, indifferent way, talk for a few minutes, judge based on appearances and above all by slipping or “because they have work” so they put the person in hospital.

We also talked about facts that never existed or took place nor did I talk about which they invented to fill their report.

- When S.Hnid took me to the Sainte Anne emergency room, they made us wait + the atmosphere was gloomy + the nurse came to ask his questions in a police manner and directed his questionnaire towards the questions he wanted taking thus the control of the questionnaire without taking into account the subjects of which perhaps and I say perhaps because I am not convinced, which I want to ask, perhaps (like the “fuzzy request”, perhaps to have a disability recognized??? would be to my legitimate advantage.
- The nurse asks me: “do you have any s*** ideas” I answer “A1”
- Already when I said A1, A1 these are not ideas
- Secondly, A1 does not mean s*** ideas in the sense of what I thought perhaps we perhaps wanted to express. Because, as already said, I was in my natural, normal and healthy state where it is completely natural, normal and healthy to feel any prohibition in the face of a situation or "problems" (relative real or unreal and non-existent).) RQ, even if there

are real "pluses", they are insignificant and small in the face or "Big" problem of forced hospitalization and unhealthy and destructive neuroleptics
- By what right? And what is the connection?
- This is nonsense and nonsense! This is barbarism and a denial of rights!

Then, they call S.HNID who quickly speaks with LYNA CHAMI.

Then he comes back. I learn from him that they have exaggerated what I have in “A” and that they are going so far as to exaggerate “s** ideas”. Which I didn't expect and I didn't know. I learned later (after hospitalization) a few things that came up in the interview.

L.CHAMI told him at S.HNID about me: “I’m interning him immediately”

HNID: »No, don't intern him! Don’t intern him”

Then he mentions contacting my parents.

RQ: Even S.HNID, the irresponsible and guilty person, was against hospitalization and opposed it and is aware that for me this hospitalization has no place. He even signed a release and gave his contact details.

Which confirms what I said to them; they were around and centered around their ideas and which they imposed and directed towards without having any connection or relationship or knowledge or place of being with my situation and my reality.

Then L.CHAMI talks with me and/or with me+S.HNID.

As I have already said, they ask their questions in a police manner and direct them towards their own subjects and their questions which are, for me, off-topic and without place and even nonsense and nonsense.

But the worst thing about L.CHAMI is that they sometimes ask sensitive, embarrassing and even provocative questions in order to direct them to her subjects and questions and even to what she calls “delusional ideas”

Fun fact: Some of what they call “delusions” were told to me by someone else.

S.HNID + the long wait + the stifling atmosphere at CPOA + the harassing questionnaire from CHAMI, so I said in a really thoughtful way what they call “delusional ideas”

It is only after this unfair questionnaire that she calls S.HNID and asks him what he or what we want and he expresses the vague request in my name, and in the most stupid and inappropriate way. clear “medical record”. In addition to this, L.CHAMI does not pay attention or asks for clarification but directs to the subject she wants and offers me hospitalization. This time she tries to insist but a little insist by giving me false arguments and lies to persuade me like: "there are studies and health are two things" (They are not "care" and I do not didn't need it)

“you can stay even one night”

And it's a lie so that when I come back, they keep me: I'm sure + it's not care + no need + no place to be

RQ: regarding the very short interview with CHAMI, it should be added that he:

- The person has communication problems
- The person is vulnerable and insecure
  Very unfair interview

In the end, we were able to leave by signing a second medical opinion release. A positive point. <u>But :</u>

This medical opinion, as already said, has no place or reason to exist.

1) Off topic, it is they who imposed and directed towards their opinions
2) Opinion based on false pseudo-scientific theories, nonsense, anything
3) Opinion based on lack of knowledge of my reality or my situation
4) By what right ? First of all !

Me and S.HNID, we signed this waiver then the nurse told me to come back on Tuesday 02/19/2019, I told him that I can't and that I have an internship related to studies. He said to me something like: “If you're broken, you wouldn't say that. You come to this meeting.

How can we compare a physical emergency (being broken) with their theories which have neither tail nor head and which are harmful?

I contest this post-consultation appointment as a form of harassment!!!

They did not offer to come back if I wanted, but they spoke to me in such a way that this meeting on Tuesday the 19th is necessary" and thus presented it to S.HNID. So it's harassment and they push the other S.HNID person into harassment, who will follow me and take me there a 2nd [time] .

Why this Tuesday meeting?

It has no place or reason for being

They could have told me what they had that day but CHAMI spoke with me and S.HNID for a few minutes and then made me come back a second [time] . It's harassment

After returning home S.HNID telephoned my mother and told her briefly that they were going to hospitalize me in Saint Anne. (After dragging me to this place of misfortune, which is irresponsible on his part, and without telling me that there is a risk of hospitalization, which is disloyal on his part). Perhaps even my parents did not expect that there would be such an unpredictable hospitalization. But, my father hearing what happened took the plane and came.

On Tuesday the 19th, I simply went to the appointment they gave me (harassment) + S.HNID was waiting for me at home or at a metro station, I forgot (harassment) and I didn't go to a day of internship at the accounting firm (study link)

[time] , there was a long wait, a heavy and gloomy atmosphere, but above all an interview with CHAMI this time faster (I would say 30 seconds) and more unfair and who judges on the appearances "so as not to worry" or because she has too much work" or "busy", settle the patient very quickly by harassing him.

What happened in this micro-interview was that she gave judgments about appearance in a hypocritical "I sense great sadness in you" way. In their report, they will note "poor air" (note the long wait, the atmosphere) (But, note that it is a healthy and natural state unlike their care).

Before this micro-interview, the nurse started with a very sensitive question which is the communication problem (before, I did not know that this was a problem for others and especially not that it was a "symptom". I thought that we can live with others

without being confined by this problem, so I responded without paying attention.”

Then he ends his interview with the question about “s*** ideas” where I answer A2

A2 is not “s*** ideas” in form

A2 does not mean s** ideas” (I was in a healthy, natural, normal, positive state on this point where it is completely normal and natural to feel this or that in the face of a situation that would be negative, unlike the effect of NL which is absolute and total evil)

Then there was the micro-interview with CHAMI where she told me at the end when she spoke to me about the hospitalization: “GO! GO! otherwise, we will have to redo (the procedures) again”

There she tries to force me to say “yes”

It's his way of doing things par excellence

Disrespect for the person and their choice: “Come on! Come on "

We can clearly see the hypocrisy

Judgment on appearances

Quite simply the denial of rights

She takes advantage of the person in an unfair way

Abuse of vulnerability and precariousness, communication problem

Overlooking the person and their rights through indifference, incompetence, “too much work”, “no time” Chami has a lot of things to do at the expense of his most basic rights

After she says to me "GO, GO..", I answer her "no", she gives me a "face" which means she didn't accept it then I leave after a very short interview. She summons my mother. S.HNID, who has no legitimate responsibility, and who also knew that the hospitalization had no place or reason for being, was dismissed. After leaving CHAMI's office, a nurse accompanied me to a room with an accusatory, semi-authoritarian, police-like air (I think it was he who gave me the questionnaires, he was a little young). When I am in the room, I see a doctor or a nurse??(I don't know, he was older, not young) he was walking towards the other direction, towards CHAMI's office, he looked like a police officer, very authoritarian, repressive, oppressive, mean, harsh, he said:

“…his hospitalization” or something like that. So I answer, “But, I said no.” He answers me with a harsh air, authoritarian and everything.. "it's going to be yes anyway, the laws allow us to do it" I was shocked when he said that and felt a great injustice.

1) How can you do that when the person said no?
2) How can you do this to someone who hasn't done anything wrong?
3) How do the laws allow this?
4) To me, it didn't make sense. How can we pretend to help a person facing "problems" of real and external source, relative, unreal "psychological" problems, even non-existent, relative by something so extreme, violent, senseless in the act, senseless? in its content, unpredictable, like that without anything, and above all forced and imposed? It's nonsense, NONSENSE, without head or tail.
5) It's an injustice,
6) In addition to being an injustice, it has neither tail nor head, NONSENSE, ANYTHING.
7) They claim to help, while exaggerating “psychological”, “small”, “relative” “problems”, from external sources, while minimizing a big problem which is this injustice? And while refusing to see the why and the reality of the person and the external sums? and above all by forcing and imposing
8) How can we act on the person itself as if it were an object of studies or experiments or work or “problems” and claim to “help”
9) This inhuman hard man that I spoke about recently means that we are dealing with thugs, a mafia, barbarians, jailers, torturers, people at the height of cruelty, inhuman in the cold. And, as for the form, well, it's legal and the law allows it and the State allows it and protects them
10) We have no protection against these criminal thugs
11) They decided to hospitalize me before even consulting my parents, which is against the law
12) This thug contradicts himself, he does not respect the law on this point (non-consultation of parents)
13) There is something against my interests and they can only impose it by force
14) Note that in other cases, it is imposed by vice, abuse, surprise, impressibility…, disinformation
    - RQ: There is incompetence, bad work, in which for them the easiest and quickest way is to do their work “quickly” by

botching up, and putting in boxes those they consider to be guinea pigs , object of study, goods, object of goods (to sell medicines)

- They go so far as to mislead the parents and even the person concerned, they inform me that the person(s) of their rights. They do not respect the law.. On several occasions, they did not let me go out and lift the restraint despite my parents' clear request. Failure to comply with the law

RQ: * we notice that they decided on hospitalization before consulting the parents.

They completely did this with a thug mentality.

“It’s going to be “yes” anyway, the laws allow you to do so”

Rq/*their system and based on the violation of the rights of others.

(CHAMI), the thug who is with her and his sentence, the incompetence, the easy solution for them which is to hospitalize and give NL, forced and abusive hospitalization, abuse, casing people according to theories that make no sense in "Illness" and thus force what they call "care" "treatment", abuse and forcing to sell NL, the horrible and destructive effects of NL, moral violence in hospital environment)

After my mother came, she was asked to sign the hospitalization at the request of third parties (HDT). According to her, he was pressured into signing, pressured, misled, even forced. CHAMI lied to my parents by telling them that there is a judge of liberties who will rule and that I would get out in a few days or that I could maybe get out with the judge in 3 days (roughly like that). At the beginning of the interview, CHAMI makes a “sweet, kind” face, look and way of speaking (the same type of comedy she did with me), then after and at the end, she changes her tone and becomes firm and harsh, the same type of abrupt change and turn she did with me) ex: "I spent a lot of time with you" "I now have a job" (roughly) “ It would be better if you signed ”

By this last sentence that I underlined, CHAMI makes my parents think that if we do not sign the HDT, it will be worse for me in terms of rights and that they will be able to do what they want worse although with HDT and my parents would have less or no possibility of intervention and there will be loopholes in the law which would allow them to hospitalize me without HDT and they can take me hospitalized without HDT

This is what CHAMI made my parents believe by saying: “it would be better for you to sign”

RQ: before summoning my parents, the criminal who is with CHAMI told me “it will be “yes” anyway, the laws allow us to do so”.

After my mother came, we called my father who came some time later. According to my parents, they stayed with CHAMI for 4 hours , discussing and asking questions about the hospitalization. So they were hesitant to sign and didn't want to do it. During these 4 hours CHAMI pressured, pushed, lied, gave false information to force my mother to sign. Then at the end CHAMI says "I spent a lot of time with you" "I have work" (there, we can see that there is obvious pressure and they don't let the person think to make their choice) “It would be better if you signed” (With this sentence that I have underlined, we notice that CHAMI is forcing my parents to sign. She made my parents believe such and such. With this sentence, there is an indirect threat, There is thus a great opacity that it creates with the pressure and the lies and the lack of information. Our parents did not know “why we should sign”.

According to my parents after CHAMI said that, it forced them to sign, because they didn't know and because she made them believe such and such. According to them, in the end my father said to my mother: "they will bring him in in any case, if we sign it's better" pretty much. This is why they signed because CHAMI with its pressure and its opacity and lack of information, it made them believe that if they do not sign, it will be worse for me in terms of rights, prerogatives of parents and that it will be to the advantage of the hospital if they do not sign and that there are loopholes in the law which allow them to hospitalize me in the event that they do not sign.

After the nurse took me to the room, I stayed talking with S.HNID who accompanied me, they were stupid and idiotic discussions. S.HNID, as already said is someone "with whom we cannot negotiate” “brute” “stubborn”…He does not understand simple and obvious things that are said to him and persists in his false, erroneous and senseless information. While talking with S.HNID, these discussions in which I say that I cannot digest the hospitalization and that I do not accept it, CHAMI comes to us shouting: "we are faced with a dialogue of the deaf !! » what I consider to be aggression and moral violence. My father also considered it assault.

*

CHAMI spoke with my parents to push them and force them to sign in a room where I could not go or see them. Which I consider unfair and not correct. My parents may have considered it that way, which is certain, they criticized this way of acting of CHAMI and this last fact.

CHAMI often commits opaque, unfair, twisted and “not correct” and even abusive methods, mistreatment, disinformation. She is even a specialist in these bad methods. When my parents talk about her, ZHENG, or GALLET (head of department who will follow what CHAMI did), they say “we are with psychologists”. 9a means that they use what they have in knowledge and expertise in the psychology of people to use it against people and use bad, unfair methods, poor work, incompetence and abuse.

When I came out of the room I was put in and went down the hall to the waiting room (probably CHAMI was talking to my parents here), near the entrance there was the bad guy criminal, sitting near there, he brutally pressed a button (I think) then he looked a little violent, mean, dangerous then got up and went towards me saying in a violent tone, wicked, inhuman, criminal, jailer, dangerous “Go back to your room!” » and with his hand and his finger indicates the room.

RQ: this is the same person who said “it’s going to be yes anyway, the laws allow us to do so”

After saying “Go back to your room” he goes in my direction and that of the room with a criminal, nasty, cruel above all inhuman, violent dangerous…

I said something, I forgot, then he said to me in a false and hypocritical manner:

“What do you mean you don’t eat, you don’t sleep”

I answer: “It doesn’t matter”

By it doesn't matter, perhaps I meant:

1) That's my problem
2) Don't bother me, it doesn't matter
3) That it's relative and that the fact that "I don't eat, I don't sleep" is exaggerated by them in an illogical, nonsense, nonsense way that has neither head nor tail and that's it. is even a senseless, violent and unpredictable attack.

It's relative + for simpler "I eat well and I sleep, it's okay" + there may be this problem but I don't expect that (that's nonsense!) + there may be - be this evil but it is less serious and incomparable compared to that of hospitalization
It is that the NL and the hospitalization will confirm
I have already mentioned this idea
Anyway, back to the discussion with the corrupt barbarian
Him: “go back to your room”
Him: what do you mean, you don’t eat, you don’t sleep”
Me: “It doesn’t matter”
He responds with a false and hypocritical air
Him: What do you mean, it doesn’t matter”
Me: “…What can you do?”
Him: “we are going to act on the repercussions on you”
He says this with a hypocritical, cold, cruel, arrogant, haughty, mocking air.
Him: “We have already decided and discussed and it’s over)
He said it with a cold, hasty, arrogant, haughty and above all this time, contemptuous air.
Him: “Look, you’re going to cry! »
He said it pointing towards me, he said it with an air of extreme violence and extreme contempt, extreme coldness
Then he leaves
We notice the denial of the rights of others and the extreme violence and abuse of the human person in psychiatric settings. It is even cruelty, barbarity and pure violence
There is bad work, incompetence and workers who botch and want to do it quickly “we have already talked about”. We have already seen this with CHAMI and his replicas. This is also one of the characteristics of psychiatry and one of their characteristic bad methods, this botching, incompetence, bad work “in a hurry”, the easiest thing for them
RQ: (same thing for violence, the denial of rights which is their characteristics. As well as the cruelty, barbarism, the denial of the rights of the human being which comes with hospitalization and NL. This time, in their behavior, treatment of people
1) the hospital 2) the effect of the NL 3) = cruelty + barbarity + crime + denial of rights + effect of the NL = torture, horror, barbarity, cruelty, denial of rights
“…what can you do?” » speaking of real or relative external problems

- It's external and relative+ For simpler terms "I'm fine, I'm fine, there's no problem"+ maybe bad but they're rubbish and destructive and nonsense + there may be bad or problem but it is the least or incomparable compared to that of the HP and the NL, it is even relative and small and lesser even incomparable or even unreal and non-existent); It's worse
- Idea said several times and very repeated
- RQ: the cruel criminal barbarian is perhaps a nurse. He looks much older (+45 years old)
- PS: he also said another line to me during this discussion: “you want to rest, don’t you! »
- It’s not “Rest”. They are neither sleeping pills nor sedatives, they are NL, destructive which cuts off sleep, all rest (restless legs syndrome), all pleasure. Plus, I didn't need any products. I was doing well or even better before that.
- The cruel nurse, like the hospital structure, was trying to impose hospitalization, and to botch things: “do it in a hurry” to “get rid of this work?” »
- Quite simply, the hospital didn't even have their “way of helping” or “want to help me”. They were simply doing harm, doing a bad job that they impose on the person and on the person, incompetence and negligence and even wanted to destroy, harm and torture the person
- The cruel nurse also told me: “you weren’t the one who said “vulnerable” “naive” “weak””.
- I forgot to write down two lines from this cruel nurse. He said that one in a stressed tone, especially this time, authoritarian, harsh, violent, a little contemptuous.
- If I said that because I was misled, such as in a process where you have to say “handicap” or something along those lines to benefit from any advantages: but I didn't know. Later ZARZOUR will say “demeaning qualifiers” (something like that). But I didn't say it in this context, I said it in the context that I explained (error, approach, etc.)

- Quite simply, the HP and this cruel nurse said it to humiliate and attack me. They were incompetent, negligent, in violation.
- Then I'm told if I want to see my parents and if I want them to tell my parents something, I tell them to say "B" and I ask them to see my mother. They barely let us talk for a moment and told him to get out. Then, they take me to the service of GALLET and ZAENG (CHU 14 I think)
- Later (a few days or the next day perhaps, when my parents ask to take me out, then/and/or ask to see me, they claim that I did not want to see my parents, misinterpretation or interpret as they wish my will or/and the phrase “B” that I perhaps said to CHAMI They spoke in my place with my parents and <u>above all without informing me that they wanted to see me</u> : without informing me of that (. incompetence, incorrectness and even violation of my rights). A little later, it is me who asks to see my parents, which means that their interpretation is incorrect, and unfair, against my will or of the sentence "B" were false. There is opacity and negligence.
- When they take me to CHU 14, it's in a car with 2 nurses. Police behavior
- Then when they take me to the room at CHU 14, GALLET, accompanied by 2 or 3 nurses (thought police behavior)

  Names: Anne Sophie GALLET
  Monique ZHENG

  Then ZHENG comes and starts asking me a lot of questions. I was panicked, I was afraid, I didn't know what was happening or that this kind of horror existed. She asked me questions about what they called delusions.

  1) These ideas were either said by someone else
  2) Either I said that and someone else misled me into saying it.
  3) Either I said it as part of an idea for an approach, for which I was misled

When she asks me a lot of questions, I sometimes can't answer, maybe I stuttered or didn't speak but I remember answering her with

what they call "delusional ideas" in "more moderate" or “less delusional” to respond to their narrow-minded cosage by “delusional” or in the attempt to dodge them.

I think that they have always remained in their very narrow-minded cosage and that the responses go in the direction of this narrow-minded and insane and incompetent cosage in “delusional ideas”

There was a bombardment of senseless questions and/from their pseudo-scientific ideology of NONSENSE, ANYTHING, CRIMINAL RIGHTS VIOLATION

I don't remember her asking me about voices and hallucinations. Do you hear voices? Are you having hallucinations?

I remember clearly saying that I wasn't having that, and I remember that I never said that I was hallucinating. This question was also asked to me at reception by the first nurse .

I never said I heard voices or had hallucinations

In their report which I describe as a rag, they will invent and add that I hear voices and I have hallucinations .

Ditto for “s** ideas, they added it and invented it. Maybe ZHENG asked me this in his heavy questionnaire. But, I always remember answering that I didn't. For the rest, when I am asked this question, I answer that I do not have.

At the beginning, in the heavy and police questionnaire from a nurse at the CPOA, I answered “A1”, “A”

I remember that maybe (at) “A1”, “A” start with “no”

“A1”=”No…. » « A3+ 3no….

I answered ZHENG “No”

The atmosphere in this CHU 14 was a little gloomy and a little scary.

RQ: common point with neuroleptics which give a horrible, dark, gloomy and terrifying sensation.

Rq: point in common with the world of pseudo-scientific theories of NONSENSE, ANYTHING, which are bizarre, insane, dark, without head or tail.

That first day , I didn't yet know what was happening and I didn't have time to think about asking to call my parents. I don't know the effect of NL's horrible torture yet. But, I was afraid and I understood one

thing: that there are insane theories that they imposed to base themselves in order to impose this forced hospitalization: I did not understand why I was there nor by what right? And what is the meaning? They have insane motives for this unnecessary, senseless, destructive and illegitimate hospitalization and no reason whatsoever. I understood one thing: we must obey everything they impose as part of their crazy crazy theories.

Perhaps I understood something: it must be said that I am fine with their non-logic.

Perhaps I understood: that I must not tell them that I refuse this forced and unjust hospitalization.

I also understood the point: we must not tell them that their insane pseudo-scientific theories, whatever they are, are.

I also perhaps understood: one should not criticize the opinion of the “doctor” (they are nothing like a doctor)

I also perhaps understood: I have to show them that I am eating (I have to swallow the food they give to tell them that I am eating)

PS: I forgot to say that this Thursday was the first time I went to Sainte Anne and S.HNID took me there, then he signed the release (leaving against medical advice). When we left, the nurse, in addition to putting pressure on me by telling me to come back on Tuesday February 19, he lied to me and used devious methods by even telling me that I was going to make this appointment and then to go out. I even remember asking him how long will it last? Because I'm doing an internship in an accounting firm. He told me he doesn't know; that it could be before noon or it could be afternoon

We can say that the nurse lied to me and that he even promised me that I will make this appointment then go out and that they will check with me I don't know: it's harassment and 'abuse ; this 2nd meeting has no reason or place to exist.

In addition to expecting a simple appointment, above all I did not know the existence of HP and NL and all these horrors and hospitalization

When I was hospitalized without consent on Tuesday 02/19/2019, while I was for an appointment that I was given, I thought and reflected on something senseless and nonsense : it is a very abusive and unfair method: there is surprise. This method is known as “trap

summoning”. We tell someone to come then we lock them up, it's aggression and violence, abuse, a surprise

Rq: I was even told that they told S.HNID that if he does not return to the hospital, they will call the police on him. So, they asked a person to harass me, by threatening and putting pressure on them.

Rq: between Thursday and Tuesday the 19th, neither I nor my parents expected that there would be a hospitalization. We didn't know it.

S.HNID called my mother at night telling her that there is something serious. My father came from the country upon hearing this. I was in contact with my parents and we saw each other during these few days and we were in contact with S.HNID and we saw each other with him.

But, we didn't expect and we didn't know that there will be hospitalization. S.HNID committed misconduct and abuse.

PS: when CHAMI put pressure on my parents to make them sign the HDT, she used abusive and unfair backdoor methods, she told my parents. “he is consenting” when my parents told him that I was not consenting.

Culture of violation of rights, devious, unfair, abusive, deceptive methods, speaking in place and in the name of the person.

On Tuesday the 19th, when we were at CPOA, S.HNID told me: “tell them yes, I want to be hospitalized, that way you can go out whenever you want, because if you say no, they control you as they want .

S.GNID, who is a stupid person, gives inaccurate information, and comes from his limited and non-precise knowledge. In fact, they put me in hospital without consent. Worse still, they did everything for me in forced hospitalization, they put pressure on my parents. They even went so far as to say to my mother: “it is consent” while this forced hospitalization = the height of cynicism, of the culture of violation, of lies, of nonsense, of their non-logic.

Rq: it is perhaps true and perhaps I understood that we must not show resistance and we must play their game and tell them “yes” to what they want otherwise they will do worse, and this is what is happening

Rq: While we were at CPOA, I expressed and displayed a certain refusal and resistance to which they reacted with violence, but this refusal and resistance contained by S.HNID's stupid discussions.

It was only at the end that I stopped displaying this refusal. S.HNID told me that they will let me in no matter what we do, they will get me in and that it is better to say “ yes” or “stop showing this refusal. Then in the last moments at CPOA, CHAMI came and asked me if I was going to accept this hospitalization, I answered her without ever agreeing and without ever consenting: "yes", on the condition that it stays for a week (at about that). She lied by telling me "yes" (about that) She knew that I was going to stay longer, so she lied by knowing that it won't be a week.

Rq: to CPOA: (CHAMI was putting pressure and lies with my parents, she told them something along these lines: "but it's nothing, he's young, he'll get over it, what's more, there to the judges of liberties. In 3 days, he will be able to leave. There is the judge of liberties who will rule on the case every week and can take him out.

There, there is a very cynical minimization of something serious and destructive. There are roundabout and incorrect methods and incompetence and mediocrity.

Summit of mediocrity, cynicism, incompetence, abuse, violation. Everything is a lie.

RQ: When my parents asked to see me/or take me out, they left it without informing me that they wanted to visit me in the hospital. They lied and said it was me who requested this refusal. I never asked for my parents to be refused hospital visits. They spoke in my name and in my place and decided in my place and without informing me.

In their mediocrity and incompetence and cynicism, they misunderstood, misinterpreted or understood as they pleased, interpreted as they pleased my will and my words. Thus, they prevented contact with my parents in the first days of hospitalization, which is abuse and vulnerability. They took advantage of a situation to prevent visitation and contact with parents at the beginning. And, above all, they did not inform me or ask my opinion about this visit from my parents.

At CHU 14, I didn't understand what was happening, I was afraid on the 1st and 2nd day, I was in shock but I didn't yet think about reacting (contacting relatives), since I didn't I still didn't understand.

- When they wake up, they have a lot of (urinary) and blood tests
- They did analyzes on vitamins, magnesium
- They did analyzes on STDs

Rq: at CPOA with CHAMI when: I said “yes” but on condition one week” she responds carelessly “yes”

I tell him that I take a vitamin complex and fenugreek and I ask him if it's serious to stop them because in the hospital I don't have one. She tells me no and that it doesn't matter.

There we notice, that contrary to what they say about "s** ideas", I took care of vitamin deficiency and loss of appetite with healthy means which have a real positive effect (d 'after my experience and I believe that it is good without being a doctor).

This real and positive care was brutally stopped by their abusive and forced and unforeseen hospitalization, for instead their destructive theory under the pretext of “taking care of the person” and “that the person is not doing well” (in their destructive non-logic to them)

They were out to harm and destroy.

At CHU 14, they did a lot of analyzes on me, I don't know why. They gave me their EKG.

We ate 3 times a day (7 a.m. – 1 p.m. – 7 p.m.), maybe and sometimes a snack at 4 p.m.

The food seemed to be of poor quality and is said to be of poor quality and not good.

We were given medicine. I took them and said nothing, because they managed to impose that we obey them in everything.

I was given Risperdal (small dose 2mg perhaps on the first day) and Largactil (which I believe is one of the oldest and therefore most violent neuroleptics)

We give a neuroleptic and an anxiolytic (which may also be NL.

The next day, when I woke up, I went to see the nurses and told them that I wanted to leave the hospital. One of them told me: “It’s the “doctors” who decide. When the “doctors” came, GALLET came to my room with nurses (perhaps 3, which is an act of violence) and GALLET said to me: “you are here under duress”. I tell him that I

don't have any s**t ideas like they say and that there aren't these problems and that there are other problems. They don't want to hear or understand anything. Then GALLET said to me: “if you say, I want to go out, you are not going to go out”. I then kept quiet.

There we see the height of their culture of rights violation.

After that, they doubled the dose of RISPERDAL (to 4 mg perhaps) and perhaps also the anxiolytic (LARGACTIL) RISPERDAL: molecule=RISPERIDONE. Way of acting based on violence and the denial of the rights of the other and the dehumanization of the other and acting as if the human being is a piece of furniture, or a thing or the object or subject of their work and mediocre theories which make no sense and which are rubbish: we act neither for nor with the person but in the person, his body, and his own person as if he has no rights, human person but is a simple guinea pig or object of experiment and senseless theories, anything.

PS: at CPOA, CHAMI also lied to my parents by telling them: he will only stay one day and the judge of freedoms will check his case every day”

This is what CHAMI told my parents.

This is what my parents told me when I spoke to them about CHAMI. This is CHAMI's characteristic type of lie.

University Hospital 14:

Rq: In the hospital, I started having difficulty eating and even difficulty and discomfort when eating. Whereas before, I had an appetite and I ate in an almost normal and natural way in terms of my body and my appetite. At the hospital, I had horrible, indescribable difficulty and pain eating. It was something not normal, and not natural, and it was not relative, it was not relative, it was real and extreme and total and absolute evil.

At the hospital, I started to have restlessness in my legs (restless legs); which is a disturbing, unhealthy, horrible, torturous, bizarre, destructive effect. This is something not normal and not natural.

In the hospital, I started having real difficulty sleeping and poor quality sleep, and waking up very early. Whereas before, I slept well, natural and normal and correct in terms of the body and sleep hormones and sleep rhythm. In the hospital, it is a horrible, unhealthy, indescribable illness, beyond all measure, comparison, normality or naturalness. It's something not normal, not natural, not

relative, but it was real, total and absolute evil, destructive and torture.

I began to feel a horrible, dark unhappiness that I didn't understand. Before the hospital I didn't have that. In the hospital, I felt a nightmarish sensation, of horrible emptiness, loss of all sensation and receptivity and emotion, it was something not normal, not natural, not relative, but horrible, unhealthy, indescribable, beyond all measure or comparison. Absolute, real, total evil, destruction, torture.

PS: at CPOA, CHAMI, when she put pressure on my parents and misled them, she told them: "we're just going to do some analyzes on her one day and then there are the judges of freedom who rule every day on the cases” (about that)

She clearly lied and committed abuse and violation of rights.

CHAMI is someone who has no skills, quality of work, neither correct nor regulative, who uses abusive, fraudulent and misappropriated methods and botches the patients she treats as a machine , object or subject or furniture of her work very mediocre and corrupt. She only knows how to lie, surprise, abuse, botch, put in boxes in a few seconds.

Rq: at CHU 14, I am not informed of anything, nor why they are doing a certain procedure to me such as the electrocardiogram or blood and urine tests. We are never asked for authorization or our opinion on medical matters that concern us. They don't listen to us; they don't want to listen to anything, but just put in their boxes and note what goes in their boxes and note what goes in that direction. So, they do corrupt and harmful and very bad work and do not treat the person as if he were a human being who has feelings, rights and who must be informed out of respect, and requests regarding but we impose it on it without even informing it as if it were a piece of furniture or an object of study.

Example: I don't know that they are going to increase the medication, or why. I have never been told why they force me to take these “poison” medications. They don't sound like a doctor to me except in name.

At CHU 14, I went to lunch, I was already having real trouble eating and I probably wasn't feeling well because of their NL "medication". Then I felt something in my mouth that wasn't normal. I was sick. It was hard. When I put the food in my mouth, it was very difficult to

swallow. I also noticed that I had a lot of difficulty speaking. Then I discover that my jaw is deformed and my tongue is protruding out of my mouth uncontrollably. It was horrible, unhealthy, inhuman, torture, real torture, destruction. Their NL deforms the mouth and causes facial paralysis. I then tell “Dr” GAMLLET who is in the canteen what is happening to me (speaking of the deformed mouth). She tells me to go to the room and that the nurses will come and take care of it. I go to the bedroom. The wait was long, my face was distorted. I don't know how long I had to wait before the nurses showed up. It was long. It was even too long. I hurt everywhere. I was paralyzed because of the poison they injected me with and didn't care. They take their time to come. Then, after a long wait, alone in my room, crying internally over everything that is happening to me, the nurses come and inject me with the antidote for this dyskinesia in my jaw. They tell me to wait a bit for it to take effect. I wait a bit, then my jaw is back to normal. The nurse tells me: it's better!! »

There, we are at the peak of treating human beings like guinea pigs. We give him harmful substances without reason and which have no place to be and which serve no purpose and which destroy. Then, these substances cause the person to suffer unhealthy effects . And, after having caused these unhealthy effects to the person, we give them the antidote for this effect. In short, real torture for me. It's a crime.

An endless, horrible and unhealthy cycle of “medications”: medication then its corrector and so on.

Rq: with the RISPERDAL and the “anxiolytic” that they give, we were given a “corrector” to be able to have a bowel movement. An example of their corrupt and unhealthy approach to an endless and unhealthy cycle of “medications” and “correctors”.

RQ: for example, when we spoke to “Dr” Martinez about motor impatience (restless legs), she said “we can give “correctors”. Which constitutes one of their lies and their abusive and corrupt methods.

(this point has already been mentioned in the part reserved for the lies and abusive approaches of “psychiatrists” part II).

*Afterwards, they told me that they were going to replace LARGACTIL with TERCIAN. Once again, an abusive approach typical and characteristic of “psychiatrists” and their lies (mentioned in part II which talks about their lies)

I even think that TERCIAN (even if it does not cause this horrible dyskinesia), it remains a very strong neuroleptic which reinforces this malaise and these horrible, destructive, torturous effects already installed by RISPERDAL.

With RISPERDAL, TERCIAN, they give us something to be able to have a bowel movement (probably one of their “correctors” after having caused the difficulty in having a bowel movement as an unhealthy effect. I think maybe they were giving us calcium or some vitamin (vitamin D perhaps, and vitamin B12 that I was given when I left the hospital (calcium and vitamins are some of the things I don't think are harmful).

In addition to forced internment without consent, without any legitimacy, I don't know why I am interned and the hospitalization has no place or reason to exist (S.HNID took me + they directed the questionnaire towards what they have as boxes + what happened with CHAMI) + I don't know why these "medicines", nor what they do + these "medicines" are harmful and destructive + I feel their harmful effect and horrible and discomfort and torture + they cause very unhealthy and horrible effects like dyskinesia which is the deformation of the jaw and the tongue + then it is after that they come to give a corrector or an antidote, after having done all this damage unnecessarily, in a forced and brutal way, and sodomy and even harmful and destructive, the height of the violation of rights.

They mistreat patients, seek to have the upper hand, to intimidate, they misinform, they only forcibly intern in a sloppy and abusive manner and/or give harmful “medicines” such as NLs (and/or substances). similar to anxiolytics)) in a forced, inhumane, incompetent, sloppy and abusive manner without knowing anything about the patient or listening to him or informing him, they react in a brutal and violent way to the slightest refusal/or resistance and /or evocation of rights, they do everything without the person knowing….

When I said I want to go out, they told me: “if you say, I want to go out, you are not going to go out” 1 and they doubled the doses without informing me 2; very brutal, violent and inhumane mistreatment.

As soon as something goes wrong with their stuff (their boxes and their pseudo-x theories of NONSENSE and ANYTHING, and their ways of treating patients like furniture or guinea pigs or objects of their bad work and corrupt and theories…) they only give NL, or even

increase the doses and mistreat the patient and take advantage of it to support their abuse and violation.

They interpret as they please and distort the words and go so far as to make the patient say what he did not say, such that it fits into their boxes and such that they botch the patient and do a bad job and fulfill their reports and supports their abuse.

The nurses were locked in a room a lot of the time (especially in the morning) and the “doctors” were even more inaccessible. My parents told me that it is a technique that plays on the psychology of the person (patient and/or parents) that they, as psychiatrists, know how to use)

When my parents asked to visit me in the hospital and/or take me out (I think maybe they just asked to contact me), they stopped them without even informing me or asking me, nor offer me, and they claimed that I asked not to contact my parents (which is false as already explained; I never asked for this neither directly, nor indirectly, nor explicitly, nor implicitly)) thus depriving the person from the simple contact of relatives at the start of hospitalization.

When my parents asked to take me out the first time, they at the hospital were intimidated (according to my parents, they were a little scared because they know that my parents have the right to take me out of the hospital. They responded to my parents in an intimidated and/or stressed (under pressure) and/or stubborn manner (confrontation, standoff): your son is doing well, we are taking care of him, he is sleeping well, he is eating well.

Rq: “he sleeps well, he eats well, he is well = FALSE. At the Hospital, I didn't eat, I didn't sleep, I was horribly and terribly unwell and in an indescribable, horrible, disproportionate, real, total, absolute evil way. It's quite the opposite.

Before the hospital, I was going, eating, sleeping well (in fact, it is not essential that important to know if I was well before the hospital and/or I was relatively poorly but better than at the hospital). hospital; this question has no place, the main thing is that in the hospital, I was terribly bad in an incomparable, real, not relative, horrible way, destruction, torture, evil absolute) In fact, they forced us to say that “we are doing well”, in their own sense and their boxes and their pseudo-scientific theories, and if we do not do that, they will double the doses or mark a “symptom” so keep it longer. So, I try to show them the "I'm fine" in their "nonsense" and when

they ask me questions, I answer them like them. They forced me, when in reality, I am not doing well in the hospital, and in a horrible, indescribable, incomparable way, absolute evil, torture and destruction.

They forced me to eat directly or indirectly. They watched to see if we were eating or not and sometimes didn't say anything)

In fact, we had to show them that we were “eating” because in reality NL causes real severe anorexia and real difficulty eating, a loss of appetite, the desire and pleasure of eating and a heaviness and bodily discomfort when the body receives food, in addition to the general discomfort in the body and the mind, torture, impatience (legs without rest)... So, they only take the appearances that go into their nonsense and their abuses.

In addition to that, they went back and forth in our rooms at night (an inhuman surveillance and extreme and unthinkable barbarity) In reality, the NL cuts off sleep, diminishes it, disrupts it, makes it unhealthy, and worse still causes the impatience with sleep which is a peak of horror and torture and one of the effects of NL at its maximum. Which makes it obvious that I don't sleep well in the hospital. But in appearance and in their nonsense, I can't tell them the true effect of NL or what I really feel because they will hurt me more; (NLs are the cause of the problem and the only thing they know how to do when things aren't going well is double the doses). At night, in bed, I felt the need to move to alleviate this torture and respond to this need caused by the NL. And so I stay on the bed lying down while I sleep very little and very poorly and horribly and it's even torture; Add to that nightmares when I sleep.

This horrible sleep is a sleep of torture. The nocturnal impatience, with this horrible sleep; peak of torture

With nightmares, the height of torture

With the nurses coming and going, the height of torture

At night/or sometimes in the afternoon, we were injected in the thigh (or in the arm perhaps) because we remained too bedridden and therefore the blood did not circulate well (this is what we were told, but I don't trust them)

Surely, one of the effects of NL is that the blood circulates poorly in the body+ NL makes the person bedridden most of the time, as they cut off all vigor+ they, “doctors” and “nurses” force us to be

bedridden+ this unhealthy effect surely occurs. strengthens when you go to bed.

Once again (this time, the 3rd), they take the approach of unhealthy effect then “corrective”.

They do what they want with the patient, they act against their (patients) interests. They act for their own interests (the hospital, the labs, etc.). and destroy patients. They do what they want within the framework of their false pseudo-scientific theories which make no sense and which are rubbish, the framework of their casing, of their bad work, mediocrity, botching, indifference, abuse, violation of rights, considering patients as guinea pigs, furniture, objects of their work, theories and within the framework of their own interests

ZHENG

Shortly afterwards, I had an interview with ZHENG. She said to me: “Do you have anxiety, dark thoughts? “I tell her “No, I don’t” She does a directed and subjective questionnaire such that I play their game and I tell them what is wrong with their nonsense and that their care is good and that I am fine with it their “care”. But ? it's wrong ; their “care” is horror and destruction and torture and it is not care and treatment. In fact, I didn't have any “dark thoughts” before the hospital and the NL as they claim, plus I never said that.

RQ: when we talk about their increase in doses that they use as violence and threats on patients, it is knowing that the “medicines” are harmful, destructive, horror and torture, in addition to being useless and without any reason .

In the first three days of hospitalization, I received visits from S.HNID. Once, he brought documents on administrative information (the crazy story that he told me then imposed (already mentioned). Another time, he brought me a package of cakes that he bought maybe -be with my parents.

After eating a little, we left it to the nurses who ate it all.

I slept in the room, there was in the next bed in the room a 16 year old Pakistani (illegal) then it was a young Sudanese (illegal) then it was an older young man.

This structure targets vulnerable people. In addition, many had foreign origins. We notice systematic racism.

There were a lot of people in that hospital that were in the hospital for drug stuff.

I don't remember seeing someone with me whose tongue was sticking out of his mouth all the time. He was someone of perhaps Pakistani, Indian or Bangladeshi origin. (this is surely the effect of their unhealthy poisons. I remember seeing a black man (perhaps a black American) who was horribly compressed and stunned, probably by this poison.

Saint Anne and the hospitals only know how to intern and give NL without even thinking or seriously studying the cases. They give in large doses. Additionally, these NLs are harmful, destructive and torturous.

Shortly after my hospitalization (a few days later, 3 days, I remember), I asked the nurses to call my parents. They had their numbers. When I called them, I told them I want to leave the hospital. They told me to tell the nurses that I want to see my parents, because according to them, they have been prevented from visiting me. I asked my parents this. According to my parents, even after that, they had difficulty with the hospital coming to see me. The hospital pretended that I didn't want to see my parents. However, this is false. I never said I didn't want to see my parents. They wanted to isolate me to do what they wanted with me.

When my parents came, we talked and I told them we mainly talked about my desire to go out. When my parents came back, we gave them the keys to my apartment and other things… Since then, my parents have visited me in the hospital every day. They brought me some things (clothes, toothbrushes, snacks, etc.). At the hospital, it was poorly maintained. My parents took care of cleaning the shower, the toilets…

One day, it was a Monday, I expressed to my father, during a visit, my desire to go out. My father then went to see Dr. GALLET. I heard him scream. He asked to take me out, but they pretended not to hear his request. My parents' request was not heard and they refused to let me out. They remained in confrontation with my parents, thus violating my rights. Cynicism and behavior of thugs and not doctors.

They once again ignored parents' request to take me out. Since then GALLET doesn't even greet my father during visits. They spoke with my ZHENG parents, especially. Then, for the first time since my internment, following my parents' request, they gave me permission for just half an hour to go to the inner courtyard of the university hospital where patients could go and smoke. I spoke with my parents

emphasizing that I definitely want to get out of the hospital and that the hospital is horrible and bad. My parents were never convinced by this abusive and unfair hospitalization and wanted to get me out and agreed with me regarding my desire to be released and did everything for that. The next day, my father sent a message to his lawyer, Mr. William BOURDON: “My son is hospitalized without his consent where there are no Westerners.” My father, having noticed that many of the internees are of immigrant origin. It's true that there are a lot of illegal immigrants, foreigners, black people, which proves racism and an attack on vulnerable people, but he had three blond people, one of whom was 24 years old, who was in the cinema, and which apparently involved drugs. My parents spoke with the patients. My father gave them cigarettes. We heard the story of the Pakistani migrant and the Sudanese migrant who were in the room with me.

One day, a nurse came to bring me a piece of paper for me to sign. I believe that this document contains the decision of the released judge with “Dr” GALLET for me to stay in the hospital for an additional time, two more months. GALLET followed what was done at CPOA and CHAMMI, and the judge of freedoms is only a formality to pass GALLET's decision. GALLET’s “medical certificate” is just a formality. The HDT is only a formality, in addition to which they imposed on my parents, to provide a framework for the abusive hospitalization decided by CHAMI. As I said before, they put pressure on my parents, CHAMI lied and misled them.

Rq: IMPORTANT

The fact that CHAMI lied and used fraudulent methods to obtain HDT does not surprise me.

1) Before her, it was the nurse who was with her who had summoned me for Tuesday 02/19/19 who had told me and even mentioned and specified that I would come back that day then I would go out and that "they don't know not when it ends after or before noon” So this one lied
2) CHAMI is a dishonest, disloyal person, who lies all the time and who is not correct a) she repeats in a very direct way and with what I say b) she knows how to pretend to be “sweet” , "nice" then suddenly she becomes "stressed" and "busy" and puts psychological pressure c) she decides on internment after a 20 or 30 second consultation d) she lied about "I'm going out after the analyses" e) she lied about the judge of liberties who rules

every day f) she even exercised psychological violence towards my parents and me g) she told me “GO! Come on ! otherwise we will start all over again”, the height of corruption, mediocrity, abuse, botching and mistreatment.

3) After a few days, I was just given a document which contains the decision of the “judge of freedoms” to keep me for a considerable time, based on GALLET’s decision and his “medical certificate”
4) In fact, I think there is no judge of freedoms or anything. It's just a formality.
5) CHAMI had said “we do the analyzes and he comes out, it’s just for one day, then there is the judge of freedoms who will rule every day”
6) The hospital institution itself is based on abuse and violation and destruction.
7) I believe that these elements are proof of the truth of my parents' version of what happened at CPOA with CHAMI.

My parents learned about the document I received. It was after that that my father went to see GALLET and shouted at her. The next day, he had to bring a packet of cakes to GALLET and the nurses to prevent them from turning their nastiness on me.

ZHENG

I remember having a little interview with ZHENG. I think she knows how to use psychological flaws. (Common point with CHAMI and GALLET). (For my parents, they are psychologists “concerning their knowledge of manipulating and relying on the faults and weaknesses of the person in front of them ZHENG knows how to put on the false face of “sweet”, “nice” while in reality, she psychologically puts the other person in an awkward, disadvantaged, surrounded, pressured position during these discussions (a point in common with CHAMI, according to my parents, she seems nice, less worse than GALLET).

We were able to go to the exterior garden of Sainte-Anne with my parents (I think one day after going to the interior courtyard). I told them all the time that I wanted to get out and that the hospital is horrible and bad my parents agreed with me and did everything to get me out.

My parents spoke with me about vitamin, magnesium and other deficiencies and the diet that can help me in this regard.

They also noticed relative hygiene in my eyes. My parents therefore wanted to take care of me in terms of eye hygiene, vitamin deficiencies and in terms of diet, dryness of the skin of the face, but the hospital was an obstacle and they imposed their " “false care” under unnecessary and destructive duress. There weren't even good hygiene materials and products in the hospital. My parents noticed that I had impatiens (restless legs) that were unhealthy and horrible and hugely embarrassing. My parents noticed that I had painful watering in my eyes, and also noticed that my lips were horribly chapped, which bothered me greatly. This is all the effect of NL.

My parents negotiated every day with the hospital to get me out of isolation. I was then allowed to go into the garden and the park refreshment bar. I went with my parents to the garden and we stayed in the park refreshment bar. I always talked to them about my desire to leave the hospital. The negative effects of neuroleptics were mentioned. In short, for the moment, my parents and I knew perfectly well the destructive effects of neuroleptics. I began to feel something abnormal and horrible related to the “treatment” imposed by the hospital; I knew it was linked to the neuroleptic; when I had the impatience with MARTINEZ, I understood that it was due to ABILIFY and when I had dyskinesia, I knew that it was caused by the destructive and useless “treatments”. and which I didn't need). My parents began to notice the serious effects of neuroleptics on my body and were completely against hospitalization.

When we went to the garden refreshment bar, we noticed that the cases were extreme cases, there were people who were probably taking drugs. I had nothing to do with these people. Others were completely depressed because of the neuroleptics. It was human misery. Once, I received a visit from a cousin in the refreshment bar.

At the hospital, they imposed and/or offered us bogus activities: TV, billiards, ping-pong, board games, watching a film and reviewing it, going shopping with “nurses”, making bodily expressions, prepare something to eat.

Rq 1:9a makes no sense to do “activities” when all receptivity or sensation is cut off. It's obvious ; but these “criminals” who come out of nowhere have their therapy of nonsense and I know what.

Rq 2: their activities are so worthless and bogus and serve no purpose, that I believe they use them to ridicule the patient as he is considered "sick" and/or little by little they see if the patient " knows how to make social combinations” or whatever (in short, nonsense). These activities are part of their senseless therapy based on violence, surveillance, control, humiliation, confinement, questionnaires and stifling interviews which are a real thought police, the "if you say you you are not “sick”, it is a revealing symptom”…

At the hospital, they force us to tell them that their hospitalization and their NL are such and such and that “we are fine with the medications” because if we say that they cause such and such a destructive effect, which is the truth , there is a risk that they will increase the dose of already harmful and destructive products and keep you hospitalized for longer . It was horrible, unfair, torturous, senseless, harmful, destructive...

When they do their interviews and their questionnaires, short and infrequent, but heavy and stifling; They have the advantage that we tell them what is wrong with their nonsense and they don't let us say that neuroleptics are harmful and destructive. They are thought police + a real moral violence + a suffocation and hemming in of morals and thoughts + the “if you are in denial of the “disease” is one more symptom of the “disease”. At the slightest resistance or refusal, they double the doses or keep you in for even longer. They decide when we go out. They decide your life or rather they block your life, like they block the receptors.

Rq: the windows in CHU 14, as well as in the other department, pavilion K8, barely open. They are blocked, resulting in poor ventilation and the atmosphere is even heavier.

I don't believe in the differentiation between neuroleptic and "anxiolytic". We have already mentioned the horrible effect of LARGACTIL, dyskinesia in the jaw + the latter as well as TERCIAN, I think they reinforce the horrible effects of NL.

I think that “anxiolytics” are auxiliaries to NL, and are even NL. I even read that LARGACTIL is one of the oldest NLs, if not the oldest, then the very first.

The day after this quarrel between my father and Dr. GALLET, my father brought a lawyer back with him. Despite this, the criminals in the hospital remained in their abuse, in the confrontation, in the violence, in the violation of rights, in the

aggression, the non-respect of rights…. According to my parents, this lawyer didn't change much.
According to my parents, ZHENG is less aggressive than GALLET, who was confrontational and gradually represented a tougher face while ZHENG represented a more “moderate” face. ZHENG therefore spoke for GALLET. ZAHENG spoke with my parents and told them that “hospital” and “care” are such and such. My parents did not accept hospitalization and wanted to take me out.
So the fact that we presented a lawyer did nothing with these criminals. Worse still, the hospital did not send the summons to the judge of liberties in time.
IMPORTANT: the hospital sent my parents the invitation to the session with the judge of liberty late. They did it, perhaps on purpose, which does not surprise me on the part of these criminals. The hospital could easily send the letter on time so that my parents could attend the session with the judge of liberty and defend me. NO. They sent it after the fact; once the session is over. ; what constitutes abuse + non-respect of rights + violation of rights + abusive, circuitous, unfair methods + bad work. .

These criminals use all abusive, circuitous, unfair, corrupt and mediocre means to violate rights and harm people. Actual intent to harm.
The day after the lawyer's visit, GALLET and ZHENG began to become more flexible. They called me from my room to do an interview with them in GALLET's office. GALLET, told me that I am going to see the judge of liberties and that they will make me change flag. I ask GALLET if I can go out soon, she tells me no. I then asked him how much more I was going to stay, and if it was possible in a week. I remember well, she answered “no” and that it was about two or three weeks away. I think ZHENG talked to me about something and asked me a question about someone, but I forgot.
Rq: I was able to ask the question about when I am going to go out
Rq: they didn't give me their questionnaire and thought police interview, moral self-determination, where they force me to say "I'm fine" in their own nonsense.

Rq: they renounced their decision which they showed me in the document where I signed in which they say that they will keep me for such a time.
These criminals are starting to decide to release me, the situation is starting to unravel, the criminals are almost no longer in the confrontation and the harshness and aggressiveness that they were in.
My father told me that ZHENG called him and said “your son is fine”. She changes her speech and comments with my parents.
When my parents visited, they discussed with her the next temporary outing about who can stay with me, when I go out for a permanent outing.
I even asked ZHENG myself when I could go out. She gave me the look of someone who didn't like the question and said, "Is it over?" »
I went to the judge of liberties, without my parents, since the summons did not reach them. There was a “lawyer”, appointed by the court, who told me “but you know very well that SAINT ANNE is psychiatric” she showed me the document of these criminals which marks as “symptom”: “s* ideas *, “weight loss”, “high-pitched voice”, “does not make eye contact”, “slowing down”, “delusional ideas”... “frequently asks to go out”
Rq: I didn't know that SAINT ANNE is a psychiatric patient and it was someone, S.HNID, who took me without me really wanting to.
Rq: already “symptom” and “disease”, it’s nonsense and nonsense. In addition to this , these “symptoms” largely concern communication difficulties and particularities. Concerning “delusional ideas” we are faced with a thought police and an attack on freedoms and a moral confinement, in addition as already explained.
It was either someone else who said it 1) or someone else told me to say them 2) or I said it as part of a process that had no not her place in the hospital and someone else misled me about her 3) either I say it without being serious and believing it 4) or they are making fun of me and not taken seriously, so cased "delusion", otherwise we are free from these ideas and I refuse this thought police as well as their intrusion into the person's life and the fact that they look for elements in the person's life, these comments, and even his thoughts and even his person 6) concerning "s** ideas", I didn't have that and I

never said that, since I took care of myself, went to classes, went to training, took vitamins and food supplements. Concerning weight loss, there was nothing before the hospital, it was relative, unreal, even non-existent. They don't know my weight before the hospital, and I don't remember them weighing me at the hospital. With Neuroleptics, it’s anorexia and weight loss that is real, true, total, absolute evil. Concerning my desire to leave, it is the most normal and they prevented me from expressing it.
There is neither “disease”, nor “symptom” so there is no “denial is another symptom” = ANYTHING, NONSENSE, CRIME, violence.
When I went to see this “judge of liberties”, there was this man and a woman with him (maybe if I remember) and then this “lawyer”. This man who I suppose represents “the judge of liberty” asked me if I want to leave, I replied: “I want to stay but lift the constraint”. (or something like that). They tell me then, it's the lawyer, maybe I should say whether or not I want to stay or not. I think they talked a little together, and asked a few questions perhaps, but the interview was short and hurried. I couldn't defend myself. The lawyer said nothing to defend me. My parents were not informed that that day there was a judge of liberties to rule on my case, so they did not come to defend me. I was alone in the ring. Alone faced with a simulacrum of respected case studies and freedoms. The height of hypocrisy and disrespect for rights. OF ABUSE. The judge decided to keep me in the hospital.
Rq: I replied “I want to stay but lift the constraint, it’s because GALLET told me “if you say “I want to leave”, you are not going to leave”
Rq: the court-appointed “lawyer” was against me and did not defend me.
Rq: I was summoned to the session of the judge of liberties, that same morning. So I could not or had the time to call my parents or the lawyer so that they could accompany me, support me.” We infer that these were their abusive methods to do with the patient what they wanted and harm his moral and physical health. A case of abuse, violation of basic rights. I must also remember that they intentionally sent the summons to my parents late, after the judge had ruled on my fate.
PS: When I first called my parents and asked the nurses to allow them to visit me, they did not allow them to visit me that

day, claiming that I refused to see them. The next day they asked me if I wanted to see my parents? "I said 'yes.' Since then, my parents visited me every day.
PS: my parents had an interview with ZHENG and GALLET. They talked about “treatments”. They told my parents that “your son is fine” Hypocrite
PS: when my father saw the criminals' decision, he went to see GALLET and asked her to get me out immediately and he started shouting at her. Since then, GALLET has refused to see my parents, and cloistered himself in his office. “Doctors” who even refuse dialogue and contact with the patient's parents, isn't that an abuse? GALLET, did not like it when people were against her abusive decisions or when people shouted at her. In short, GALLET has since become inaccessible to my parents (psychological technique of these criminal “psychiatrists”.
According to my parents, when the lawyer came, he was able to contact GALLET, but he was shy with her and did not mention my right to go out.
The day after this intercalation with GALLET, my parents were afraid of reprisals against me and tried to get closer to the nurses by bringing them cakes and dates. According to my parents, who no longer had confidence in this system: “you never know what they are capable of doing”
Following this intercalation with GALLET asking him to get me out and as well as the visit of the lawyer, these criminals began to give me more freedoms. (Change of flag, temporary exit and prepare for a definitive exit).
According to my parents, the criminals understood or felt that things were going to get complicated for them and that we were going to cause them problems because of their abuse. According to my parents, GALLET decided to send me to the HAUSEUX pavilion to get rid of me and let HAUSEUX decide on my release.
When I was finally able to go out temporarily for the first time, I went to my apartment with my parents. During this time, I didn't understand what was happening in my body, nor the effect of NL. It was the first time I was free from the pressure of the hospital. So that was the first one I stopped thinking about and focusing on. I then noticed that I had no pleasure when I got under the covers of my bed. Worse still, I felt horrible discomfort in my body, mental and physical torture, a horrible emptiness.

Then, we returned to the hospital and I went to pavilion k, HAUSSEUX pavilion. In this pavilion, the building, the walls, the windows were old, which gave it a more gloomy and even darker atmosphere. But what is good about pavilion K is that it was less worse than the previous one (it was open, and there was no longer any confinement like at CHU 14). There was less surveillance, the "doctors" were less harsh, more flexible, less in the police spirit and less in the containment of thought and less in the use of psychological weaknesses and less in deception, less in overdose of “medications”.
In short, we can say that the criminals are retreating
Pierre Alain HAUSEUX
Myriam ZARZOUR
PS: ZHENG, GALLET and especially CHAMI didn't want to hear anything of what my parents were telling them. They were in denial of the truth. My parents tried to explain to them that what they called “hallucinations” were really my experience.
In Pavilion K, there was the first someone from Eastern Europe, then I remained alone in the room, then there was the young Sudanese who was with me in University Hospital 14. In this pavilion , just like at CHU 14, the patients were all crowded, under the effect of neuroleptics. There was even a Sudanese man, who was older than the other who was completely exhausted. They force-fed him drugs. I understood this because I saw myself in him when I was given the medicine. There was also a young woman, perhaps French. According to my parents, she wasn't a patient, but she told them she was a patient. The young Pakistani, who said he was 16, but according to my mother must have been older; was taken to the ward, then they quickly took him out, I don't know if it was to transfer him to another ward, or permanently, that's what explains the injection that was given to him. I remember they gave him an injection. There was also at CHU 14, someone of Tunisian origin who took him out and whom I saw at the CMP. The Algerian who was at CHU 14 came out... there are other cases that I saw leave... But the case that shocked the most was that of the black man, who was extremely stunned, completely crushed and knocked out. It was a horrible thing. It looks like he was lobotomized. I remember the case of the Indian, it was perhaps a Pakistani or Sudanese whose tongue was hanging out because of the neuroleptics and who they let out in this state without even giving him the antidote.

In this pavilion K, a “nurse” took the patients to do some “activities” outside. As at CHU 14, the “nurses” and “doctors” were in a room where they locked themselves and were therefore difficult to access, but there was less surveillance.
The effects and after-effects of the neuroleptics they fed my body with were such that I could hardly eat. I ate a little for breakfast and a few bites for lunch and dinner. There was a cleaning lady who noticed this and exclaimed: “But the gentleman doesn’t eat!” ". But, as already said, what is less worse in this ward is that there was less surveillance and that they did not threaten to increase the dose when they upset them.
The truth, as already said, is that neuroleptics really and completely destroy and cut off the appetite, the desire and the pleasure of eating. They make the body feel bad when we eat and we feel less thirsty, which is extremely dangerous.
In the room of Pavilion K, where the walls are so old and the windows so old that it gives a gloomy and dark appearance, a nurse came every night and gave us the big blue pill, TERCIAN, I think.
Sleep was horrible, interrupted, diminished, shallow with nightmares and impatience. It was a horror. A torture. I was terribly impatient, I was experiencing real uneasiness and a horrible emptiness, and time passed slowly and heavily.
Rq: I believe that impatience is both physical and mental (linked to the horrible slowness of time). In short, destructive effects on physical and mental health caused by these neuroleptics.
Rq: Once, my parents gave a patient a cigarette and talked with him. He mentioned this slowness of time that I was talking about “Here, time doesn’t pass,” he said
A real horror, a torture.
Rq: at CHU 14, as in pavilion K, I stood almost all the time in front of the big clock in the corridor, waiting for my parents.
At the beginning, upon my arrival in this pavilion, I had an interview with the “doctor” HAUSEUX, he asked me some banal questions, about my studies, what was I studying and where I I was studying. He asked me if my parents' visit was comforting. I told him Yes. He asked me other questions related to my hospitalization, such as “s**t ideas). I told him I didn't have any.
I forgot what he asked me like other questions.

ZHENG and GALLET are in the: you must say what goes in our direction and say that everything is fine according to our vision and we will verify all of this in your behavior and in your thinking, otherwise we will conclude that it is a symptom of more ". “if you deny the disease, it’s another symptom.” “in reality it is not a thought police, a surrounding of questions, a moral surrounding, a surrounding of thought itself, a surrounding within the framework of what they call “delusional ideas”.
HAUSEUX, was not at all in this approach or at least, he was much less so. He asked simple, banal questions, perhaps many more questions. In short, he was not under psychological pressure unlike CHAMI, CPOA, GALLET, ZHENG.
HAUSEUX had an interview with my parents, just after the one he had with me. HAUSSEUX spoke less, listened more than the latter. He listened and was not in denial, unlike other criminals. He was simpler and was almost non-confrontational. According to my parents, he is much better than other criminals. My parents spoke with him about the episode with CHAMI at CPOA where she lied to them by saying that I would come out quickly in a day and that there was the judge of liberties who rules on cases every day, that they would just do some analysis on me and then send me out. They also spoke with him about taking ABILIFY 5mg in one week which I stop. They also mentioned some details about me.
He stayed listening to my parents. Then, he made the decision to prepare an outing for next week. My parents agreed to leave for good in a week. They told me that with him, it's clear and that he's not like the other criminals and that I could next week. Finally, I will be able to get out of this horrible, nightmarish place.
I think that afterward, my parents had little discussions with HAUSSEUX. The latter also lightened the treatment. RISPERDAL was reduced from 4 to 2 mg.
HAUSSEUX was more flexible than the other criminals, perhaps more human than the other tough criminals. He was much more attentive.
According to my parents, HAUSEUX understood that there was abuse against me and that I had nothing to do in the hospital, but he could not make the decision overnight to release me, a decision which goes against the approach of the other

criminals, which perhaps would put him in confrontation with them, that's why he kept me for another week.
I had a short interview with ZARZOUR and a man who represented I don't know what structure for young people and linked to the hospital. The latter asked me a lot of delicate questions, but not like CHAMI, GALLET and ZHENG.
I tried to dodge his embarrassing questions, so I had to say "less crazy" things and since there is ZARZOUR, that is perhaps why we find in the Torchenesque report, in the part which concerns Pavilion K: “delusional ideas present, but in less intensity” (something like that). When in fact, this comment was unnecessary.
On Friday, I was waiting for my parents who were supposed to come at 11 a.m. They came, and I went back to my apartment. Finally, I was able to have a weekend away from the hospital and soon, I would be able to be discharged for good.
That's the good news. This was the only good news, because I felt more and more the horrible effects of the neuroleptics. And, as I did not have much knowledge of their disastrous effects, neuroleptics make you lose all desire, all will to act and react, I then continued to take the poison that they gave me and I took with MOUICOL to be able to have a bowel movement. I was, as if stunned by neuroleptics, I walked and moved very, very slowly. I was impatient. It happened to me to lose some control with impatience. I could no longer sit down for more than a minute, I could no longer go to a restaurant with my parents, or go to the cinema. I had even lost the ability to sneeze (basic need)
In the interview that my parents had with HAUSEUX at Pavilion K, they told him that my hospitalization was senseless: how did I come of my own free will and then I found myself forced to be hospitalized and interned under duress

1) Technically, this is nonsense. A person who comes on their own, then refuses to be hospitalized
2) His hospitalization is nonsense, not correct, unfair
3) On top of that, it wasn't even me who came "on my own" (even if apparently, that's it) It was S.HNID, who took me without me really wanting to , he imposed this without me really wanting it, which makes it rationally and technically even more nonsense, not correct, unfair and unjust and illegitimate.

4) My parents also discussed with him some of the effects of NL, the slowed gait, the stunned stunned state, the impatience, which are the apparent effects of NL.

At that time, I had not yet explained to my parents all the less apparent effects of NL.
What my parents said to HAUSEUX surely prompted him to lighten the “treatment” and send me out after a week.
On Monday, I returned to Pavilion K, I was accompanied by my parents. HAUE UX was absent today. So my parents were going to have an interview with ZARZOUR.
ZARZOUR announces the decision to them (probably with HASEUX): “we will lift the constraint”. Finally, I'm going to leave this nightmarish and horrible hospital!
I think she asked me how I felt compared to before the hospital, my parents replied: “He feels like a different person! » ZARZOUR may have noticed the impatience, since I couldn't sit down and was pacing back and forth in the office, caused by the neuroleptics.
My parents spoke with her about the slow and horrible “gait” and the dazed and stunned state I was in because of the neuroleptics.
She replied cynically: “Yes, we noticed that he has a slight slowdown.” To which my father replied: “But my son has always been a restless child. When I was going out with him, I couldn’t walk with him because he walked so fast”
“But your father is old, he walks slowly”

“ Now, it's him who can't walk with me and who walks far behind me” because my gait and my movements were so slow and I was so stunned and stunned by the neuroleptics.

Rq: here ZARZOUR and psychologists in general are saying something senseless and nonsense. Perhaps it was out of ignorance, or perhaps out of cynicism. In addition, their ignorance and/or cynicism was rife with pseudo-science of ANYTHING, NONSENSE. Crime

Rq 2: in fact as soon as I entered the hospital, I was on neuroleptics. So how can they afford to say “notice”

ANYTHING, NONSENSE, without head or tail.

I don't even know what they're talking about

Then, they talked a little with ZARZOUR, then ZARZOUR said to me: “you are leaving the hospital”. Then, I think I collected some things, then we went to a room linked to the administration of SAINT-ANNE. I think we were given the address of the CMP at 15th.

I believe that, she gave us “prescriptions” prescribing high dose ABILIFY 20 mg, I believe, and MOUICOL. I think she told me to come back for the injection in Pavilion K.

As the neuroleptics made me lose all will, all desire, all motivation, all decision, all strength and health, I could not refuse the injection and I remained passive without doing anything and I took the injection + the shock and abuse, the threats linked to the hospital + my parents do not have complete knowledge about neuroleptics + the criminals imposed on my parents all their talk about “their theories of “disease”, “that I was having problems and that I was not doing well, and that if I stopped the injection, there was a risk of a serious relapse. It was therefore an indirect threat of risk of re-hospitalization “V++ LA D2SINFORMATION. All these circumstances meant that I took the injection without my wanting or consenting to it (even my parents were not for this injection)

Injection indirectly imposed and therefore forced even outside the hospital.

CRIME + VIOLATION OF RIGHTS + ABUSE + CRUELTY + especially BARBARISM, CRUELTY OF NEUROLEPTICS

In the first days of my release from the hospital, I took the ABILIFY depot injection at 400 mg + ABILIFY oral 20 mg (maybe) = TERCIAN.

high dose injectable + high dose oral .

Rq: there is 300 mg, but they intentionally gave a high dose, that of 400 mg, an unjustified dose. OF CRUELTY.

Rq: MARTINEZ only gave 5mg and it was already hell. The hospital prescribed quadruple what DR MARTINEZ prescribed + TERCIAN.

5 mg of ABILIFY causes strong impatience, which is synonymous with torture. Let's imagine this whole dose: 5 * 4 + injection of 400 (large dose) + TERCIAN

ABILIFY, molecule name: Aripizole

Rq: even if ABILIFY is less “strong” than RISPERDAL and therefore less horrible effects, it also remains a destructive and torturous poison, already explained.

Rq: in the TERCIAN instructions, we notice that it is in the same uses as neuroleptics, the same “official” effects (do not talk about the real effects and all the effects) in the theme as neuroleptics, where the questioning of the differentiation of neuroleptics with anxiolytics, already mentioned = the effects which resemble + horrible effects increased by TERCIAN

Large dose injection + large dose oral + TERCIAN = HORROR, CRIME, BARBARISM, MADNESS, guinea pig treatment.

When we talked with my father about the dose (max injection + oral max + TERCIAN), he said they are crazy .

If there is a “madman” or “a sick person” in history, it is “the psychiatrists”, criminal, and barbaric and cruel and inhuman.

With this dose, at the start of my release, it was really horrible: nocturnal restlessness in bed + very short, broken, very weak sleep + nightmares + very strong restlessness + very strong mental and physical discomfort = very difficult walking slowed down + a very stunned and stupefied state + no longer being able to sneeze = a lot of difficulties at the bodily and physiological level + a state of maximum horrible and nightmarish emptiness...

In short, all the horrible effects of neuroleptics at their maximum and torture at its maximum.

In short, it was almost like what I felt in the hospital.

Rq: here, we notice and we can confirm that ABILIFY (Aripiprozole) is a product not really very different from other neuroleptics, it is almost the same thing (even if it is a little less worse).

Rq: In the hospital, we give RISPERDAL and at the CMP, ABILIFY; perhaps under surveillance in the hospital, we give them the strongest things in high doses, such as RISPERDAL and LARGACTIC

At the start of my release, I had interviews with ZARZOUR, I was accompanied by my parents. I think ZARZOUR was asking a lot of questions. According to my parents, these were police methods. She even asked very personal questions. These questions were a horror to me, just like CHAMI, ZHENG and GALLET.

During this interview, I remember my father speaking to her in a raised tone: "Is there anything he can do while he is in this zombie state." Can he study in this state? He can't do anything; I prefer him “sick” than like that. » ZARZOUR remained impassive, then giving

him a bad look, making his eyes open wide, and replied weakly: he will soon get used to it, and the dose will be adjusted gradually.

Indeed, I was incomparably better before the neuroleptics. With neuroleptics, I was physically and mentally ill. I would even say that the effect of neuroleptics is worse and beyond the usual, natural illnesses that we know. It's beyond comprehension. It's beyond anything we can imagine. ZARZOUR, minimized the disastrous effects of neuroleptics on humans. It was cynical, inhumane. Denial of the truth. Lies become institutionalized.

Lies. Repeated and institutionalized lies:

1) How will the effects of neuroleptics go away over time? It is nonsense.
2) How can one get used to the devastating effects of neuroleptics. It is nonsense. There are people who have committed suicide because of neuroleptics. You can't get used to neuroleptics.

My father asked ZARZOUR to no longer prescribe me the injectable, which she refused. My father insisted, arguing that I could not continue to live lobotomized. The discussion is tight. She uses disinformation and manipulation, making my parents believe worse patterns without the neuroleptics.

At the end of this discussion, ZARZOUR decides to lower the dose a little and prescribes me half the dose, I believe, namely ABILIFY at 10 mg.

Before leaving, my father said to him: did we really have to bombard him with “medication” like that? ZARZOUR told him: “he was symptomatic”

Rq: When I left the hospital, there were no more restrictions regarding the injection. There was no longer any control regarding oral intake, since I was at home. But, as already explained, I continued to follow the CMP's instructions for two months after my release because I was under their influence, their harassment, warnings and I no longer had any willpower.

During the next interview with ZARZOUR, I came with my parents. They talked with her a little, then she asked them to leave me alone with her without them. During the interviews, I moved back and forth a lot, because of impatience, something she must have noticed, but she didn't say anything. She started asking about how I felt after the

hospital and the effects of the neuroleptics. I told him about the impatience, specifying that I could no longer sit down. “my legs move; I can't sit down anymore. I can't control my legs."

With no reaction from her, she replied: “What else? »

I answer him: “I no longer feel any pleasure. »

She replies to me in an arrogant manner: And first of all, you have pleasures!

Rq: a question, either stupid or cynical. This is a question, which medically and rationally has no reason to be, because it is obvious that, being in a normal and natural state, I experienced sensations and pleasures. Neuroleptics, being dopamine blocking factors, block all sensations, all emotions and therefore all pleasure. Neuroleptics take away your quality as a human being, your quality as a living being. You are nothing more than an object. Even animals smell fear, joy, herbs, plants too. With neuroleptics, we become nothing, less than nothing. It is horror, torture, barbarity, cruelty, a crime against humanity.

I answer him: “sleep”

She answers me: “and what? »

I answer him: “eat”

Her: “and what”

I play "

Her: “play what”

Rq: Stupid questions that reflect either stupidity or cynicism and denial of the truth.

She also asked me: “GALLET, do you remember her?” » “yes” “she noticed a slowdown”

I responded spontaneously: “I have never been like that, now I am slow in everything.

I don't know what GALLET could have noticed, and how she could have noticed or observed anything, because in the hospital, I was from the first days, on high-dose neuroleptics. .

This only confirms that CHAMI sent me to the GALLET pavilion to make me their guinea pig. GALLET only confirmed CHAMI's report, a denial of reality, to intern me by manipulating the judge of freedoms

by invoking untrue things in order to decide on my forced hospitalization.

To summarize and make it simpler, CHAMI decided on my hospitalization in the most abusive, corrupt, mediocre, circuitous way... then GALLET only followed the procedure and the judge of freedoms only ratified the decision already taken from the start by CHAMI. A formal, grotesque ballet to confirm a decision taken from the start, even depriving me of the means to defend myself.

In conclusion, CHAMI, out of obstinacy, perhaps out of sadism, whatever, decides to have me hospitalized and the entire structure of the hospital follows her.

In short, let's return to the dialogue with ZARZOUR. (I opened this parenthesis concerning GALLET and CHAMI to demonstrate how the decisions are ratified by the hospital structures, which due to the workload, rush their tasks and do not care about the consequences that this has on the life of the 'To be human.

She also asks me “if I still think about a conspiracy”. I answer her, as she wants: “no”. But who ever talked about conspiracy, if not S.HNID. Because of a word that I never said at the CPOA or at the hospital, they think I'm delirious and hallucinating and they hospitalize me.

She also asked me a question about “s**t ideas” to which I answered “no”.

Note: I have never had any s**t ideas. I never said that I had suicidal thoughts either at the CPOA or in the hospital. I don't know where and how they concluded this. Before my hospitalization, I took care of myself. I saw my attending physician, Marc BELLAICHE. I had a health check-up. I was taking food supplements. I was studying. I played sports. I was going to my internship...

At the end of her questionnaire, which had all the makings of a police interrogation, she called Dr HAUSEUX to consult him. She speaks to him while summarizing our interview, evoking the fact of having lost the pleasures of eating, sleeping and playing. At the end of the interview, HAUSEUX decides “we stop the oral Aripiprozole”, A good decision and I am better, just by stopping the oral.

Rq: I could have stopped the oral without asking them and without them knowing it

Rq: I believe that at the CMP, I was told to stop TERCIAN at the first interview with ZARZOUR, which confirms the violence and dangerousness of TERCIAN.

All this confirms the no difference between a neuroleptic and an anxiolytic.

Rq: we can say that HAUSEUX was the least worst of this whole team, even if when a person participates in forced hospitalization in hospitals and in the forced direct or indirect taking of neuroleptics is a criminal.

Rq: ZARZOUR, who was perhaps an intern, did not decide on her own, unlike CHAMI, who was also an intern, without experience and without great academic skills and decided on her own for my hospitalization.

My father told me about him “it’s a gestapo”

Rq: at CPOA, Tuesday 02/19/2019, the day of my hospitalization, the first question asked to me by the nurse who gave me the questionnaire was: “where does your communication problem come from? »

The kind of evidence these criminals rely on makes no sense, no basis. Bullshit. A CRIME. BARBARITY. CRUELTY. VIOLATION OF RIGHTS.

It was relentlessness. A violent, persistent and senseless relentlessness on “the communication problem”, which we find several times in their reports. The kind of elements on which they base themselves to fill their torchenesque and insane reports without foundation. ANYTHING. NONSENSE.

Ps: my father had written a letter to HAUSEUX and ZARZOUR at the CMP where he intervened against my hospitalization and criticized their report and the neuroleptics and their effects. He mentions the fact that I eat and drink without any pleasure, the fact that I have difficult and interrupted sleep, that I no longer have a libido and that I have impatience, that my state was of someone of 'stupid', from 'lobotomized', that my gait was slow

PS: in an interview ZARZOUR said to my parents, in a cruel and cynical tone, concerning the effects of neuroleptics and in particular impatience : “it's his illness”. This is the height of cynicism: to say that the impatience or other abnormal effects caused by

neuroleptics is due to what they call “disease” was the height of the criminality of these pseudo doctors.

It is obvious that impatience or others are the unnatural effects caused by a chemical product which acts on the brain and causes all this damage on human beings making it an object which no longer thinks, no longer reflects, no longer enjoys, no longer controls his actions, no longer has feelings, no longer has emotions, no longer has pleasure….

ZARZOUR is in extreme denial and the peak of denial and the peak of cynicism, bullshit or extreme stupidity. She denies the truth, even scientific, of the disastrous effects of neuroleptics. ZARZOUR knows perfectly well the effects of neuroleptics, including impatience, and says that she does not know them. She lies.

VIOLENCE, CYNISM, DENIAL

Rq: with the cessation of TERCIAN and oral ABILIFY, I went from a phase of peak torture and maximum effect of neuroleptics (very strong impatience, nocturnal impatience, uneasiness, and extreme horror) that we will call phase zero (from the hospital, at the beginning of April approximately) to a phase where the torture is less violent, the vacuum is less violent, but the effects of neuroleptics are completely cut off (end of nocturnal impatience, less strong impatience therefore I can sit a little longer, without feeling the need to get up immediately, without I could stay up a little longer without having the need to move all the time and move back and forth, sleeping has become less worse and slightly longer and better and less interrupted, the discomfort and the horror and the torture less violent, the gait less slow and slightly better and I look a little less stupid) which we will call phase 1 (from the beginning of April to June 20/25, approximately).

Rq: faced with a problem caused by neuroleptics, they will say “it’s the disease”. Lying and constitutionalized cynicism typical of these criminals. NONSENSE, ANYTHING.

Rq: when my father told ZARZOUR “the 2018-2019 school year, it’s over for him. She told him: “It doesn’t matter.”

Rq: at the CPOA, when they were told that I had studies, and exams that I had to take, they gave no importance, and despite this they decided on forced hospitalization while not caring about my future and my dreams.

They claimed that my condition was “so worrying that I urgently needed to be hospitalized.”

As for the CPOA and CHAMI deciding on my hospitalization, they did not take into account why I was in such a state and ignored my past, the terror that I experienced on a daily basis because of political engagement of my father. They just listened to S.HNID, and what he told them about me, misleading them, because S.HNID didn't really know me, but my father sent him to me to support me and break my solitude. S ;HNID told them nonsense. They believed or wanted to believe that I was hallucinating, delusional and having suicidal thoughts. Although I told them, as well as my parents, that these were not hallucinations, that it was my daily experience, the police, BEN ALI, SARKOSY, Warda...They wanted to lock me up. I was for them a textbook case, the age, the appearance and the ideas which were not hallucinations and delirium but a daily experience which they could not understand, nor even imagine because they did not have not experienced it.

Rq: the harm linked to studies is incomparable and minimal compared to the harm caused by forced and abusive hospitalization and bodily harm caused by neuroleptics.

Before taking the second injection, I felt horrible from the neuroleptics. I whispered to my parents. We were therefore faced with taking the second injection. My father then called Dr. MARTINEZ to find out. It was a psychiatrist whom I consulted twice before hospitalization. He reminded her that I consulted her twice, because she seemed not to remember me, and informed her that I was hospitalized <u>and I was in pain, but that this hospitalization made me suffer more.</u>

Rq: this underlined sentence: “he suffers even more” evokes one of the simplest, apparent and obvious facts. And even, she is extremely weak in expressing my suffering since I was forced to take neuroleptics. It was destruction, torture, horror. I suffered more, but in an incomparable way that had nothing to do with the first, horrible, indestructible, horror, torture.

Martinez responds dryly: “If he has to take his injection, he has to take it. If he feels any discomfort, it will pass.” MARTINEZ responded to my father without consulting my file, because it appears that she does not have a file for me. MARTINEZ also lied. It is a criminal, cynical lie that has become institutionalized, official, normal among

many psychiatrists. There MARTINEZ is guilty of disinformation and non-assistance. This person did not respect Polycrates' sermon.

The MARTINEZ episode: MARIA MARIA MARTINEZ. I went to consult MARTINEZ on 01/30/2019, not because I needed a psychologist or because I want to see a psychologist, but for a more objective, more real goal and approach. I didn't choose the right place or the right competent people.

Rq: point in common with the story of my coming to the CPOA of SAINTE ANNE.

So, we do everything that I went to see MARTINEZ for that had no reason to be with her (like with the hospital).

During this meeting with MARTINEZ, I stayed talking about what is psychological (of course in the objectives already mentioned like in the hospital)

Rq: point in common with my coming to SAINT ANNE. She stayed to listen, respond, and ask a few little questions. She seemed attentive and rational throughout the session (1 hour perhaps more) It must be said that I was recommended to MARTINEZ by, a social worker, whom my cousin Safouene told me to see and who was a friend of his father.

Rq: another point in common which resembles the criminals of SAINTE ANNE. The only difference is that she pretends to be “listening”, “attentive”, “rational, “patient”. The only difference is that she is less rapid and sloppy and remains patient for a while, playing this false “rational” face in the dialogue.

Worse still, she even pretended to agree with me on several points that I mentioned.

At the end of the consultation, she changes her method and her face, she becomes “busy”, “stressed”, and uses “psychological pressure to tell me: “come out, I have things to do” At the end , she takes a piece of paper and quickly scribbles a prescription, telling me in a tone "I'm going to give you medicine that will allow you to concentrate." She gives me a bad look, in an accusatory tone: “You agree that you need medication! », then giving me once again a piercing authoritarian and accusatory look: “but you take it? . I try to chat a little bringing up some advantages concerning me (the real objective), she becomes busy, psychological pressure, then indirectly, tells me to go out, which does not give me the opportunity

to mention the real reason for my visit and does not give me the opportunity to find out about the “medicine”, nor its nature, nor why she prescribed it to me, nor its devastating effects. ABUSE. DISINFORMATION., imposing a medication on someone without knowing why, nor knowing its effects, is manipulation, psychological pressure and dishonesty.

Rq: even without forced and abusive hospitalization, these criminals have other devious and abusive methods to impose their poison without anyone really wanting it , through disinformation, manipulation, abuse on vulnerable people or / and precarious…

Rq: points in common with the criminals of SAINT ANNE:

1) The sudden change of face to “stressed”, “busy”
2) The false face she displayed even if of a different nature and method
3) Lying, disinformation, manipulation
4) Intentionally failing to tell the real effects of neuroleptics and hiding them
5) Deciding for herself without knowing anything about the patient and his real needs and imposing: “you agree that you need medication”
6) The fact of imposing their poison by all means even if the fact of imposing it and the way changes depending on the hospital or the private sector.
7) Misused methods, correct and dishonest
8) Bottling, mediocrity, bad work
9) Knowing nothing about the real needs of the patient and his life, his reality and the why of his condition and then imposing his point of view and his poison on him
10) The diagnosis is wrong
11) Search by all means for elements that go in their direction to base their abuse
12) Imposing things on the person without the person really wanting it (here especially with the CMP and even the hospital which imposes the poison and forces it indirectly
13) The rant and the cynicism
14) Denial of the horrible effects of neuroleptics
15) Indifference to the horrible effects of neuroleptics
16) Pretending that the “person is not well” and imposing destructive things in a cynical and false pretense of “helping” and “healing”

17) Treating a human being like a piece of furniture or an object,
18) Give neuroleptics like you give to a guinea pig
19) To make people believe that neuroleptics help and treat, while they suppress, stupefy, lobotomize, destroy human beings and even cause suicide and often early death.
20) Not wanting to see or accept the specificities and characteristics, as well as the person's experience. And only seeing symptoms studied in lectures that must be superimposed on the individual.

In short, it is obvious that MARTINEZ does the same “psychiatrist” work as the criminals of SAINT ANNE.

But what is shocking here is that even in private practices, we use the same devious methods, manipulation, abuse, psychological flaws, disinformation above all so that if they cannot impose by force, they impose it differently. The CMP is an example, like the hospital.

Rq: MARTINEZ committed this abuse knowing the precariousness and vulnerability of the person and knowing the particularity of the person regarding their social communication difficulties, and she plays on this point, using psychological flaws and psychological and moral pressure and manipulation.

Rq: these same methods used by SAINTE ANNE, and this in full knowledge of the vulnerability of the person.

21) MARTINEZ, just like in the hospital, does everything without the person's knowledge, without informing them or asking for their authorization or opinion.
22) Just like the hospital, she only knows how to use neuroleptics. MARTINEZ prescribed me ABILIFY at 5mg, which is a small dose. This small dose is not, despite everything, “an antidepressant dose”, but remains synonymous with torture and violence, evil, pain, suffering, torture of the body, physical and in the nervous system.

When I got home, I went to the pharmacy to buy this ABILIFY 5mg, which is nothing other than a poison. So I bought this poison through inattention, inadvertence, lack of information and knowledge about this toxic product, a moment of lack of attention, lack of distrust in relation to "psychiatrists" and their neuroleptic poison, and above all

a abuse committed by MARTINEZ. MARTINEZ commits a breach of trust in his role as “doctor and “psychiatrist”.

I didn't want neuroleptics.

Rq: The principle of a prescription is to protect the patient from medications and prevent the patient from taking harmful medications. In this case, we

1) A prescription that allows the patient to take something harmful to their health
2) Worse still, the patient doesn't really want it and doesn't know its effects, and not even why the "doctor" prescribed it.
3) Worse still, the “doctor” imposes it because he is the one who wants it this way and has decided it according to insane pseudo-scientific theories and ANYTHING and which are devastating for the patient's health.
4) In conclusion, a prescription that is supposed to protect the patient, treat him and cure him becomes synonymous with abuse, misinformation and manipulation committed by the doctor.
5) When I asked the pharmacist “what is this “medicine” used for”. She answers me quite stupidly: “it serves to be good all the time, not sometimes good and sometimes not good”
   MARTINEZ therefore clearly lied, misinformed, and committed non-assistance. She gave a harmful product, which doesn't help you concentrate, as she told me.
6) In short, its prescription does not cure but causes real physical and bodily ailments.

So, in a moment of inattention, of lack of distrust, because we always trust doctors, following lies, abuse and disinformation, lack of information and knowledge, and above all without me really wanting it and without me I needed it, I took ABILIFY 5mg for a whole week. Certainly, I didn't feel the complete, destructive emptiness and all the horrible effects, but there was a little weakening in the emotions, which I think was not extremely severe like in the hospital, but There were especially impatience which appeared in a week (even less, perhaps on the 6th day). These impatience did not have the same violence and intensity as those caused by the hospital. In fact, not all of the horrible effects experienced in the hospital were caused by ABILIFY. When I stopped taking ABILIFY, just after 7 days everything returned to normal, whether in terms of emotions or in terms of my

legs which I could control. There were no longer these attacks on the nervous system which cause serious discomfort.

After a week to the day, on a Tuesday, I showed up for the 2nd meeting with MARTINEZ. I tell him that I want to stop taking ABILIFY because of the impatience. She replies authoritatively in a nervous and dry tone: “But, take it!” take it ! ". I tell him that I can't and that it causes impatience in my legs, and that this impatience causes me real discomfort and real inconvenience. She insists again: “but take it, take it”… I stand by my position, so she corrects me: I’m not going to come to your house to make you take it… I then answer her: “I’m going to looking for natural products to help me like fenugreek.” I spoke to him respectfully and politely. She, on the other hand, was bossy, insisting and pressuring me: “take it every other day. I tell him no, I won't take it. Having failed to force me to take the poison, she said to me in an exasperated tone: “It’s not serious! ". I then started talking to him about the benefits of fenugreek. She replied in a malicious tone: if you want to concentrate on your studies, you have to take it. It's the height of it then, a poison that kills all the will and desire in you and blocks all emotion, and it speaks to me of concentration. !!!

At the hospital, as with MARTINEZ, I mentioned the problem of concentration, without giving too much importance. For me it was a detail, it wasn't true, just like with the "delusional ideas", I mentioned my past so they saw it as a symptom of hallucinations

Before the hospital and the neuroleptics, I had nothing. I had all my ability to concentrate and think, and I could study and go to my internship with an accounting firm. I was healthy in body and mind. I took complete responsibility for myself.

It is clear that I did not choose the right people for my objective approach, which CHAMI described as “a vague request”. What intellectual dishonesty. It was a very clear, very precise idea, expressed by S.HNID.

It was with the neuroleptics that I could no longer study or do anything. My father reported it to ZARZOUR, but she doesn't care. I was his ideal guinea pig. I no longer had my ability to think and concentrate. It was horribly destructive, horrible, incomparable with any other evil.

When talking about concentration with MARTINEZ and/or the hospital, I did not talk about it as a cognitive and human brain

capacity, but I wanted to talk about studies in a general, or even anecdotal, way.

Poor understanding and interpretation of my words. They only take what corresponds to their logic, their theories in order to find elements to fill their rags and give “medicines”, like we give candy and thus abuse patients who come to seek comfort, relief and care.

They distort your words and say that “it’s not going well”. It does not go well in their non-logic and their nonsense and this in a destructive approach.

When I asked MARTINEZ for documents that would be to my advantage, she became in a hurry, busy as if she wanted me to leave immediately, responding to me: “I don't know you well enough. ". Does she know me well enough to give me her ABILIFY poison? No, we just had a session. She prescribed ABILIFY, like one prescribes a candy and without informing me of its devastating effects or the reason for which she prescribed to me.

She tells me “I don’t know you well enough”, but yet she asks me to trust her with a poison that I have to take

What is the problem if I request these documents for my benefit? Why does she respond to me in this way, so aggressively? To give a poison, she knows me well enough, but to give me a document, she no longer knows enough.

She, who is professional, is supposed to provide me with what I need. On the other hand, what right does she have to ask me to take her ABILIFY poison,

It is a relationship between a patient and a professional, not a meeting between a common stranger and this person “does not know him”. We are with a person who is supposed to be a doctor and answer and question in a professional manner. We are not in a selective space which has a certain clientele and which refuses to take on this or that client. This response “I don’t know you well enough” has no place. It is a peak of mediocrity and low standards.

With such psychological and moral violence, she gains a psychological advantage and puts psychological pressure and becomes inaccessible and this technically just having abusively, carelessly prescribed her poison ABILIFY 54mg

In short, it seems as if we are not dealing with “doctors”, but as if we were dealing with thugs on the street.

Once again, she demonstrates low-level behavior and methods, and as if we are not in a professional setting and relationship: Come on, but take it! take it ! »

She orders me to take this poison, because it is she who wants it and because it is she who decided and not for my own good, which is rubbish in medicine. Make a patient take a “medicine” to “please” the “doctor” and for the interest of the “doctor” and others (pharmaceutical labs). It's a crime.

Dr. MARTINEZ, in addition to misinformation, manipulation, psychological pressure and devious and incorrect, even intellectually dishonest, methods about the truth about the effects of neuroleptics and the reason for their prescriptions). This is not enough for her, plus she insists, puts pressure with great insistence and uses all means to make me take this poison. I told him that it was causing real impatience. She didn't want to hear anything, saying, to convince me, that it helps me concentrate during studies. Which makes no sense and is completely false. This poison helps to deconcentrate, helps to stop thinking, to stop thinking, since neuroleptics completely and totally destroy all the capacities of the body and the brain, and as a result, we can no longer concentrate or do anything. . In short, neuroleptics especially destroy the ability to concentrate in an extreme way. It's absurd what MARTINEZ is trying to make me believe. Besides, there's nothing we can do about impatience. We can't do anything when we're in a cramped state, summoned. In short, neuroleptics block and destroy everything in the body and the brain. LIE. CYNICISM. MAKING FUN OF.

With neuroleptics, you totally, absolutely cannot concentrate or do anything. This is self-evident. It is a chemical lobotomization operation and not a surgical one. Neuroleptics prevent you from concentrating in an incomparable way, beyond measure. It's total destruction, horror. Neuroleptics prevent the slightest concentration. You are in a state of real slowing down of the body and movements as well as the mind and brain. They block all sensation and emotion, destroy intelligence, reflection, imagination, cut off sleep, cause watery eyes, cracking of the lips, it is impossible to sneeze. You are totally weakened, your memory is weakened. So I no longer thought about studying, that was obvious. With neuroleptics, you plunge into a total void, dark and nightmarish.

MARTINEZ not only lied about the effect of the neuroleptic by saying that “it helps you concentrate”, she also lied about why she prescribed it to me. She misinformed about the effects of the neuroleptic, she misinformed about the reason for its prescription. This is beyond a lie. This is extreme cynicism.

It is very tiring and not pleasant to demonstrate the apparent and simple evidence to a cynical, criminal, corrupt, dishonest world in addition to being stupid and irrational and nonsense and non-logical.

MARTINEZ committed all these abuses, and all this violence, knowing the vulnerability of precariousness and even the person's difficulty in verbal and social communication. CRIME.ABUSE. VIOLENCE.

She has something in common with CHAMI in the method when the latter says to me: “go! go!” otherwise we'll start all over again! »

MARTINEZ: “Take it!” take it ! (the insistent and forceful tone is a psychological technique characteristic of these criminals "they're psychiatrists".

There, we notice the incorrect techniques used by psychologists

After my release from the hospital and the prescription of neuroleptics, Dr. KHIEL asked us to go see MARTINEZ and ask her for a report to find out why she prescribed ABILIFY to me.

We went to see her, me and my parents. She was asked why she prescribed this poison to me. This time, being accompanied by my parents, MARTINEZ, unlike the two other times when I was alone, could not be in opacity and disinformation as to the reason for prescribing his poison. She mentions something that relates to my difficulties in social communication and that I stutter a little. Bullshit. But, what is this, because I am shy and I have some small communication problems, I am being given this poison? CRIME. DISGUSTED. BARBARITY. VIOLATION.ABUSE. NONSENSE. ANYTHING. Worse still, these criminals diagnose what they call “disease” in the most irrational way possible. For them everything is “disease”. You talk too much, it’s “illness.” You are fat, it’s “disease”, you are skinny, it’s “disease”

It's irrational.

With my parents, she told them why she gave me ABILIFY. She spoke to them in a different tone than the one she used with me.

Just like SAINT ANNE, she mentioned my clothes and the scribble on my jacket. It was a very expensive jacket, but I don't think they know

anything about the quality of clothing. And said, he “looks poor.” But what is that ! What right do they have to give this poison because the person does not communicate, doodles on their clothes, and is poor? She also spoke about political issues at home, which she described as "hallucinations."

She talked about “correctors”. Which correctors? It's a lie. It's a poison in the body. It's a poison that is injected into the body and eventually kills you. It reminds me of the scenes of injections for those condemned to death.

During this meeting, she spoke with my parents in a very technical, scientific and serious way, wanting to demonstrate knowledge in her field. When she spoke to me, or asked me questions, during the two visits I had with her, it was in a more simplistic way, simple but opaque using pressure and abuse.

At the end, when my parents told her that they were against this poison, she told us "listen, care is free, unless a person is dangerous for themselves or for others or someone who has tuberculosis for example, the prefect can oblige it.”

My parents asked her to give them a medical report, which she refused.

We can say that MARTINEZ is a cowardly, hypocritical, lying, disloyal, corrupt and criminal person.

Anyone with a minimum of kindness will tell me on this subject: “above all, no psychologist”, “no medication”.

I have just written 15 handwritten pages on MARTINEZ, to tell you to what extent these people are criminals while what can I say about the other major criminals of SAINTE ANNE.

On April 12, 2019, I went to the CMP of the 15th for the second injection of ABILIFY retard 400mg. I went there reluctantly. My parents were also against this poison. Because of the neuroleptics, I had lost my decision-making will, added to that, the harassment, the threats from the hospital and the CMP, the disinformation and the lies of the criminals.

My father who accompanied me asked the nurse who was on duty, an intern, an Algerian student: what are the bad effects that this injection can cause.” He answers, shamelessly: “they can just cause fever or contractions”.

The nurse lied. Not only does it hide the undesirable and horrible effects of neuroleptics, blocking dopamine, the molecule responsible for emotions.

Speaking of so-called “side” effects, he does not even mention impatience, damage to sleep, tearing, dry skin on several parts of the body (chapped lips).

Fever or muscle contraction are part of and are the direct cause of the primary effect of neuroleptics, which is to block receptors in the nervous and cerebral system, thus attacking the nervous system. These are even effects directly linked to the primary effect of the neuroleptic

This nurse is therefore in addition to not informing, and telling the truth, he is lying, he is hiding the truth. Didn't I tell you that lying had become institutionalized.

This is how I took the second injection even though I didn't want it and even my parents were against it.

The first injection, after discharge, was given in a room in Pavilion K, in the left arm, I believe. The second was made at the CMP AT THE LEVEL

I think it is less worse because perhaps it is in the arm that it has more violent effects. The nurse in Pavilion K therefore demonstrated negligence and poor work at the expense of the patient's well-being. The CMP then gave me an appointment for a third injection on May 10, 2019 (which is 28 days apart).

During this period (April-May 2019), I felt terribly bad because of the neuroleptics and their devastating effects (horrible emptiness, insomnia, impatience...) But, it was less worse than in the hospital and all first days after I left the hospital.

During this April-May period, I was in what I called phase 1 which is much less worse than phase zero; which is the height of torture and horror. During this period, I saw the CMP and the “day hospital” at the same time, and I also saw a great psychiatrist who had a different approach. My parents sought the advice of other psychiatrists who could confirm to them that the entire diagnosis was false and that the neuroleptics could be stopped.

MARTINEZ, in her extreme malice did not prescribe an "anti-depressant", nor something, which is normally intended for concentration in studies (she therefore lied to me by prescribing

ABILIFY to me and specifying that it is to help me concentrate in studies She gave me a neuroleptic, something I didn't know about and she lied to me to convince me to take it, so we can assume that there is. a real intention to harm.

In fact, I had no problem concentrating in studies, and I never mentioned to him that I had a problem concentrating in studies. This is bullshit. The psychologists, when they don't know what you have, they believe that they necessarily have to give you an antidote, and something powerful, to get rid of you.

I didn't need an antidepressant or anything. And, I didn't want any of those things, even less neuroleptics, which I consider absolute evil.

I am against all these products, antidepressants and other barbiturates to supposedly help concentration. I am wary of them as well as their neuroleptic aid, which slowly destroys and kills. ZERO tolerance for neuroleptics which are the worst poisons that man has invented.

Some “psychiatrists” who give ABILIFY 5mg claim to give “a dose of antidepressant”. In fact, they do not give an “antidepressant”, but they give a neuroleptic, a poison. Why don't they just give this "antidepressant", Isn't this malice, bad faith and an intention to harm?

21 pages on MARTINEZ. She tires me.

In fact, it’s not about “knowing myself well enough.” We are in this type of situation, where we are supposed to be in a patient-doctor relationship where the latter is supposed to be at the service of the patient.

I don't know her well enough to trust her about her poison

She doesn't know me well enough, and yet she gives me this poison. She has no right.

It’s not about “knowing myself well enough.” This is if objectively and/or professionally, she is able to provide me with some requested documents.

Certainly, it is true that I went to the wrong people (MARTINEZ and/or the hospital), and that this approach has no place with them. But, the psychiatrist is able to provide certificates and/or complete and/or sign documents related to such procedures (eg: there is a not bad psychiatrist, who filled out documents related to a procedure for me. After hospitalization, HAUSEUX gave me a medical certificate,

TORCIAC, from the hospital of the day also provided me with a medical certificate. So, it was normal for me to ask for such documents, but on the other hand, she did not. He didn't have to give me his poison. Same thing, regarding my first visit to the CPOA. I had the right to ask for some documents (which they called a "fuzzy request", but they didn't have the right to. intern me like that, even if I went to see the wrong people and my approach had no place with them.

MARTINEZ, using lies, manipulation, and other devious methods and imposing her poison on me, she could have caused me this bodily disturbance (or simply torture) for longer and even caused me horrible effects and damage, but I I stopped his poison and stopped him from hurting me anymore.

I've talked a lot about MARTINEZ, but she's nothing compared to what was done to me in the hospital. The hospital used brute force.

The hospital used lies and backhanded methods worse, in an extreme and incomparable way. At CPOA, when they committed me, CHAMI only stayed with me for a few seconds to decide on my emergency hospitalization. Likewise, doctors and nurses only stayed with me for a few seconds to decide to administer doses unimaginable for my case.

But MARTINEZ remains criminal like them, since, just like them, she gives neuroleptics, “without knowing me well enough”, as she says. Like them, she uses abusive methods, she imposes, she lies, she misinforms, she manipulates and uses other devious methods.

ACCORDING TO MY PARENTS? Martinez, it's more than incompetence (the hospital is of course worse and incomparable obviously). She had nothing on me. It is not known how she obtained her diploma. His office was damp, cramped and the waiting room was very small. Everything was dark. There was a faint light that made the office look gloomy. We wanted to escape these places which gave chills more than they calmed.

Dates: 01/30/2019: 1st meeting with MARTINEZ

02/09/2019: 2nd meeting with MARTINEZ and discontinuation of ABILIFY 5mg

02/19/2019: entry to the hospital

01/03/2019 change of flag

03/11/2019: discharge from hospital

03/14/2019 1st injection of ABILIFY

04/12/2019 2nd injection of ABILIFY

05/10/2019: 3rd appointment for the 3rd injection, but I didn't go. It was decided to stop the injection of this poison.

At CPOA, they did not ask me to clarify what they classified as a “fuzzy request” and paid no attention to it. They knew the request very well, since it was S.HNID who clearly explained it, but they preferred to designate it as a “fuzzy request” and pretend that I had hallucinations and delusions as well as suicidal ideas in order to be able to make me their guinea pig. Their quizzes were directed to align with what they were studying in class. It was insane.

RACHENKO: a psychiatrist who is expensive, since the cost of his consultation was 190 euros. RACHENKO, without asking me any questions, contented himself with vaguely skimming the report of SAINTE ANNE, then he said to my parents in an authoritarian, even a little harsh tone: “what do you want I tell you? That all this is false? ". RACHENKO comes from Eastern Europe, he is Czechoslovak, I think. Does a foreigner, coming from Eastern Europe, comfortably installed in Paris, have any other choice than to confirm the report from the Mecca of psychiatry in France? RACHENKO, did not seek to make a diagnosis himself, did not seek to see further. He only approved the wrong diagnosis before even reading it deeply, nor asking me why I went to the hospital, nor what is this vague request, nor what are these hallucinations and these ideas suicidal. He recognized the impatience "that's the effect of ABILIFY", when he saw me coming and going in his office. He then prescribed me Solian “in small doses”, the smallest dose he said. RACHENDO therefore contented himself with following the hospital's conclusions and prescribing me another poison. A classic lie in psychiatry: “change the name of the “medication”. The interview lasted barely a quarter of an hour, then he received his 190 euros in cash, hard currency.

When we got home, we searched SOLIAN on the Internet and found that it caused horrible effects, as bad as ABILIFY. According to my parents, RACHENKO is someone from the same school as SAINTE ANNE and who can only follow their methods and conclusions.

MARTINEZ, ZARZOUR or at the hospital of the day, all noticed the impatience from which I suffered, but they remained impassive. They didn't care. It wasn't their bodies that suffered.

When RACHENKO changed ABILIFY to SOLIAN, he changed it for the worse. We are therefore faced with a big lie from a psychiatrist and psychiatry in its most extreme and insane states: “changing “treatment” for another which is worse.

NONSENSE.CYNISM. CRIME. VIOLENCE

It is obvious that it is nonsense to talk about “changing treatment”.

According to my parents, CHAMI made the first diagnosis in a few seconds and all the others only signed his conclusions and decided on my internment. Could they really go against her conclusions, even if she was just an intern, who didn't even speak French?

The CMP therefore directed us to the hospital of the day which is linked to the SAINTE ANNE hospital. I went there the first time, accompanied by my father. There was a security guard at the entrance. The door was secure. The place was cold, gloomy, nightmarish like SAINTE ANNE. We saw “Dr TORSIAC (JEAN de BOISSET de TORSIAC) spoke a little with my father. TORSIAC claims that in this “day hospital”, they have activities which “stimulate” intelligence, memory and reflection. My father said to him: “My son has a very good memory. TORSIAC responds in an official tone: “that’s good, but we have to do activities so that these great abilities are not lost.” It was hypocritical, because these activities have no meaning since all receptivity in the brain is cut off and all activity is carried out robotically, without will, desire, without soul. Also, neuroleptics destroy in an absolutely total and horrible way the capacities of memory, intelligence, reflection and imagination. With neuroleptics we can't do anything: “my father had already mentioned it to ZARZOUR: “he can't do anything”

The activities at the hospital today are bogus, ridiculous and pointless, just like in the hospital. We can even say that these activities fall within the framework of ridiculing the patient in order to definitively label him as “sick”

It should be noted that the hospital of the day, just like the CMP and the hospital, all act with the aim of having control over the person. Indeed, the CMP as well as “the hospital of the day” developed a sort of influence over me during the two months following my release from SAINTE ANNE.

I once asked TORSIAC: “do these activities help combat the effects of “medications”. He answers: “no, but on the other hand, they help fight against the disease”

During an interview with TORSIAC, the latter told me: "yes, you have an illness"... My father mentioned the effects of neuroleptics to him, TORSIAC replied: "it's like putting out a fire, the illness will wreak havoc on his brain.” We are here faced with a typical, institutionalized lie of the most cynical, insane, criminal, violent nature. He claims that the theoretical “disease” resulting from their pseudo-scientific, unreal and non-existent theories is more serious than the effects of neuroleptics, destructive, real, horrible, total, absolute torture. THIS IS THE SUMMIT OF CYNISM

SUMMIT OF NONSENSE. CRIME. VIOLENCE. BARBARITY

This “disease” does not exist

The effects of neuroleptics are an evil and its damage is real, destructive, horrible, absolute torture. On the other hand, what they call “disease” is non-existent, unreal, torturous, theoretical, pseudo-scientific, senseless.

The effects of neuroleptics are absolute evil and total destruction, while the “disease” they speak of does not exist.

In the case where there is a small relative evil and even unreal and non-existent, it is almost insignificant compared to the horror injected by ABILIFY.

What is this, claiming that “the disease” which does not exist is more serious than neuroleptics, is NONSENSE. Fortunately EINSTEIN did not live through this era.

The atmosphere in this “hospital of the day” was gloomy and nightmarish. The walls were cold, just like in SAINT ANNE. Phony and useless activities. The food is of poor quality, like in SAINT ANNE. Just like in SAINT ANNE, I spent my time in this place looking at the clock which was at the end of the corridor. The session lasted 3 hours, which is relatively too long. I spent the time going back and forth because of impatience. Sometimes we noticed this. Once, a nurse who takes care of activities with patients told me: it's the “medications” that are doing this to you, you need to talk to the doctor to reduce your dose. Another time, during an interview with TORSIAC, having noticed the impatience, he said to me: “I know it is difficult for you to sit down”, then he asked me what activities I wanted to do. I then asked him: “Are these activities obligatory?” » I don't remember what he answered clearly. It wasn't very clear, but I consider that in all these activities, there was a form of harassment and control that they were trying to maintain. Forcing a person to

come, just like the CMP, even if there is no forced internment and the use of direct and brute force, as in a hospital, is a form of harassment.

Once, my father told TORSIAC that there is a psychiatrist who has a different approach and who says that I have no illness (we will call him G)

Another time, I think my father managed to convince HAUSEUX to lower the dose of ABILIFY from 400mg to 300mg, but I didn't go and I never went again.

TORSIAC gave me a medical certificate, as did HAUSEUX at the CMP as documents justifying my absences from the course.

In this hospital of the day, there was a nurse called NASSIMA. She played cards with the patients, all the while smiling, I think it was a hypocritical smile.

Once, I told him and TORSIAC that I am doing another activity outside of the day hospital and that it is bad timing with an HPD activity, to avoid going there so that I could sleep, because at night I could not sleep because of nighttime restlessness. My sleep was disrupted and therefore disturbed because of the neuroleptics, and it was horrible.

Once NASSIMA calls us and tells us that she knows that our meeting with HAUSEUX was planned for such a day and such a time. It was persistent harassment and a nightmarish, unhealthy influence, combined with the effects of neuroleptics, I was experiencing terrible times.

Another time, NASSIMA calls me to come to the TORSIAC office. The latter accuses me. I tell him I never said that. He answers me in an accusatory and cynical tone: “When you came to the hospital, what did you expect? I then mentioned the procedures. He replied dryly: “Here, all we can do is give you a medical certificate to say that you are not able to take them and that if you were absent and missed taking them, it wasn’t on purpose and that you couldn’t take the exams.”

Indirectly, he said to me: “you want something, but we don’t have that and this is what we can give you”

They imposed on me what they have and which I did not want, which I did not need. The height of it was destructive, harmful and pure torture.

CHAMI, the CPOA were in non-logic, violation of rights and mediocrity, low level. They mask their incompetence, by setting you up to allow themselves to administer neuroleptics to suppress you, stupefy you, and get rid of you. » “You came to the hospital, they will make you pay dearly for this and impose hospitalization and neuroleptics. “He came, so he is sick.” Let's remember what the "court-appointed lawyer" said: "you know very well that SAINTE ANNE is psychiatric" Well, no, I didn't know that this kind of horror really existed and that we could force us to be interned there and inject you with the poison.

Nassima, who played cards with the patients and acted “smiling”, gave me bad looks and became TORSIAC’s accomplice. It was indescribably psychological and moral violence.

Once a friend took me with him in his car to the day hospital. When he saw the place and the atmosphere there, he said to my father: “But what the hell is he doing here? » My father replied: “Yes, you are right. It's not his place. »

Even though I mentioned "the look of those people over there", no one should be considered sick in the nonsense of these criminals or take these horrible neuroleptics.

MARTINEZ, in addition to lying and misinforming about the effect and the reason for giving me ABILIFY 5mg, telling me "it will help you concentrate for studies", when it is completely false and even worse since it completely and totally prevents you from concentrating. On top of that, she even lied about the nature of the product.

At the time of the events with MARTINEZ, and with the hospital, I was only 22 years old, young, foreign, with problems in relationships and social communication, with little experience in life, vulnerable, accumulating in my interior a lived heavy with terror. MARTINEZ, was aware of this, as was the hospital

When my parents questioned ZARZOUR about the effects of neuroleptics, she spoke to them cynically, insolently, while using lies, denial and bullshit. In a way, they are synonymous with wickedness, violence, intention to harm. Regarding my slumped state, and my slowed gait, she said: “It's light, it's nothing. We have already noticed that it is slow-moving in nature. The height of cynicism and violence. “no motivation, we don't want to do anything, yes yes” (regarding the effect of neuroleptics, she said in a euphoric

downplay) “it's her illness” she said. She had a bad look. It is the height of cynicism and violence.

She spoke, sometimes, in a minimizing, euphemistic and cynical tone and sometimes authoritarian with a bad look, using lies and insolence. It was almost the same thing with GALLET, CHAMI or TORSIAC or even MARTINEZ, RACHENKOU, without forgetting PINABEL who got up from his chair shouting and threatening: I'm the master here."

Dr. G:

We went to see Dr. G to get a different opinion who could reassure us that we could stop ABILIF Y? THE POISON OF THESE CRIMINALS. He told us to ask for the hospitalization report and to go see Dr. MARTINEZ to find out why she is prescribing ABILIFY. According to Dr. G, ABILIFY is not given like that

MARTINEZ gave me his ABILIFY poison without doing any analysis.

When we went to the hospital to ask them for this report. At first, they did not receive us well and our request seemed to bother them and we were told: “you cannot see the director CHASSAGNOL”, then in the end a nurse from Pavilion F gave it to us.

We had an appointment with Dr. G, we showed him the hospitalization report. He found it to be rubbish: “It’s poorly written,” he said. It’s a rag.” He noticed their contradiction regarding “suicidal ideation”. He said he didn't understand how they could deduce "hallucinations" and "hearing voices", and that even hallucinations or hearing voices does not always mean being sick. But, I had no hallucinations, and I never said I heard voices, since I didn't hear voices. The criminals added and invented what fit their boxes. He told us that a patient's parents or even grandparents have the ability to request a patient's discharge and that he should be discharged immediately. Then he spoke to me and told me that I had nothing, that I wasn't sick, that I just had "a few sores", according to his expression and that it could be fixed. and that the poison had to be stopped, without even reducing the dose. He told us that "the anti-depressant dose" that some criminals may claim, such as ABILIFY 5 mg) actually aggravates the case and can even cause serious depression and even actually cause suicidal thoughts in some people. (this is one of the shocking truths concerning neuroleptics, and it is even obvious, since the effect of neuroleptics is to block dopamine, a hormone of well-being, motivation, excitement, vigor,

block d other hormones, like serotonin, cut off all pleasure, cut off sleep, create impatience, a horrible feeling of emptiness A lobotomized state. The horror world of neuroleptics.

Dr. G told us that I had to stop the injection. He vacillated about stopping all at once or gradually. Then he said we have to stop it suddenly, which is the right decision. Neuroleptics are not “medications” that must be stopped gradually and can be stopped suddenly. Neuroleptics are so harmful and dangerous that they must be stopped quickly and suddenly to prevent them from causing further damage.

So, I stopped the neuroleptics, with the doctor's advice, and against the advice of the CMP. I could stop it alone, given their harmfulness, but my parents advised me to seek medical advice.

Dr. G even advised against going to the “day hospital,” and told us to be wary of them. Dr. G said, "They can put him in a corner and give him the injection, or maybe dissolve a pill in his plate." Be careful, he warned us.

I went to the CMP one last time for a meeting with HAUSEUX. He asked me a few banal questions, like who went with me the day I was hospitalized, his age (Slah HNID, 49 years old, he lives in Germany, married to a German woman. He notices that I am better, probably thanks to the cessation of their poison and adds: “I find you more smiling”

When speaking with him, he must have assumed my desire to stop and even understood it. So I stop talking to him, knowing how these people work and being wary of them. He told me: “We’re stopping gradually. We want you to get back to your life and not to be re-hospitalized. Do you remember how you came to the emergency room? » There, we have police surveillance behavior assuming the will of the other, which is completely unhealthy

Even HAUSEUX is with and like the other criminals and is in the same logic as them. But, his responses are more respectful, more polite and even sometimes positive, compared to other criminals

Yes, neuroleptics can be stopped suddenly. Before the hospital, they didn't know what I was like. By the way, I was fine. In any case, better than with neuroleptics. Everything I had was relative, or “small,” or insignificant.

The worst is neuroleptics.

In fact, all their words are almost synonymous with lies, falsehood, cynicism and violence.

On 05/10/2019, I did not go to take the injection. I received calls from the “day hospital” and CMP. It was a form of harassment, real harassment. A “nurse” from the CMP called me saying “you didn’t come to take the injection. » I said to him: “Is it obligatory? Her answer was not clear at all:, but she said to me: “it is better that you take it”. An imprecise answer to a precise question is synonymous with pressure and harassment for me (add to this, the shock of the hospital, neuroleptics and the effect of neuroleptics which make the individual lose his capacity for interaction and reaction.

I also received a call from NASSIMA, from the “day hospital”. She harassed me in an extremely unhealthy way, while I was under the influence of neuroleptics and therefore I was not able to interact and react. She said to me: “you didn’t come”. I stay without saying anything for a while and I respond with: hello, yes, no, it's okay. She asks me: "why", I answer vaguely, she repeats: "why", I don't answer. She repeats “why?” ". Then she specifies, as if I were to have a snack: "you didn't come to take your injection", then she adds: "if you don't take your injection, you risk being like before", as if she knew how I was before. I remain without saying anything. Afterwards, she asks me if I was accompanied and I pass her S. HNID (the person who took me to the hospital through abuse without my wanting it. He asks her: "the hospital of the day is linked to which institution? Then, he mentions certain elements of my past experience and says to him: “like that, with a patient of this type!”, meaning that they have just added another trauma to my past trauma, and he adds: “we have a problem with everything that is an official call He said to him: “I was the one who accompanied him to the emergency room and I was frankly shocked What is all this” we are going to take you. by force, and we have the right." You gave him treatment that destroys him. He is with me. He comes and goes all the time, and I am shocked." Nassima, to be reassured that someone. be with me. The person who took me to the hospital didn't even want me to be hospitalized and even signed my release "against medical advice." and admits that it was an accident on his part (even if there was abuse on his part). He clearly said he was shocked by what happened at CPOA and by the truth about the effects of neuroleptics. This meeting with S.HNID was the last for me and my family. We never spoke to him again. I also received a call from HAUSEUX. He asked me a few questions, but he was much less

aggressive than NASSIMA. He said: “the fact that you are followed in private does not prevent you from being followed at the CMP”. I think that afterwards, we had a call from TORSIAC, and even other calls from the CMP and HAUSEUX, to which my parents answered and asked not to call me again. This is how I freed myself from the CMP and the day hospital.” They never called or contacted me again after that.

The injection is supposed to take full effect for 70 days and therefore approximately 40 days after its supposed cessation.

During the time the injection was taking effect, I felt terrible. When I managed to fall asleep, it was very short, I woke up several times, I had to get up because of nighttime restlessness. I had a problem with my right thigh, perhaps it was due to muscle contractions. It is obvious that the injection is worse than the oral (especially when we compare it with the dose of MARTINEZ), but this needs to be qualified, since the oral doses of the hospital based on RISPERDAL = TERCIAN were terrible and caused a lot of damage. In short, during this period, I was in what we call phase 1 or total emptiness and emotions and sensations are completely blocked, but this emptiness is less violent as well as the torture less violent and horrible than phase 0 (this comparison has already been mentioned)

Towards the end of June, I move on to phase 2 where the emotions and sensations begin to be unblocked a little, the impatience was almost gone, but the horrible emptiness was still there, in a slightly less violent way, emotions and sensations improved and sleep was slightly better.

In short, we can speak of a phase of “neutrality” or “passiveness” or “moderation” of emptiness or torture.

During this period, I did activities, such as running, and followed a specific and restrictive diet.

According to my parents, MARTINEZ, had nothing on me and was downright destabilized when asked about the reasons for prescribing ABILIFY. She didn't even find my patient file, since she didn't record anything, which is why she refused to give us a report, something which is legally our full right.

According to Dr. G, at the hospital they didn't even understand me.

In the hospital, they deprived me of my freedom, of my will, of my freedom to choose, of my health and they locked me up by force and

gave me neuroleptics by force without me doing anything, without legitimate reason by someone, incompetent, who understood nothing, who in a few seconds decided my condition and what would follow, causing terrible damage. Plus, there was the surprise. I didn't expect this at all. They did something harmful to me, against my health. They forcibly imposed something on me against my good, against my interest. They gave me the worst, which is neuroleptics.

There was severe heat during the summer of 2019. As I was in a phase where there were moderate effects and after-effects of neuroleptics, I tolerated the heat well, but my body had unhealthy reactions to the heat such as waking up during the night while sweating several times. Because of the effects of neuroleptics and their after-effects as well as withdrawal, there was a very strange and very unhealthy phenomenon in my body such that I was very thirsty all the time and I found myself drinking between 7 and 9 liters per day. day, without being able to satisfy my thirst.

During phase 2, I slept most of the time for only 4 hours. These 4 hours of sleep were interrupted.

The injection is supposed to work for only 28 days, but in reality its effects are still there, complete for 70 days, more than two months (more than a month after stopping); which constitutes violence, torture, deception, destruction, long torture and destruction in the short and medium term.

If we add phase 2 which lasted until the end of August, so 2 months, that makes 70 days of effects in total + 60 days of average effects, which in total is 130 days with the effects we call average , i.e. more than 4 months and more than 3 months after stopping.

This is also another type of violence, torture, mid-term destruction + deception regarding the supposed 28 days.

In the hospital, even oral intake was very harmful and violent and harsh.

Towards the end of August, I moved into what I call phase 3. The emotions and sensations and the deep, ongoing high returned, but everything remained diminished. What came back was diminished. The impatience, as well as the almost or mini impatience that may have remained, is gone. The emptiness, torture and destruction, horror and nightmares and nightmare atmosphere, as the full effect of neuroleptics is gone. What I felt in phase 1 was gone, as well as the blockage and emptiness had become average and less

aggressive than that of phase 2. I therefore passed into a state which is very close to my state before, healthy and normal and healthy. I definitely feel much better. It is even indescribable and incomparable.

How am I doing much better compared to previous phases? The more the neuroleptics and their effects wear off, the better I feel. Even phase two, was enormously and incomparably and indescribably much more comfortable and healthy than phase 1. Phase 3 is still enormously incomparably better than phase 1 or 2. The tearing, I think has gone away since phase 2 and even better in phase 3. During phase 3, I was able to resume many things that I was doing before (a little bit), and even do activities with a little bit of vigor, motivation and excitement. But the bad thing is that there remained a reduction, a narrowing, a reduction in emotions, sensations, pleasures and the depth of sleep. I had a feeling of emptiness, the after-effect of neuroleptics, and a bodily malaise, the after-effect of neuroleptics which are a real torture and destruction, even if in terms of their intensity, it was incomparable compared to the complete effect of neuroleptics. . The violent effect of neuroleptics had become incomparable to that during neuroleptics.

I was doing much better without the neuroleptics, and I was back to the way I was before the neuroleptics. But, on the other hand, these after-effects remain considerable and great given their harmfulness and their damage

All these after-effects (or “small effects) are less than the horror and torture of neuroleptics.

But, apart from the direct medium and short-term physical after-effects that I felt because of the neuroleptics, there were other long-term psychological after-effects. Taking neuroleptics made it impossible for me to resume my life as before or for me to resume a normal life or even for me to do activities, that I have a project, a dream to realize. I could no longer study or concentrate. I was no longer motivated. I was disgusted.

There was, I think, a disruption in the neuro-hormonal system and in the hormones, with this decrease in hormones; I had a lot of unhealthy phenomena and I went through certain periods or phases of certain unhealthy phenomena.

During the fall, I had a fever and nausea which made my sleep short, only 3 hours, and broken. So, I slept from 10 p.m. to 1 a.m. The next day, I slept from 1 hour to 4 hours and so on.

I even went through a phase where I had difficulty eating. It was a real chore for me. It was in the fall until all winter, which caused me real and extreme weight loss. I only weighed 42 kg.

I remember, once my father said to ZARZOUR: “before he ate, with great appetite and pleasure. Now he doesn't eat anymore. I have to use tricks to make him swallow something.”

Before the hospital, I liked to eat. I had a nice meal and bought myself cakes and fruit and drinks. I always had biscuits, chocolate and bananas at home. By the time I was released from the hospital, I had to force myself to eat half a panini or a mini sandwich.

Since phase 3, I have gone through periods that are more or less painful and others that are more or less bad.

My often was often discontinuous. I didn't have much of an appetite. I had to force myself to eat. I couldn't always get the urge to do something, but it was better than in the hospital. But, before the hospital, I was much better.

During the summer, I didn't tolerate the heat well. And, during the winter, I didn't tolerate the cold well. I also had pain in my left arm and thigh. It was probably painful muscle contractions from the interruption of the poison. Everything that has happened to me since this hospitalization and taking neuroleptics, whether physically or psychologically, is because of these criminals and their poison injected into my body.

I went through a phase of “undernutrition”, where I lost a lot of elements and minerals in my body, causing me a lot of health problems (kidney problems, weight loss, swollen legs, difficulty walking, anemia, tension decrease…), I would like to clarify that what happened to me during this period in 2022 is caused by neuroleptics and not by “malnutrition” and that the hospital and the criminals are primarily responsible.

Without the after-effects of neuroleptics, the damage would be minimal, relative, or even non-existent (e.g. if I ran very hard under the effects of neuroleptics, I would not have had the problem in my left thigh, as in April 2019. Likewise, without the effects or after-effects of neuroleptics, I can have a sleep rhythm that is not very

orderly, without having disturbances and disturbances and difficulty restoring sleep. Also, without the effects and after-effects of neuroleptics, the. cold would not have caused me any great bodily discomfort or kidney problems. So, without the effects or after-effects of neuroleptics, I would have resisted the cold. So, we can say (the better I know my body, the more I know about the physical discomfort caused by neuroleptics as well as their damage.

The health problems mentioned were so unhealthy that they are reminiscent of the effects of neuroleptics and such unhealthy effects are only caused by neuroleptics

The health problems mentioned were so harsh and violent and persistent that they are reminiscent of the effects of neuroleptics. Effects so harsh, so violent, persistent can only be caused by neuroleptics which have the characteristic of being difficult to make disappear.

Everything that happens to me physically, and to my health since the hospitalization and the neuroleptics, is the result of a series of events and after-effects caused by the neuroleptics, which makes them responsible in all cases. .

Everything that happens in my life since the hospitalization and the neuroleptics is the real consequence caused by the hospitalization and its neuroleptics, which makes them responsible

They are in any case responsible for what happened to me in 2022, and it is believed to be following a supposed “destruction”. So, if they are not directly responsible, they are indirectly responsible, so they are in all cases responsible for these health problems in 2022.

When I had a health problem, I even said "why did my body become like this and that's pretty much the same thing I said when taking neuroleptics."

The anemia was linked to the effects of neuroleptics as well as the tingling that I felt in my scalp.

If there was malnutrition, it was because of the neuroleptics. Neuroleptics take away the desire to eat, the pleasure of eating and make eating difficult, even a chore.

After the neuroleptics, there were restrictive diets that I did.

PINABEL, we had a meeting with him. He spoke in an authoritarian manner: “I'm the boss here,” he wrote to himself, jumping out of his chair. He wanted to impose his insane theories and this story of

“disease” and was in denial of the devastating effects of neuroleptics. I clearly told him that neuroleptics were a harm and not a “treatment”. But he didn't listen. I then told him: “You are talking nonsense”. He didn't switch on, and sat back in his chair and changed the way he spoke.

Like many of these criminals, PINABEL only knows how to impose himself through an authoritarian tone and authoritarian methods. Otherwise, he doesn't have confidence in himself and has nothing effective to offer.

Everything that happens to me after the hospital and the neuroleptics is caused by the hospital and the neuroleptics. This is what the criminals will deny, they may talk about the “disease”, but the truth is that everything that happens to me after the hospital and the neuroleptics is caused by the hospital and the neuroleptics.

In March 2020, I tried to flee and leave the country because of the hospital and ended up on the streets. An unhealthy cycle of perdition caused by the hospital and neuroleptics

One health problem caused by the hospital and neuroleptics causes another, a safety problem caused by the hospital and neuroleptics causes a health problem, one health problem causes a safety problem, and so on, this who has an unhealthy cycle caused by the hospital and neuroleptics

This PINABEL was harsh in his words, I would even say that he was extremely harsh. He praised RISPERIDONE (one of the worst destructive neuroleptics) and even spoke of the cerebral origin of the “disease”. Rubbish and nonsense. One of the most scientifically unfounded theories of “psychiatrists”. It already has no meaning and it's rubbish, already their whole theory as well as "the disease" is total rubbish and total nonsense.

According to my parents, they found nothing, they understood nothing, they had someone in front of them, they had to fill out forms, provide a diagnosis, so they put "first psychotic episode", how can they say first psychotic episode, do they really know me, do they know my past,? Nonsense and nonsense as well as their theories that they transcend on people to prove that they are doing something and that they found the case studied at school.

One of the methods used by the CMP to impose their injectable poison is the control of the injections, with the effect over time, called the “delay” effect.

The hospital and neuroleptics cause the brain, the thoughts, the emotions, the body to change, which constitutes a crime in itself.

We saw two psychiatrists, Dr G and Dr N, as well as a psychoanalyst Dr S. All three said I had nothing, that I don’t have a “disease”.

According to Dr. never said and quite the contrary, when my father asked them to take me out, they did not follow up on his request.

According to Dr. N, there was a bad job. He even suggested antidepressants (I don't like these things much and I'm wary of them because of neuroleptics, but they're not like neuroleptics. Antidepressants are nothing compared to neuroleptics. neuroleptics are incomparable in horror. I never had antidepressants before the hospital and the forced intake of neuroleptics. If, currently, I needed them, it is because of the after-effects of neuroleptics (cycle. unhealthy of neuroleptics and corrupt labs). I am wary of antidepressants. I don't like them and I don't recommend them. Not to be compared to neuroleptics.

When I left the hospital, I took regular blood tests to see if I still had the residue of this poison in my body. I did them almost every day, until my mother went to the lab to ask them to stop doing these analyzes for me, telling them that they were taking advantage of the situation. He is an adult, he was told, but my mother was firm and even threatening. Since then, they have refused to do these analyzes for me.

In these analyses, we could see that the medication disappeared as I moved to phase 2. Towards the end of June, we could see that it had almost disappeared. At the beginning of July, it completely disappeared.

MARTINEZ, told me: “but take it, take it!, but I am not going to come to your house to see if you are taking it or not” There, we are in total nonsense where the doctor wants to impose to the patient something not for medical reasons, nor for the necessity of a medicine, nor for the well-being of the patient, nor for the need, but it is because the doctor, in his authoritarian logic has decided and wanted the patient to take it and there he accuses the patient and addresses him in an authoritarian tone, and not a persuasive tone, speaks to him in an accusatory tone, and not a convincing tone. The same goes for Dr PINABEL who uses an authoritarian and accusatory tone. With the hospital, it's even worse, since using their authority, they give you the poison by force. There, it is obvious that this has

nothing to do with medicine, because the principle in medicine is to give a medicine out of necessity, and even extreme necessity or out of need, or for the well-being of the patient. We give medicine to treat, to cure, to relieve. There, we have something which does not relieve, which does not treat, which does not cure, but on the contrary, it destroys you, it annihilates you and takes away everything you have as an individual to make you a wreck, a rag. A harmful thing imposed by the will of the doctor, who is no longer a doctor, but a sorcerer, and even medicine, is no longer medicine as a science and noble profession.

MARTINEZ prescribed 5mg of ABILIFY and it was already unbearable and even torture for the body.

The hospital forced me to take 20 mg of ABILIFY, which is quadruple it) + TERCIAN (I don't remember how much, but let's assume it's the equivalent of 20 mg * 2 = 5 mg * 8) + the ABILIFY 400 mg injection (=80*5mg) = 92 *5 mg, which means that when I was released, they gave me 92 times, what MARTINEZ gave me and that I did not not supported at all.

At the hospital, I was almost like at the beginning of my discharge, plus they gave RISPERDAL which is more powerful than ABILIFY so we suppose it is 92 times, what MARTINEZ gave me.

That's a theoretical calculation in figures. If we measure the effects and the real damage at all levels caused by this poison, it has no measurement scales and is beyond any measurement or comparison.

The hospital and the neuroleptics have affected every aspect of my life. This illegitimate hospitalization was a real shock and a great feeling of injustice and abuse and left a feeling of insecurity in relation to the hospital especially, and I no longer trust medicine and medications.

With the damage on the physical level and the damage on the real level as well as on the psychological level, the hospital and the neuroleptics have touched and impacted every aspect of my life. Everything has stopped and much of my time and thinking is focused on this episode, remembering, talking, discussing and thinking about these criminals and their poison.

The effects of neuroleptics:

Badly coping with heat

Lots of sweat in the body in an abnormal and unhealthy way

Nocturnal awakenings caused by heat

Unhealthy phenomenon: I drank, normally and without forcing myself, up to 9 liters of water, which made me lose mineral salts from my body, a very serious thing.

Having trouble coping with the cold

Body discomfort with the cold

Kidney problems caused by cold

When I couldn't sleep, I had harder and lower quality sleep, broken and shallow, this makes the person feel like a "prisoner" of a certain sleep rhythm.

Nausea and fever-like, dizziness and nausea

Slowed gait, stupefied state, stunned by neuroleptics

Shock caused by hospitalization and neuroleptics

Real and extreme weight loss in certain phases caused by neuroleptics

Neuroleptics modify the brain, the body, the thoughts, the emotions, the state of mind…

Horrible chest pain that prevents sleep

Nocturnal impatience: waking up to walk, which is the height of torture, of horror

Nocturnal urine

Very frequent urine

Difficulties walking

Huge weight loss

Loss of heat resistance

Loss of resistance to cold

Fatigue, suffering, + kidney problems caused by neuroleptics

Loss of any sense of rest and well-being

Tingling in the head

Difficulty going to the toilet (urine, stools, gas

Stopping sneezing: blocking this ability to sneeze

November 2019: Having terrible headaches and fatigue and sometimes only sleeping 3 or 2 hours a day. I sometimes slept 0 hours, then 3 hours, then sometimes 4 hours. This sleep was very painful because of the headaches, torture. The body was completely out of whack.

End of 2019, beginning of 2020; enormous weight loss and monstrous weight loss.

Early 2022: many illnesses and disorders in the body surely due to neuroleptics 3 years ago and that neuroleptics and criminal psychiatrists are primarily responsible

Difficulty climbing stairs

Difficulty walking

Frequent urination (urinating all the time)

Weight loss and malnutrition

Neuroleptics and psychiatrists were responsible for a restrictive diet that caused severe malnutrition. The restrictive diet was taken, thinking that such a diet could combat the effect of neuroleptics, although I did a GAPS diet on the recommendation of a specialist

Total responsibility of psychiatrists and neuroleptics.

Having the only “pleasure” of sleeping or eating + reduction in the reality of these pleasures and absence of pleasure, difficulty eating and disruption of sleep and its weakening.

There is an intention and premeditation of small-scale murder, with great suffering and pain.

Difficulty and fatigue and heavy feeling when doing the simplest acts like going shopping, running, and even sitting and standing

A horrible swelling of the legs which I suspect is linked to the disgust caused by neuroleptics

Is it due to low protein intake??? but in all cases the neuroleptics and the “doctors” are responsible.

Either directly, because of the damage caused by neuroleptics, or following malnutrition and loss of proteins which followed the damage caused by neuroleptics and for which neuroleptics are responsible or indirectly.

No longer want to and no longer do any activity

Loss of ability to concentrate.

Stop studying, prepare for exams, homework and classes

Having pain when eating, which leads to anorexia and malnutrition.

Do detox to want to recover from the effects of neuroleptics, which has counter-effects and leads to malnutrition, the responsibility of neuroleptics.

The destruction of all personality, of all particularity and specificity.

The problems that appeared in 2022 are so severe, so persistent, so aggressive that they are similar to the damage caused by neuroleptics and this is a common point between them, which confirms the link and therefore the responsibility of neuroleptics in this damage that appeared in 2022. .

The responsibility of neuroleptics for what happened in 2022 is obvious.

Pain in my thigh (right, maybe) that hurt so much when I walk (April 2019)

Left arm pain around winters 2019

Decreased capacity for perception, consciousness, communication

Decreased ability to do things, motivation, independence, well-being, good health.

Unhealthy hypersensitivities appeared between the end of August 2019 (to laughter, to crying, to dopamine??? perhaps. They are unhealthy

Unhealthy sleep interruptions due to the damage caused to the neurosensory system by neuroleptics.

The effects of neuroleptics are endless, and the list goes on and on

At the start of the maximum effect of neuroleptics, difficulty urinating, stools, intestinal gas, etc.

The report and the errors

I didn't go to the hospital spontaneously. It was S.HNID who took me.

The “fuzzy request” qualified as such because of CHAMI's poor work and negligence, and the fact that she directs to the questions she wants and the subjects she wants and thus tries to impose hospitalization on me .

I refused hospitalization: there is no need or reason for it. We notice that they want and try to impose it

I did not accept a new consultation, this is a form of harassment, aggressive neglect, bad work. On top of that when I told him I didn't want to, he insisted, he told S.HNID to bring me back. “The nurse even said to me: “you’re coming”. So he imposed it on me and spoke in an authoritarian manner. On top of that, he didn't tell me that I was going to be interned, and even worse he lied to me by telling me: "we don't know when you're going to be released before noon or at noon or after"

We do not have “an agreement on this consultation”. “The nurse did not inform me that they are going to hospitalize me and even lied, and harassed, insisted and sent S. HNID and imposed it on me. He said “you come”, so he imposed it.

I refuse that elements of my life and/or my private life and that they are not supposed to know and therefore have no legitimacy or right to this, I therefore refuse that such elements be used in their reports and/or or used against me, whether it was me who said it and they are not supposed to know and I refuse it, and/or whether someone else said it and they are not supposed to take such things about me from someone. This is insane, dishonest, nonsense, not logical.

In fact, some elements, for example, my parents brought up to support their position that I don't have an "illness" or anything like that, so they tried to explain to them my reality and the truths about me, but the hospital remained in denial and did not want to hear anything. We can even say that they pushed my parents to give these elements and the hospital in their extreme malice and dishonesty used it in a senseless, unhealthy and dishonest way.

Other elements were mentioned by me in their questionnaire that were directed, senseless and synonymous with pressure and psychological and moral isolation. Other elements were mentioned anecdotally, some mentioned for a purpose and steps about which I was mistaken and misled, other elements evoke relative and objective problems concerning me which were exaggerated by them in the framework of unhealthy and corrupt theories, as well as their dishonesty, their nonsense, as well as their nuisance and intention to harm, and in contradiction.

I never said "having a persecutory delusion" or anything similar. It is the criminals who have interpreted as they wish within the framework of their pseudo-scientific, insane and irrational and false theories. (TORCIAC even asked me this question and I told him that I don't have that) Then, I refuse that elements of my private life, which they are not supposed to know, are used as elements as they wish in the framework of their nonsense to fulfill their reports which constitute an attack. I therefore refuse this intrusion of SAINTE ANNE into the different aspects of my life. They have no rights or legitimacy. They have been harmful on every level and aspect.

This “observation” with the effects of neuroleptics is insane, already because I refuse this “observation”, just as I refuse neuroleptics for which there is zero tolerance and consider them to be more than absolute evil. In fact, nothing positive, nor any positive development can happen under the influence of neuroleptics, since neuroleptics are lobotomy, annihilation, destruction, torture.

The dose when I came out: injection 400mg ABILIFY+ 20mg ABILIFY+ TERCIAN.

The nonsense and crime of hospitals and neuroleptics:

1) Locking up a person and depriving them of their liberty even though they have done nothing wrong
2) Lock him up against his will and against his will
3) Imposing something on him against his will and against his will without giving him the freedom to choose
4) Forcing him to take “medication” against his will and against his will
5) These drugs are harmful neuroleptics
6) These neuroleptics are destruction, torture, horror, nightmare, unhealthy, violent
7) In addition to their short-term damage, neuroleptics cause medium-term damage
8) Neuroleptics cause long-term damage.

All this to a person who has done nothing wrong. It's unfair and illegitimate

Even if a person does something, that is no reason to do something so horrible, inhumane, barbaric, disproportionate, unjust and even incomparable, extreme, horrible, beyond any norm.

Imprisoning a person without reason, without motive, illegitimately, unjustly, on an arbitrary decision by a mediocre, incompetent and indifferent and malicious person who botches and this in a few minutes if not in a few seconds

Imprisoning a person against their will, according to pseudo-scientific theories that are unreal and even beyond the pseudo-scientific and the unreal and which make no sense and which are nonsense without tail or head.

Imprisoning a person against their will, equating a so-called “psychological” problem with a real danger for the person

This so-called “psychological” problem is not a real danger for the person and far from it and it has nothing to do with it and it is ANYTHING. NONSENSE.

Force yourself on the person and interfere in their life and their own affairs and problems and thus impose things on them against their will (note: this alone is a real danger for the person)

Claiming in the most irrational and senseless way to "help" the person or "cure" or whatever, and based on the fact that something is a real danger to the person when in reality, there is nothing this danger, and thus impose things on him against his will.

The things imposed on the person have nothing to do with their problems (whether they are real and the real problem experienced by the person or the one claimed by the criminals). What does locking someone up against their will have to do with their well-being? What is the relationship between neuroleptics and one’s well-being?

In fact, locking up a person against their will or imposing something on them against their will can only be a source of discomfort since experienced as a violation: this is obvious. So what can we say when this violation is at the level of the body, the brain and the neuro-hormonal system of the person? This is beyond any violation!

Neuroleptics are dopamine blockers. The main effect of neuroleptics is to block dopamine, the hormone of joy, well-being, motivation, excitement, pleasure, vigor... There, we are in a senseless, cynical contradiction, without a tail. neither head nor criminal and barbaric on the part of these criminals. NONSENSE. ANYTHING. CRIME.BARBARIUS

Neuroleptics have the effect of cutting off all pleasure, sensation, emotion, receptivity, consciousness, intelligence, vigor

Neuroleptics cut off sleep, interrupt it, diminish it, reduce it.

Neuroleptics cause the phenomenon of impatience or akathisia or restless legs syndrome.

Neuroleptics cause external and horrible physical discomfort and mental discomfort beyond measure.

Neuroleptics cause a horrible nightmarish emptiness, extreme destructive, incomparable, beyond all measure and comparison and description.

Neuroleptics torture the person

Neuroleptics destroy the person

Neuroleptics cause harm and suffering beyond all comparison, measure and which are extreme, horrible, destruction torture

Neuroleptics cause damage at the physiological, biological and bodily levels

Neuroleptics harm your health.

There is a contradiction: they assume that the person has a “problem” or “is not doing well”.

The harm caused by the hospital is real, true, extreme, horrible, destruction, torture, beyond all comparison and/or measure.

On the other hand, the “problem” or “the person is not doing well on which they based their abusive hospitalization does not exist, is unreal, is not true, otherwise relative, minimal, “small”, liveable with and adjustable. In short, this problem is non-existent in all cases.

Contradiction of NONSENSE. ANYTHING EXTREME CYNISM/ and beyond. CRIME.VIOLATION. LIE.BARBARIUS

What they did was this. Someone who is fine and has nothing, they said "he's not fine" and based on that and destroyed him and tortured him and made him really and truly not fine and in an incomparable, horrible, extreme, destructive, torture way.

NONSENSE. ANYTHING EXTREME CYNISM/ and beyond. CRIME.VIOLATION. LIE.BARBARIE, an approach serving the pharmaceutical labs which sell neuroleptics and impose them.

Same, regarding “the person is not eating”

Neuroleptics suppress the desire to eat, the appetite, and make eating difficult and a chore

The same goes for “the person is not sleeping”, neuroleptics cut off sleep, destroy it…

The same goes for “disease

The same goes for “suicidal thoughts”. He has no suicidal thoughts. Neuroleptics cause suicidal ideation. This is obvious when neuroleptics cut dopamine, torture, destroy, enter a horrible, nightmarish void.

Imposing on the person the racist and criminal idea that they have “an illness” and this according to their insane and headless theories

This is a crime in itself

Imposing on the person the fact that their particularities and characteristics and those of their person are “symptoms” and/or “disease” CRIME. BARBARITY. RACISM. DESTRUCTION.

Impose this moral violence on the person: denying the illness is one more symptom of the illness

Imprisoning the person against their will is evil + imposing something on them against their will is evil + imposing their insane, criminal and violent theories on them is evil + the neuroleptics they impose are harmful and destructive

The problems mentioned or claimed by these criminals to base themselves on, and with their insane theories are non-existent, unreal, relative, minimal, small, variable and adjustable while that caused by the hospital and neuroleptics is extreme, real, not relative , total, absolute, horror, torture, destruction and chemical, hormonal, bodily, cerebral, nervous.

Some of the "problems" mentioned by criminals or problems that they call "symptom" or "disease" are of a social and/or societal nature, such as the problem in communication or particularities linked to difficulties of a social, societal or communication, this is a CRIME

If the “problems” are of a social, societal nature, therefore medically and objectively they are not “problems” and even less “an illness”, it is obvious since the social and the societal is something subjective and in reality it is not a “problem”, medically and objectively it is not, and for the person it is not a “problem”

The person is interned, they are given neuroleptics by force+ the person has done nothing+ it is done in an arbitrary way, + it is done according to insane theories+ these theories say that the person has “an illness” + among the “symptoms” of “the disease” mentioned, there are a large part of them linked to the particularities of the person in connection with what is social and societal + destroy and deny these particularities in the person by these neuroleptics and thus destroy them him and target him as a person and human being. Neuroleptics block dopamine and thus cut off all sensation, emotion, ideas, thought, personality, own characteristics, mental and bodily

well-being. On top of that, neuroleptics torture and cause horrible effects like restlessness and insomnia. BARBARITY. INHUMAN.CRUELTY. CRIME.

If the person had certain problems either of an objective relative nature or otherwise, the criminals did nothing to help the person + the person had nothing + the person does not need neuroleptics+ neuroleptics are destructive + the criminals imposed something that has nothing to do with the person and their reality + they harmed the person + it is beyond harm, it is destruction and torture and horror + they used neuroleptics + neuroleptics have nothing to do with the person and their reality. They are harmful and have destroyed the person.

There is the contradiction between the fact that they speak of “illness and “care” regarding “illness”, with the fact that they claim in nonsense and non-logic to “help” the person.

Note: They do not help the person but destroy them + the “disease” they speak of makes no sense and is nonsense and has no rational basis, does not exist and/or concerns these particularities and/or linked to what is social, societal and therefore subjective.

IMPORTANT: among all the things that exist, they deliberately imposed neuroleptics and not other things, while neuroleptics block dopamine, torture, destroy, horror, intention to harm CRIMLE.BARBARIE. CYNISM.NUISANCE.

Neuroleptics cause the person to enter an unhealthy, destructive and horrible cycle. This cycle is corrupt and pharmaceutical labs profit from it. Labs complicit with criminals, and criminals also their accomplices

The “symptoms” mentioned have no meaning, just as “the illness” has no meaning or rational basis.

The elements mentioned have no meaning and no rational basis; without a real and rational link between them, has nothing to do with what they imposed, and are even of a different nature which makes the thing still senseless (which is already more than senseless) and without foundation (which is already unfounded) e.g.: if the person is not doing relatively well and/or is not eating relatively well, it is neither because of “illness” nor because of “delirium” (that makes no sense obviously), but it is because of very objective reasons. Example 2: the problem of communications, the particularities linked to the person, everything which is of a nature or linked to the

societal and subjective social, are not a problem (it is neither really a problem, nor for the person /the fact of considering particularities and/or what is linked to the social, the societal and therefore subjective, as an “illness” constitutes a crime, barbarity, cruelty). Example 3: considering certain repeated ideas as “delusional” and thus considering them as “symptom” and/or “disease”

Act on the person themselves, on their body, on their brain

Act on the person themselves and it is the person who becomes the object of criminal actions and nonsense theories and whatever. This is nonsense, nonsense, NONSENSE. BARBARITY.

Act on the person itself as if it were a piece of furniture, a guinea pig, object of their work and thus the person loses their rights, and things are imposed on them against their will, against their interests, against their property and against their health.

Act on the person themselves, on their body, their brain, and modify their body, their brain, their thoughts, their emotions, their ideas

In addition to modifying the body, the brain, the thoughts, the emotions, the ideas; neuroleptics reduce them, diminish them, cut them, disrupt them, disrupt them and block them. CRIME. BARBARITY. CRUELTY.

Modifying the brain, the emotions, the thoughts, the ideas of the person by modifying their brain and their body through chemistry, which are neuroleptics, constitutes A CRIME, BARBARIUS, CRUELTY.

On top of that, they destroy, they block, disrupt and torture. CRIME, BARBARISM, CRUELTY

They modify more, reduce more, disrupt more, destroy more, torture more. CRIME, BARBARISM, CRUELTY

They impose in an insane and forced manner and without any sense, foundation or logic, the notion of "delusional ideas", the notion of "disease" and the notion of "symptom" which have no meaning and which are nonsense. What. And thus, by illegitimate force, modify the ideas and the brain of the very person. VIOLATION.CRUELTY. BARBARISM, CRUELTY

It’s the “doctors” who decide when we go out. Worse than prison.

They bring us in for no reason, without motive, without us having done anything wrong. Worse than prison

They force us to take “medication”. Worse than prison

The longer we stay, the more they make us take neuroleptics. The later we go out, the more they force us to take neuroleptics. CRIME

The lie concerning the “judge of liberties” which is only a formality and only validates the decision of the criminal “doctors”.

All the lies about neuroleptics and/or their effects and/or why they give them CRIME, BARBARIUS, CRUELTY. Cynicism

IMPORTANT: The theories of these criminals are more than irrational and more than pseudo-scientific. It's beyond. CRIME.

The same goes for lies about “illness”

The lies regarding “the person is not doing well at the time of internment” when it is false the person is doing well and it is with the neuroleptics that they are not doing well.

The lies and the cynicism and the extremely cynical minimization regarding the destructive effects of neuroleptics. CRIME

The criminals did not impose themselves by brute force, they imposed themselves in other, roundabout, abusive and violent ways (e.g. lies, disinformation, abuse of trust, manipulation, authoritarian methods, methods unfair, the fact of imposing their insane and baseless and more than irrational theories, abuse on vulnerable people, on precarious people, on people under the influence of neuroleptics, cynicism, harassment) e.g.: the CMP, the hospital of the day, some psychiatrists in private.

If these criminals are told that these neuroleptics have harmful effects and that we do not tolerate them well, or if for ex there is the slightest refusal or resistance, they will do more violence and do worse, they increase the doses and/or or will keep the patient in the hospital longer (this knowing that the hospital and neuroleptics are already harmful.

They give neuroleptics which are harmful and dangerous products in the most irresponsible and jmenfutistic, mediocre and incompetent and sloppy way possible. They prescribe them as if they were sweets to give away, or as if they were selling potatoes, or as if we were in a café where we had to consume something. So, when it comes to the patient's health, the more harmful and dangerous the products are, the more they are something that is not necessary and the patient does not need them anymore. In principle, medication is only given if extremely necessary.

On the psychological side, it is the patient who is supposed to choose and want what is best for his well-being.

V **The truth about psychiatry, hospitals and neuroleptics:**

Some do evil and injustice, barbarity, crime, cruelty and horror; then they cover themselves with “the law allows that”, “it’s legal”. This is the case of psychiatry which takes people by force, which is a crime and above all these products are destructive, harmful, horrible and barbaric and synonymous with torture and destruction. They can commit all this barbarity and cruelty because these corrupt laws allow it.

In the account of the facts, we spoke of the “nurse” or “doctor”, perhaps, who was inhuman, cruel, arrogant, stressed, contemptuous, violent, harsh; his sentence was: “it’s going to be yes all the same, the legal texts allow us to do so”

We are in a pure culture of violation of rights, of “legal”, “institutionalized” crime and “legal” abuse, “legal” barbarism, “legal” attack on freedom.

So they commit crime, torture, barbarity, cruelty, abuse, violation of rights, but they are protected and can do it and society allows them because it is legal.

Note: in the other direction, one can be targeted, judged (even not, sometimes arbitrarily without any trial and this is the case of abusive hospitalizations), poisoned, interned; while we have done nothing wrong, the more they have nothing they can reproach for. This is the case of psychiatric hospitalizations which are abusive and arbitrary, and often by the decision of incompetent people, more than mediocre and beyond, who botch their work when it concerns life, health and human rights. a person ; in psychiatric emergencies (like the CPOA of SAINTE ANNE with Lyna CHAMI). Then, the other person confirms this erroneous diagnosis in the most inhumane and violent manner and beyond incompetent and beyond, botching the person when it comes to their life, health and rights. Then, there is a formality of “judge of freedoms” which only validates without any verification.

Note: they stick their theories of nonsense and whatever on the person, plus stick “disease” (nonsense and whatever)

We have just mentioned a contradiction in the corrupt laws of this system, in addition to mentioning their cruelty, barbarity, inhumane, criminal and corruption.

Some can do evil, injustice, crime, barbarity and cruelty, since it is "legal", since it is still practiced, since it has become "normal", since it is in the practices , since people do it, since there is a pseudo-medicinal and pseudo-scientific (nonsense) authority behind it. It’s like a barbaric custom that has taken hold.

This is the case of criminal psychiatrists who practice forced, abusive and arbitrary hospitalization without consent, forcefully administer harmful neuroleptics, destructive, horrible and torture. And society allows this and even under the guise of “medicine” and “science”. in this society hypocritically and falsely claim to be “a society of freedoms and rights”

Criminals don't even follow their laws that they claim to act according to (or their own laws). And so, the hypocritical society does not even respect its own laws.

In the hypocritical and lying society of the 21st century which claims to be “modern” and “liberal”, says it protects people, their rights and their freedoms, when that is a lie. Generally speaking, corrupt laws theoretically contain what they call "human rights" "defend fundamental rights and freedoms" and make people believe that they protect people and make people believe that they do not allow not abuse and criminal acts. In fact, we see very clearly that corrupt laws as well as the "justice" that goes with them, allow these abuses and these criminal acts, if it is not that they protect the criminals and the people responsible for these acts, if it is not even worse, it is that these laws gave instructions and directives to these criminals to practice these crimes.

That's generally speaking.

We have the case in which psychiatrists do not discharge the patient from the hospital when the parents request this. However, their own laws contain the fact that when a parent objects to compulsory psychiatric hospitalization, the latter does not take place, as well as the fact that when a parent requests that their son or relative be released from the hospital, he is released immediately. But, criminals don't even respect their own laws that they claim to act according to. There, we have abusive cases and even contrary to their own laws, among these criminals, if it is not that these

criminals have acquired a sort of barbaric usage and custom which have become above their laws, in their own laws, if it is not even worse, it is the fact that these corrupt laws contain certain loopholes that criminals know how to use to impose their practices, uses and barbaric customs and thus carry out their crime, injustice, barbarity, cruelty while being covered by the corrupt law.

The “judge of freedoms” is an example of the hypocrisy of this system, these institutions, this society, its laws as well as the “justice” that goes with it. In fact, he only validates the decision of the criminals with whom he is complicit without any verification. In addition to that, this so-called “judge of freedoms”, I believe that he is represented or representative of the hospital, with its “psychiatrists”, “nurses” and the director of the hospital.

The director of the SAINTE ANNE hospital was CHASSAGNOL

The institution is already based on abuse and corruption, and the laws it operates under are already corrupt and unjust; it is therefore more than in their practices and normal and no wonder that they do not respect their own laws.

We are with thugs who are into aggression, violation, confrontation, violence, injustice, violation of rights, doing evil, abuse, oppression, crime, and then protecting themselves by a corrupt law. We have the sentence of the thug, inhuman, arrogant, violent and cruel “nurse” who said “it’s going to be yes anyway, the laws allow us to do it.” In other words, he wanted to tell me: “We are going to infringe on your rights, and yes, we are criminals, corrupt and thugs and oppressors. But you can't do anything to us since there is a law that allows this, protects us when we do this."

Neuroleptics which are dangerous, harmful, destructive substances and synonymous with torture and horror/and these words are more than very extremely weak and beyond to describe them) are "legal" substances in this corrupt law, as well as this corrupt society and system

“Private psychiatrists, and since neuroleptics are “legal”, they go further than that and give these neuroleptics at will, more to people who do not need them, the more they prescribe very lightly as if it was candy, even worse, they do not inform about the effects of neuroleptics, even more , in some cases, they do not even say the reason why they administered it, And the worst of the worst and the peak of the worst is that they go so far as to lie, manipulate, abuse,

exert pressure and/or psychological pressure and all this in addition to misinforming according to the subjectivity and wishes of the “psychiatrist”

While a medication is in principle supposed to be given only in case of necessity and even extreme necessity, or if not at least for the need and/or well-being of the patient; there, we have nothing but "psychiatrists" in private who do more than abuse what is "legal" and prescribe it in an abusive way, already that these "legal" poisons are already an evil and are harmful and destructive (ex MARTINEZ) When they do not practice forced hospitalization and force-feeding of neuroleptics, they have other corrupt and abusive and unfair means to impose their poison

We have the corrupt "law" which allows the forced psychiatric hospitalization of people, which is already a serious crime depriving the person of all freedom, will and choice, in addition the hospitalization has nothing to do with the needs of the patient, neither with his interests nor with his needs and is not for his good or for his well-being. In addition, this hospitalization, which is already more than criminal and abusive (it goes beyond and the words are weak) is decided by the will and the arbitrariness and the subjectivity of these criminals. In addition it is decided based on things that are more than irrational and beyond and without any basis or meaning and which are nonsense. These things, being pseudo-scientific and pseudo-medicinal, stick to the person and impose on them something which does not exist and which has no meaning or basis which they call “disease”. plus if you're in denial, it's another “symptom”. As neuroleptics are “legal” products, criminals forcefully take them from patients who are already hospitalized. Worse still, they force-feed patients large doses of neuroleptics and don't know what to do with it. Plus, that's all they do. Most of all the things that exist, they just give neuroleptics. More if there is the slightest refusal and/or resistance, they keep longer and/or increase the dose (the NL being already harmful and destructive + there are the pharmaceutical labs which benefit from it + there is the interest of the ''psychiatrists'', the HP and the pharmaceutical labs who manufacture these unhealthy NL against the interest, health and good of the patient (= a whole corrupt system against the patient))

NL and forced hospitalization are already a crime and an injustice, but which are permitted by corrupt and criminal law;

criminals do more than abuse and to the maximum of what "the law allows" and which is criminal and unjust and cruel

12) In addition to more than abusing and to the maximum and maximum of the prerogatives given to them within the framework of the legality of NL and forced HP, being already criminal , unjust and illegitimate + the criminals do not even respect their own laws such that there is multiplication and accumulation and addition, in the context of bad faith and obvious intention to harm, of ill-intentioned, disloyal, corrupt, mediocre mistakes and blunders in the worst sense of the term mediocre; they misinform, lie, manipulate, exert pressure and/or psychological pressure, corrupt, unfair, mediocre methods (in the worst sense) (e.g. the episode with CHAMI in which she lies and misinforms my parents+ CHAMI puts pressure so that 'they sign the HDT when in reality it has no reason to exist since no one asked for or wanted this hospitalization+ The violence, the arrogance, the barbarity of the ''nurse'' at the CPOA + The fact that they impose subjects and questions that go into their nonsense when they have no place to be+ ignoring and even not wanting to know why I came nor how nor who took me and just put ''fuzzy request'' and then impose these things directed by them and according to their insane and inhuman and violent theories and which have no reason to be + GALLET who at one point even refuses to speak with the parents about patient + prevent the parents from visiting without informing the patient in the first days + ESPECIALLY: Not respecting the parents' decision to discharge the patient + ESPECIALLY: The letter summoning my parents to the session of the ''judge of liberties'' which arrives late + The session is 12 days after hospitalization, which is long given the fact that a letter arrives at most in 4 days by choosing the cheapest and therefore slowest service.

The cynicism and denial of CHAMI + the denial and harshness of GALLET+ the cynicism and denial of ZARZOUR + important. The fact that they interpret poorly and/or as they please, to the point of distorting what I said during their questionnaires and interviews (the latter being already managed in a very bad way by them, in addition to be synonymous with violence and pressure + the moral harassment and control used by the CMP and the hospital of the day + the fact of abusing the patient on

neuroleptics having lost all will and capacity for action, capacity to independence, capacity for understanding or awareness and degree of perception.

The CMP thus imposes the injection of force (for which the constraint has been theoretically lifted) + the CMP, the hospital and the hospital of the day have imposed their speeches and their insane theories, more than mediocre, which have nothing to see nor place to be, and thus they indirectly threatened the patient by talking to him about "relapse" (which has no meaning or place to be and is nonsense and without foundation like their theories of which comes from, in addition to the fact that all the evil that happens after neuroleptics is because of neuroleptics

The accumulation, multiplication and addition of these facts signify bad faith and an obvious intention to harm + adding to this all the harmful effects of neuroleptics which are destructive, torture and horror + abusive, forced, illegitimate and unjust and which has no reason to be + the cynicism and bad faith that they demonstrate + the theories and the torchenesque and insane pseudo-science without foundation, tail or head, on which they are based + the elements mentioned also clearly demonstrate the bad faith of these criminals as well as their more than obvious intention to cause harm.

In summary, this last paragraph says to summarize the elements mentioned to demonstrate (which is obvious) bad faith and the intention to harm beyond the more than obvious among the criminals = IMPORTANT

Pharmaceutical labs are complicit in these crimes, in addition to being actors in these crimes, and this more than largely, by being beneficiaries since they receive the profits from the sale of these horrible poisons + they manufacture these poisons, they supply them , they do not inform about the effects of these poisons. In the instructions for the poisons that are neuroleptics (TERCIAN and others similar), they only say a small part of the effects that neuroleptics cause + they are silent about the effect of neuroleptics, + they are silent about the crimes of hospitals + they adhere to insane and baseless theories, and participate in imposing them, such that this more than mediocre pseudo-science has become a source of their commerce and their profit such that they invent diseases to sell

“medicines” + such that They make people sick in order to sell “medicines”.

Note: the effects caused by neuroleptics are beyond all measure and comparison, it is horror, torture, destruction and these words are very weak)

Hospitals and neuroleptics target certain people because they "do not conform to society", do not look like society "or different", and they label them as being "sick" and/or call them "disease" and this in the framework of their insane and more than mediocre and institutional theories, that for what is the pseudo-scientific facade for, what is the real hidden reasons, it is in fact for society and to target and destroy these people "no conform to society.

This society, in addition to having laws, a “justice”, and a criminal and corrupt system, it has a truth, a background and a real face that is more than ugly and beyond , more than disgusting and beyond. This society, in addition to being dysfunctional, is in its nature, its substance and its true face, inhuman, jahaliyan*, racist, ugly, disgusting, corrupt, at the peak of the worst mediocrity and beyond , and devoid of the minimum and the least human values and even any value of being alive, and benevolence, and empathy and love of living beings, and contribution of real value in real added value, and knowing how to live with human beings or even living beings, and exchange, and utility and communication and connection, it is therefore only destruction, horror, nuisance, barbarity, ugliness, disgusting, racism, rejection and destruction. Torture and cruelty towards others for their differences and/or particularities.

Thus, this ugly and corrupt society not only does not provide real value and/or added value, but its contribution is solely and purely negative and destructive. When it comes to human values (even the values of living beings like animals and plants), far from having the slightest minimum, this society is in the complete opposite, such that it approves of evil, unjust, abuse, crime, cruelty, doing a cruel and criminal act and then saying "the law allows us to do it", "it's legal" or "it's normal" or "it's in practice ", target the other for their particularity and/or their difference, barbarism, wickedness, hypocrisy, ugliness, corruption, mediocrity, violence towards the weaker...thus, this

society in addition to having acquired its own barbaric custom, it has acquired its system of inverse anti-values.

Note: such a society cannot be compared to animals or any other living thing. The latter deserve all the respect, while this company is very far and beyond reaching this level.

Note: this system with these hospitals and neuroleptics does not only target one type of person. Many types of people from different backgrounds and characters and characteristics have been victims of psychiatric abuse. Technically speaking, these criminals can intern a person in the most arbitrary and abusive way possible. And this “judge of freedoms” is just a puppet in their hands and a simple formality. It only confirms the decision of these criminals without the slightest verification. On top of that, the insane theories on which they are based have no rational basis and are nonsense, such that they can see anything, "an illness" and in anyone "an illness". (ex: he is fat: “disease”, he is thin, “disease”, he talks too much, “disease”, he talks a lot: “disease”, he has such: “disease”, anything: “disease” » ex: you drank your glass of milk at 7:35:31: “sickness”. So, those who are indifferent because they “don't feel concerned” should not be happy at all. this corrupt and insane and sick and crazy system, can target any person. It's a reality. And technically speaking, it happens that way.

Note: if there is a “madman” or a “sick person”, they are the criminals, “the psychiatrists”, “the nurses”, the pharmaceutical labs, the system, the corrupt laws, “justice” corrupt, as well as this sick society without the slightest human or real value.

Note *jahiliya: Arabic term meaning pre-Islamic times, which was a very dark and barbaric time where customs and practices were very barbaric and ignorant; a time when ignorance and pagan worship and worship reigned

*jahl: Arabic term meaning ignorance in the barbaric and barbaric sense of the term.

This is what we call the fact of interning someone like that for no reason, the fact of giving the destructive, harmful, torturous and horrible neuroleptics the system and the laws of society which allow this, and the society which practices this and targets people for “being non-conforming to society”. We can describe the latter and these facts and these criminals as jahl,

jahiliya, cruelty, racism, barbarism, inhuman, corrupt beyond all mediocrity and ugliness, and absence of any human value or real value.

Add to this the role of money (pharmaceutical labs.

Add to this the hypocrisy coming from society, from corrupt laws, from “justice”, from the media, from the pseudo-medical and pseudo-scientific community, from “human rights”

Add to this the fact of attacking for free and for no reason

15) Criminals do their utmost and use the slightest corrupt and devious maneuver with the aim of harming, destroying and torturing the person.

Ex: wanting to keep the patient as long as possible to give them neuroleptics for a longer period of time.

Example: the methods used by CHAMI at CPOA or those of the CMP or those of GALLET

In short, the entire system of hospitals, psychiatry, and neuroleptics is characterized as follows...

We are with pseudo-doctors who give "medicines", not for the good of the patient, but for other reasons which are against and contrary to the good of the patient.

A “doctor” is not supposed to act like this and it makes no sense, logic, reason or basis.

17) NLs kill people by several methods; or slowly, or by NMS (NL malignant syndrome), or by causing s** in these people. So, the deaths caused by NL are horrible and atrocious.

Rq: NL can cause serious damage to the kidneys.

18) NL can cause late-onset damage, such as Tardive Akathesia, Tardive Dyskinesia, and others.

19) NL harms the person in a disproportionate way, and causes them certain health problems, NL can thus cause late problems and problems in the long term.

20) NL causes torture that lasts over a period of time, and not a simple instantaneous torture at a moment, and this in addition to making the person feel slowness over time. This concerns the short term and short-medium term of NL (e.g.: the duration of taking a treatment, or a delayed injection, and even worse the

effects in their maximum and/or total phases (ph 0 and 1) last longer than their intended duration.

21) In addition to this turtle which lasts in an interval of time, it causes torture (even if it is of lesser magnitude than the 1st), it lasts in the medium term, the medium-long term, and even the long term. term (e.g.: more moderate and less violent phases begin after a considerable time following the cessation of NL)

22) NLs cause irreversible damage in almost all cases (I believe this is the purpose for which they use NLs)

23) the HP is worse than a prison (entering without reason and without having done anything, the ''doctors'' who decide when we leave so we don't know when, and especially the NL by force)

24) NL is more than worse than prison and beyond (obviously)

25)NL destroys years of a person's life

26)The NL destroy lives.

27) NL is synonymous with absolute horror, real nightmare, torture, destruction, darkness and nihilism

28) HP mistreat people and violate their dignity

29) NL are synonymous with lobotomy, dehumanization and legumization

30) NL are synonymous with barbarism, cruelty and crime

31) NL are synonymous with nihilistic cynicism, and nihilistic cynical indifference, such that nothing has any value in life, and such that evil and good are almost the same in this nihilistic cynicism

Rq: we can speak of cynicism-nihilism-indifference regarding the way in which psychiatrists mistreat the patient + the characteristics of this system and this society and ''justice'' and their corrupt and criminal laws + From the state to which they force the patient to be there through this forced medication and the NL

So this horrible, nightmarish and dark atmosphere that the NL makes you feel, is the image of the corrupt system and society and also the image of these criminal "psychiatrists".

32) NL makes the person feel uneasiness and physical discomfort. For example, the person may feel dizzy and nauseated

33) NLs cause pain in the body. Example: I once felt horrible chest pains that kept me from sleeping.

34) Cutting off, blocking a person's pleasures and sensations is an act beyond all cruelty and extreme torture

35) Cutting off, blocking a person's emotions, sensations is an act beyond all cruelty and extreme torture

36) Cutting off, blocking hormones such as dopamine, serotonin, adrenaline, norepinephrine, melatonin from a person is an act beyond all cruelty and extreme torture

37) Cutting off or blocking a person's sleep is an act beyond all cruelty and extreme torture

38) The violent void that NLs bring a person into through the blocking of dopamine and sensations, is a horrible, nightmarish void beyond all cruelty and extreme torture

39) The fact of modifying a person's brain, their body, their personality, their ideas, their emotions, their particularities; and this by chemo-corporeal means, is an act of violence, an act of cruelty (and beyond), is an unhealthy act, is an act of violation, is an act of destruction, is an act of suppression.

40)The destruction, disruption and disruption of a person's dopaminergic system and neurohormonal system is an act beyond all barbarity, cruelty, crime, horror

41) Damage to the dopaminergic and neurohormonal system causes horrible bodily discomfort beyond all discomfort (e.g. impatience, discomfort)

42) In fact, the pleasures and sensations targeted and blocked by NL also have a physiological and bodily role. Example: libido has links with the physiological and also has a physiological character. Example: dopamine provides great well-being to the body and its absence is synonymous with torture and discomfort that is more than horrible and destructive and beyond. Example 3: Dopamine is linked to the vigor and good health of the body, and its absence causes a slumped and stunned state and a slowed gait. Example 4: Laughter is linked to the face and the pt-t facial muscle. And NL disrupts the

physiological mechanisms linked to laughter. Example 5: Thinking can sometimes be tiring in the head. So she needs a healthy body and a healthy brain and dopamine. With NL, one cannot even think or concentrate and when damaged, thinking or concentrating is very and extremely tiring to the skull and body and brain, can cause tingling in the skulls, can prevent sleep or make it difficult, can even cause feelings of nausea and dizziness and fever (as if it is consuming more than the brain can)

So, in addition to the destruction on pleasures, emotions, sensations, particularities; (which is already beyond all cruelty, torture and barbarity and atrocity) 1, NL causes biological, chemical, bodily, physical and physiological and nervous destruction; which is a torture beyond all horror, and an atrocity, horror, cruelty and barbarity 2.

43) In addition to damage at the dopaminergic level, damage at the physiological and bodily level, NL causes damage at the mental level. Thus, the horrible emptiness caused by the NL, the time which passes more slowly as in torture (it already is) constitute elements of this destruction and mental torture linked to dopaminergic and physiological torture and destruction.

In fact, pleasures and well-being have a necessary role for a person's balance and mental stability, as do emotions. This is obvious that I believe the criminals deny.

44) We can say that the dopaminergic system, as well as the pleasures and well-being and the emotions linked to the latter, are like a kind of cushion or bed for the nervous system, for the body and the person at the physiological level and bodily and at the mental, affective and emotional level.

So the criminals who give NL which have the role of blocking dopamine, destroy the balance of the person at the bodily and physical level and at the mental level. This is evidence that I believe is cynically denied by criminals. And that's on top of the torture, destruction, horror, dark, nightmarish void caused by the NL.

-
